It is heartening to take note that after experiencing draught conditions in the state last year we had copious rain fall this year in the state bringing smiles on farmers. A good monsoon always heralds bumper harvest of not only agriculture crops but also a boon for livestock sector that gets surplus fodder boosting milk production in the dairy sector. Hope this trend of good monsoon will continue and help farmers to reap bumper crops.

“Research without extension is hobby, but extension without research is shallow and teaching without research and extension is hollow”. But, KVAFSU being a farm varsity, it carries out teaching, research and extension under its three tier system to enable its pupils to come out with good knowledge practical exposure to become entrepreneurs. Further, the teachers, scientists and extension functionaries will be able to address field oriented problems to find suitable solutions through research and practical demonstrations. KVAFSU have been completed 58 Research projects amounting to Rs.1512.76 lakhs with the funding support from State Government, Government of India, Department of Bio-technology, Indian Council of Agriculture Research, Private Institutions and National and International Organizations during 2016-17. Besides, 163 ongoing projects to the tune of Rs.3415.27 lakhs are in progress.

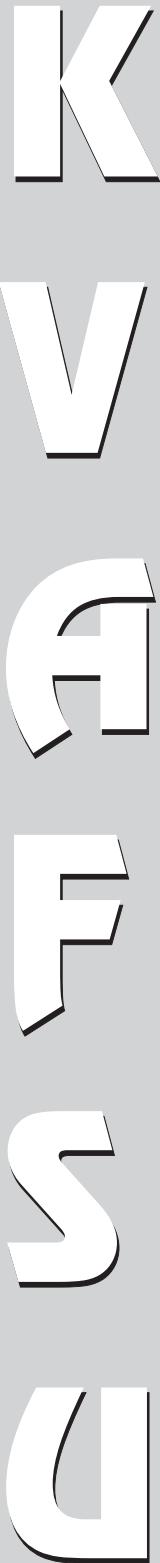

In order to cater to the needs of farmers in rural areas, the University has been carrying out need based research in various institutes and also established research and information centers across the state. Our scientists have developed several diagnostic kits, vaccines for diagnosis and prevention of diseases in livestock, poultry and fisheries sector.

To strengthen the research activities within the University and to provide opportunities for scientists and students, the University has signed MoUs with one International and six National organizations. It is hoped that the collaborative works will be of immense value to the society.

Place: Bidar

Vice-Chancellor

Editorial

The University has established Extension Education Centers (EECs) at Bengaluru, Bidar, Shivamogga and Hassan Campuses for the transfer of technologies developed by KVAFSU scientists to the un-reached farming community. The University is propagating and popularizing its technologies to the farmers through series of training programmes, demonstrations, animal health camps, field days, farmer-scientists interactions, awareness programmes, treatment of medical, surgical and reproductive problems at Veterinary Colleges, Krishi Melas, Farmers Meets, Village Adoptions, Publication of Folders, Bulletins and Books on Package of Practices in local language for the benefit of farming community and News Letters and Annual Reports of the University. Besides farmers, the university also trains departmental staff / KVK SMSs regarding latest technological advancements and shares the knowledge with neighboring state's scientists through model training courses etc.

A total of 113 Radio/TV programmes were given of which 54 were Radio talks and 59 were TV programmes. A total of 145 Animal Health Camps were conducted and 11,001 animals were treated in the camp. A total of 240 demonstrations were conducted. A total of 1,49,063 Animal Health Care Services were provided to the farmers and Diagnostic Services provided were 17,203 and 11,455 Consultancy / Advisory Services were provided. A total of 244 Training Programmes / Workshops / Conference / Seminars were conducted in 2016-17 and a total of 759 Scientists were participated in the Training Programmes / Workshops / Conference / Seminars as Resource Scientists and 403 Scientists were participated in the Training Programmes / Workshops / Conference / Seminars as Trainee Scientists.

Besides, plans are afoot to start three more Animal Husbandry Polytechnics at Koravangala-Hassan, Bargi-Chamarajanagara and Dornalli-Yadgir districts. With these three, the state will have a total of five polytechnics spread across the State, catering 10th passed rural students to enroll for these diploma course. In addition to services of extension activities undertaken by the University, it is also proposed to publish success stories of farmers across the state who have demonstrated the successful extension of profitable animal husbandry technologies under the supervision of our scientists so that they will be stimulation to other entrepreneurs to adapt the same in their farms. It is hoped that more and more invigorating extension programmes will be initiated under SUJALA Phase-III to help the farmers to double their income.

Mandate of the University

The prime objective and mandate of the University are to uplift the rural livestock, poultry and fish farmers with a motto of “Rural oriented and Farmer Friendly Activities”. The university has a territorial jurisdiction of entire state of Karnataka covering the 30 districts. The major objectives of the university include,

- ❖ To impart higher quality education in different branches of study, particularly veterinary and animal sciences, fisheries and other allied sciences.
- ❖ Advancement of learning and research, particularly in veterinary science, dairy science, fisheries science and other allied sciences to the rural people of the state
- ❖ To undertake the extension education service in veterinary and animal science, dairy science, fisheries science and other allied sciences to the rural people of the state.
- ❖ Such other purpose as the State Government may specify by notification.

Mission of the University

The Mission of the Karnataka Veterinary, Animal and Fisheries Sciences University, Bidar, is to strive hard and provide leadership in teaching, research and extension education services related to veterinary, animal and fisheries to keep pace with new frontiers of science and contemporary developments with social and technical relevance. In this context, the Karnataka Veterinary, Animal and Fisheries Sciences University is strongly committed in absorbing newer paradigms and using them to develop excellent human resource, innovative technologies and their dissemination so as to serve the livestock and fish farming community of the state.

Governance

BOARD OF MANAGEMENT OF THE UNIVERSITY

Chairman : Dr. C. Renukaprasad, Vice-Chancellor
Dr. R.V. Prasad, Vice-Chancellor (Acting)

Ex-Officio Members: Principal Secretary to Govt. Department of AH & Fisheries or his nominee not below the rank of Joint Secretary
Principal Secretary to Finance Department or his nominee not below the rank of Joint Secretary
Secretary to Govt. Law Department or his nominee not below the rank of Joint Secretary
Director of Animal Husbandry & Veterinary Services Govt. of Karnataka, Bengaluru
Director of Fisheries, Govt. of Karnataka, Bengaluru
President, Karnataka Veterinary Council, Bengaluru
Registrar of the University - Member Secretary

Other Members: Mr. Iresh, B. Anchatageri
Mrs. Lumbini Goutam
Dr. S.G. Konapur
Mr. K.C. Shankregowda
Mr. Ritesh Salian
Mr. K.S. Ashok Kumar
Dr. P.I. Ganesan
Dr. T.S. Chandrashekhar Rao
Dr. (Mrs.) R. Kalpana Shastri

EXECUTIVE SUMMARY

To accomplish productivity in Animal Husbandry, Dairying, Poultry and Fisheries, Government of Karnataka started the Veterinary, Animal and Fisheries Sciences University at Bidar during 2005 with the motto of '**Rural Oriented and Farmer Friendly**'. The University has initiated several measures to help farmers to improve their livelihood security through various activities.

TEACHING

Teaching is the prime concern of the University. The teaching activities are being carried out in three major disciplines at six campuses through seven colleges under the jurisdiction of this University. Undergraduate degree programmes in Veterinary and Animal Husbandry are being offered at Bidar, Bengaluru, Shivamogga and Hassan, while, Dairy Science at Bengaluru and Kalaburagi and similarly, College of Fisheries at Mangaluru. In addition to these, the Government of Karnataka has sanctioned three more Veterinary Colleges at Gadag, Athani-Belgaum and Puttur-Dakshina Kannada. Further, two Animal Husbandry Polytechnics are functioning at Konehalli-Tumkur and Kunur-Haveri.

The University offers Masters programme in **18** disciplines and Doctoral programme in **14** disciplines in Veterinary and Animal Sciences. In Dairy Science **03** Masters and **03** Doctoral programmes are currently underway. Similarly, in Fisheries Science **06** Masters and **05** Doctoral degree programmes are being offered.

During 2016-17, In Veterinary and Animal Sciences **64** obtained Masters degree and **14** received Doctoral degrees. In Fisheries, **24** have taken Masters degree and **05** awarded Doctoral degrees.

Admission under various degree programmes to KVAFSU was undertaken during 2016-17 and the intake was **368** students for UG programmes. Among **368** under graduate students, admitted to various degree programmes **264** were for BVSc&AH degree at Bengaluru, Bidar, Shivamogga and Hassan campuses and **61** for B.Tech. (Dairy). Degree and **43** for B.F.Sc. Degree. A total **90** students were admitted for Animal Husbandry Polytechnics at Shiggaon and Konehalli respectively.

A good number of graduates of this University qualified in Indian Council of Agricultural Research Junior Research Fellowship and secured PG admissions in many prestigious institutes like Indian Veterinary Research Institute, National Dairy Research Institute and Central Institute of Fisheries Education and also in overseas Institutions.

RESEARCH

"Research without extension is hobby, but extension without research is shallow and teaching without research and extension is hollow". But, KVAFSU being a farm varsity, it carries out teaching, research and extension under its three tier system to enable its pupils to come out with good knowledge practical exposure to become entrepreneurs. Further, the teachers, scientists and extension functionaries will be able to address field oriented problems to find suitable solutions through research and practical demonstrations. KVAFSU have been completed **58** Research Projects amounting to **Rs. 1512.76 lakhs** with the funding support from State Government, GOI, Dept. of Bio-technology, ICAR, private institutions and National and International organizations during 2016-17. Besides, **163** Ongoing Projects amounting to **Rs.3415.27 lakhs** are in progress.

In order to cater to the needs of farmers in rural areas, the University has been carrying out need based research in various institutes and also established Research & Information Centers across the state. Our scientists of the University have published **410** Research Papers in Journals of National and International repute, out of which **143** are International and **267** are National. Our scientists have developed several diagnostic kits, vaccines for diagnosis and prevention of diseases in animals, poultry and fisheries sector.

To strengthen the research activities, the University has signed Memorandum of Understanding with one International and four National organizations.

EXTENSION

The University has one Krishi Vigyan Kendra-Dakshina Kannada, Mangaluru and four Extension Education Centers at Bengaluru, Bidar, Shivamogga and Hassan Campuses for the transfer of technologies developed by the university scientists to the un-reached farming community. The University has adapted Villages and providing ambulatory clinical services. University also popularizing its technologies to the farmers through series of training programmes, demonstrations, animal health camps, field days, farmer-scientists interaction, awareness programmes, treatment of medical, surgical and reproductive problems, Krishimelas, Farmers Meet, Publication of folders, Bulletins and Books on Package of Practices in local language for the benefit of farming community and News Letters and Annual Reports of the University. Besides farmers, the university also trains departmental staff / Krishi Vigyan Kendra Subject Matter Specialists regarding latest technological advancements and shares the knowledge with neighboring state's scientists through model training courses etc.

A total of **113** Radio/TV programmes were given of which **54** were Radio talks and **59** were TV programmes. A total of **145** Animal Health Camps were conducted and **11,001** animals were treated in the camp. A total of **240** demonstrations were conducted. A total of **1,49,063** animal health care services were provided to the farmers and diagnostic services provided were **17,203** and **11,455** consultancy / advisory services were provided. A total of **244** Training Programmes / Workshops / Conference / Seminars were conducted in 2016-17. University scientists were participated in the **759** Training Programmes / Workshops / Conference / Seminars as Resource Scientists and participated in the **398** Training Programmes / Workshops / Conference / Seminars as Trainee Scientists.

(ii) UG Gold Medals Awarded: - Convocation not held during 2016-17

(iii) PG Gold Medals Awarded: - Convocation not held during 2016-17

5) Academic Research (Postgraduate Research)

Thesis accepted during the year 2016-17 for Masters and Doctoral Degree

i) Master's Degree:

Sl. No.	Thesis Title	Name of the Student	Major Advisor and Dept.
VETERINARY COLLEGE, BENGALURU			
1	Morphological studies on hind limb bones in sloth bear (<i>Melursus ursinus</i>)	Darshan, C.S.	Dr. Jamuna, K.V.
2	Studies on the morphology of muscles of shoulder and arm in sloth bear (<i>Melursus ursinus</i>)	Annie, V.R.	Dr. Jamuna, K.V.
3	Studies on the morphology of muscles of forearm and manus in sloth bear (<i>Melursus ursinus</i>)	Shruti	Dr. Jamuna, K.V.
4	Morphology and immunohistochemical studies on the localization of immunoglobulins in irregular areolae of porcine placenta	Sindhu, K.D.	Dr. Jamuna, K.V.
5	Studies on hematological and biochemical profile during late pregnancy and early postpartum in Nari suwarna ewes	Mallappa Talawar	Dr. Narayana Swamy, M.
6	Clinico-pathological studies and diagnosis of ehrlichiosis in dogs	Arun, P.	Dr. Sathyanarayana, M.L.
7	Evaluation of prognostic value of survivin in cutaneous and subcutaneous tumours of dogs	Kavya, N.	Dr. Suguna Rao
8	A longitudinal study on thyroid profile and certain reproductive hormonal profile at different stages of pregnancy in Nari suwarna ewes	Shwetha, H.S.	Dr. Narayana Swamy, M.
9	Studies on haemato-biochemical and pathological alterations in renal failure of dogs	Dilip Kumar, D.N.	Dr. Narayanaswamy, H.D.
10	Pathomorphological and biochemical evaluation of methotrexate induced hepatotoxicity and its amelioration by eugenia jambolana in rats	Vijaya Kumar, N.	Dr. Suguna Rao
11	Studies on thyroid and lipid profile in German shepherd dogs	Chetan Yadav, S.	Dr. Narayana Swamy, M.
12	Pharmacokinetic study of ketoprofen loaded polymeric nanomaterial in rats	Sindhu, B.M.	Dr. Jagadeesh, S.S.
13	Hepatoprotective activity and toxicity studies of <i>phyllanthus tenellus</i>	Sunil Kumar, K.B.	Dr. Shridhdar, N.B.

14	Evaluation of antibacterial, anti-inflammatory activity and dermal toxicity study of cassia tora	Thirumala, M.	Dr. Shridhdar, N.B.
15	Standardization and application of rabies virus neutralizing antibody assay for assessment of vaccinal efficacy in dogs	Neelufer, M.S.	Dr. Shrikrishna Isloor
16	Isolation and molecular characterization of canine parvovirus	Kamal Hasan	Dr. Rathnamma, D.
17	Isolation and standardization of diagnostic assay for the detection of <i>Bacillus anthracis</i> in livestock	Anil Kumar, S.	Dr. Veeregowda, B.M.
18	Studies on <i>in vitro</i> efficacy of citriodora oil for control of fleas in sheep	Ashwini, M.S.	Dr. Puttalakshmamma, G.C.
19	Epidemiological studies and molecular characterization of theileria species in sheep and goats	Shruthi, R.	Dr. Thimmareddy, P.M.
20	Certain epidemiological and molecular studies of fasciola infected snails in some areas of Karnataka	Rajanna, R.	Dr. Thimmareddy, P.M.
21	Evaluation of clinical efficacy of vincristin sulfate and doxorubicin in the treatment of canine transmissible venereal tumour	Deepti, C.R.	Dr. Chandrashekera Murthy, V.
22	Studies on factors influencing maternal survivability in crossbred cows undergoing caesarean section	Viswanath, S.	Dr. Chandrashekera Murthy, V.
23	Haematological, biochemical and uterine tocodynamometric studies in cases of dystocia due to uterine inertia in female dogs	Chethana, D.H.	Dr. Krishnaswamy, A.
24	Evaluation of mifepristone and estradiol valerate as post coital contraceptive drugs in female dogs	Debajyoti, S.	Dr. Krishnaswamy, A.
25	A study on laparoscopic artificial insemination using different sperm concentration in ewes	Rudresh, G.N.	Dr. Sudha, G.
26	Studies on pre and post surgical evaluation of female dogs affected with pyometra	Sandeepa, K.H.	Dr. Krishnaswamy, A.
27	Studies on different estrus synchronization protocols on conception rate in ewes	Mahendra, S.	Dr. Sudha, G.
28	A study on certain viral diseases of cats based on rapid test kits	Mayur, T.C.	Dr. Ansar Kamran, C.
29	Diagnosis of pancreatitis in dogs	Srinidhi Bhat	Dr. Yathiraj, S.
30	Serosurveillance of peste des petits ruminants (PPR) in sheep and goats	Yatheesh Chandra	Dr. Ramesh, P.T.

31	Certain studies on diabetes mellitus in canines	Shruthi, J.S.	Dr. Ramesh, P.T.
32	Studies on occurrence of tick borne diseases in dogs with special reference to diagnosis of ehrlichiosis	Rakesh, V.	Dr. Kshama, M.
33	Ultrasonographical, cytological and bacteriological studies of urinary bladder disorders in dogs	Shwetha, R.	Dr. Ansar Kamran, C.
34	Studies on babesiosis in dogs	Mohan Kumar	Dr. Muralidhara
35	Studies on percutaneous transfemoro-acetabular nylon wiring for subluxation/luxation in hip dysplastic dogs	Avinash, B.G.	Dr. Nagaraja, B.N.
36	Studies on percutaneous transfemoro-acetabular nylon zap strap application for the repair of subluxation / luxation in hip dysplastic dogs	Amith, N.G.	Dr. Nagaraja, B.N.
37	Studies on tensioning device (zip tie) application around the tumour mass in compromised dogs	Pramodh, J.K.	Dr. Nagaraja, B.N.
38	Studies on the efficacy of paclitaxel and docetaxel as anticancer drugs in the management of malignant mammary tumor in dogs	Parameswara, K.T.	Dr. Ranganath, L.
39	Proteomic and genomic studies associated with qualitative traits in chicken meat	Hemashree, P.	Dr. Girish Kumar, V.
40	Identification of seminal rnas as indicators of reproductive performance in bulls.	Sunil Kumar, K.K.	Dr. Girish Kumar, V.
41	Study on serosurveillance of foot and mouth disease (FMD) in elephants	Sridhar, R.N.	Dr. Ramesh, P.T.
42	Studies on the bacterial and fungal skin diseases in captive snakes	Meghana, P.P.	Dr. Upendra, H.A.
43	Studies on shell diseases of captive turtles	Preeti, G.S.	Dr. Yathiraj, S.
44	Studies on gastro-intestinal parasites of Asian elephants	Darshan, S.	Dr. Muralidhara, A.
45	Studies on gastro-intestinal parasites of deer (<i>Axis axis</i>)	Kalpana, K.	Dr. Thimmaredy, P.M.
46	Effect of feeding maize (<i>Zea mays</i>) husk and cob based complete feed block on the growth performance of Mandya sheep	Shashikumar, M.G.	Dr. Prabhu, T.M.
47	Effect of supplementing slow release nitrogen product on the lactation performance of dairy cows	Veena, N.	Dr. Chandrapal Singh, K.

48	A study on ovar-drb1 gene polymorphism in Mandya sheep	Rani Singh	Dr. Nagaraja, R.
49	A comparative study on cgh gene polymorphism and their association with growth traits in Swarnadvara and Giriraja chicken	Harish Kumar, D.V.	Dr. Jayashankar, M.R.
50	A comparative study on mtnr-1a gene polymorphism between Mandya and Nari-suwarna sheep	Vibha, C.R.	Dr. Nagaraja, R.
51	Evaluation of comparative performance of Giriraja under intensive and semi-system of rearing	Prakash, M.	Dr. Munegowda, T.
52	Effect of supplementation of bacterial probiotic on the growth performance	Prashanth, J.K.	Dr. Jayanaik
53	Effect of supplementation of acidifier on the performance of Raja II broilers	Doke Vijay Balajirao	Dr. Munegowda, T.
54	Effect of supplementation of various levels of inulin on growth performance	Praveen	Dr. Munegowda, T.
55	Comparative evaluation of Giriraja and Raja II under intensive and semi-intensive system of rearing	Nagavath Nemya Naik	Dr. Munegowda, T.
56	Effect of supplementation of probiotic on the performance of weaned piglets	Supriya, S.	Dr. Rajeshwari, Y.B.
57	Studies on the growth performance of Mandya lambs reared under intensive and semi-intensive system of management	Sudharshan, V.	Dr. Rajeshwari, Y.B.
58	Effect of weaning at different age intervals on performance of piglets	Banuprakash, A.R.	Dr. Rajeshwari, Y.B.
59	Development of software application on fodder production and its effectiveness among livestock farmers of Karnataka	Pavan Belakeri	Dr. Satyanarayan, K.
60	An exploratory study on factors affecting open days in crossbred cattle in Bengaluru Rural district	Chandrashekhar, G.K.	Dr. Jagadeeswary, V.

VETERINARY COLLEGE, BIDAR

1	Comparative histological and histochemical study of larynx in deccani sheep and Bidri goat	Anjali	Dr. Ashok Pawar
2	Comparative histomorphology and histochemical study of superficial lymph nodes in Deccani sheep (<i>Ovis aries</i>) and Bidri goat (<i>Capra hircus</i>)	Aditya	Dr. Gadre, K.M.
3	Efficacy of brucella vaccine in goat	Math Revapayya	Dr. Basawaraj Awati
4	Efficacy of goat pox vaccine in goats	Abhilash, B.	Dr. Basawaraj Awati
5	Haemato-biochemical profile in dystotic cows and buffaloes	Amar Dhurve	Dr. Tandle, M.K.

6	Evaluation of two herbal spray preparations in management of cervico-vaginal prolapse in buffaloes	Ningadalli Sharanabasappa	Dr. Tandle, M.K.
7	Study on musculoskeletal disorders in dogs and small ruminants with special reference to diagnosis using radiography and C-arm	Kendesh	Dr. Dilipkumar, D.
8	Evaluation of ropivacaine, articaine and lignocaine for regional analgesia in buffaloes undergoing surgery	Prashant	Dr. Shivaprakash, B.V.
9	Evaluation of dexmedetomidine and xylazine sedation for ketamine-isoflurane general anaesthesia in cattle undergoing clinical surgeries	Vinutha, K.G.	Dr. Shivaprakash, B.V.
10	Comparative evaluation of dexmedetomidine, xylazine and triflupromazine as preanaesthetics with propofol induction and isoflurane anaesthetic combination for various surgeries in dogs	Arunkumar	Dr. Dilipkumar, D.
11	Diagnosis and therapeutic management of bacterial pneumonia in bovines	Yallappa, S.I.	Dr. Patil, N.A.
12	Study on diagnosis and therapeutic management of canine ehrlichiosis	Roopali, B.	Dr. Vivek, R.K.
13	Study on metabolic profile of Deoni cows in transition period	Sateesh, A.G.	Dr. Vivek, R.K
14	Diagnosis and therapeutic management of babesiosis in cattle	Chethana, H.B.	Dr. Patil, N.A.
15	Effect of different seasons on physiological and biochemical profile of Deoni and Deoni crossbred cattle	Chandrashekhar, B.	Dr. Shrikant Kulkarni
16	Efficacy of serum gonadotrophin, estradiol-17 β , estrus buffalo serum and buffalo follicular fluid supplementation on <i>in vitro</i> maturation of buffalo oocytes	Ambadas	Dr. Shrikant Kulkarni
17	Evaluation of different antioxidant supplements on <i>in vitro</i> maturation of buffalo oocytes	Vijayalakshmi	Dr. Shrikant Kulkarni
18	Comparative study on meat characters of Yalaga, Kenguri and Bannur sheep	Mohammad Saqawat Hussain	Dr. Appannavar, M.M.
19	Genetic polymorphism of fecb and bmp15 genes in Kenguri and Kenguri×Nari suwarna (F1) strain of sheep	Asharani, A.D.	Dr. Appannavar, M.M.
20	Phenotypic characterization of Jayawadagi goat	Devendrappa, N.B.	Dr. Appannavar, M.M.

DAIRY SCIENCE COLLEGE, BENGALURU			
1	Development of enriched misti <i>dahi</i>	Soumyashree, T.C.	Dr. Venkatesh, M.
2	Development of enriched yoghurt using date syrup and whey protein concentrate	Yashaswini, N.N.	Dr. Arun Kumar, H.
3	Development of low calorie ice cream with fibers incorporation	Supriya, K.	Dr. Ramachandra Rao, H.G.
4	Development of low calorie synbiotic lassi	Immadi Sree Bhavya	Dr. Ramachandra Rao, H.G.
5	Development of whey based probiotic fruit beverage	Lakshmikanth, A.V.	Dr. Puranik, D.B.
6	Development of low fat probiotic paneer	Vellore Sri Teja	Dr. Vankatesh, M.
7	Studies on compositional features and therapeutic properties of milk from Malnad gidda (<i>Bos indicus</i>) cattle	Yuvaraja, Y.	Dr. Narasimha Murthy
8	Performance of microflora of kefir prepared from cow and goat milk	Manthani Vyshnavi	Dr. Prabha, R.
9	<i>In-vitro</i> bioavailability of iron from iron fortified yoghurt blended with oat (<i>Avena sativa</i>) milk	Dhavalagi Pallavi	Dr. Jayashri, P.H.
10	Quality attributes of safflower milk (<i>Carthamus tinctorius</i>) blended probiotic shrikhand	Jadhav Vijay Prabhakar	Dr. Jayashri, P.H.
11	Physico - chemical quality of goat milk yoghurt blended with cow milk	Sudeep, M.N.	Dr. Kemppanna, C.
12	Performance evaluation of antibiotic resistance probiotic lactic acid bacterial isolates in the preparation of <i>dahi</i>	Madhusudan, N.M.	Dr. Manjunath, H.
COLLEGE OF FISHERIES, MANGALURU			
1	Flocculation of white spot virus (WSV) of shrimp by organic flocculent for field level detection by a monoclonal antibody (MAB) based flow-through assay (Rapidot)	Cameron Donald Ghambi	Dr. Shankar, K.M.
2	Production of monosex male gift strain (<i>Oreochromis niloticus</i>)	Mahadevi	Dr. Basavaraja, N.
3	Hormone-induced sex manipulation in Amur common carp	Inchara, U.B.	Dr. Shankar, K.M.
4	Effect of dietary supplementation of dl-methionine on growth	Subhadip Mandal	Dr. Shivanand Murthy, H.
5	Effect of dietary supplementation of mannan oligosaccharide on growth, survival and immune response of Indian major carp, <i>Catla catla</i>	Monica, K.S.	Dr. Jayaraj, E.G.
6	Effect of l-threonine supplemented diets on Growth, survival, immune response and disease Resistance of Indian major carp, <i>labeo rohita</i> at two stocking densities	Jayashri Mahadev Swamy	Dr. Shivanand Murthy, H.

7	Evaluation of stability of reagents of nano gold labelled monoclonal antibody for flow-through assay (immunogold test)	Shridevi, P.	Dr. Shankar, K.M.
8	Development and characterization of rabbit anti- serum against acute hepatopancreatic necrosis disease (AHPND)	Srinivas, K.H.	Dr. Ramesh, K.S.
9	Study of chaetognaths and jellyfishes in the coastal waters off Mangaluru	Pema Chotten Wangja	Dr. Lakshmi pathi, M.T.
10	Combined effect of gamma irradiation and low temperature storage on the microbial and bio- chemical quality of fish (<i>Pangasius hypophthalmus</i>)	Mahendra Uikey	Dr. Manja Naik, B.
11	Development of gender friendly refrigerated fish vending and display unit using solar energy to enhance the keeping quality of fish	Gayatri Pandey	Dr. Raju, C.V.
12	Protective efficacy of dsrna against white Spot syndrome virus (WSSV) infection in shrimp	Puneeth, T.G.	Dr. Venugopal, M.N.

COLLEGE OF FISHERIES, MANGALURU

NSS/ Village stay camp

The NSS/Village stay camp for *IV B.F.Sc. students* was organized from 21st to 27th May, 2016 at Brahmavara, Udupi dist. It was inaugurated by Dr. S.M. Shivaprakash, Director of Extension, KVAFSU, Bidar. Sri Ganapathi Bhat, Joint Director, Department of Fisheries , Sri Parshwanath, Sr. Assistant Director of Fisheries, Sri Kumarswamy B.V., Assistant Director of Fisheries (G-I), Department of Fisheries, Government of Karnataka, Dr. B. Dhananjaya, Programme Coordinator (KVK), Sri Shridar V., Assistant Area Manager were the guests. The camp was organized by the NSS Wing of the college in collaboration with Zonal Agricultural and Horticultural Research Stations, Krishi Vigyan Kendra and Diploma (Agri) College, Brhamavara. Dr. A.T. Ramachandra Naik, NSS Programme Officer was the coordinator of the camp.

During the camp period, the NSS volunteers were involved in shramadhan by cleaning the premises of research station, college, agricultural farms, playground, street, play ground etc. Talks were arranged on soil characteristics and its suitability for agriculture, compost making, activities of research station and KVK, visit and study of fish cage culture systems, freshwater fish farms, goat farms, cattle farms, etc. NSS volunteers were also exposed to various associations in the locality to understand their nature of work and facilities extended to the public. SHGs were also interacted and shared their day-to-day activities with the NSS volunteers.

A one day Farmer-Scientist-Students (FSS) interaction meet was held during the camp. During this meet, the farmers were exposed to preparation of value added products. FSS meet was also focused to address on success stories of the farmers and students learning including scientists interventions. The camp was ended with valedictory function on 17.05.2016.

NSS/ Village stay camp from 21st to 27th November, 2016

The NSS annual camp coinciding with village stay (as course curriculum) for *IV B.F.Sc. students* involving local youths was conducted from 21st to 27th November, 2016 at Daregudde village near Moodabidire, Dakshina Kannada district. The camp was inaugurated on 21.11.2016 by Sri Abhayachandra Jain, former Minister and Hon'ble MLA, Moodabidire and Mulki constituencies. Sri Rajavarma Bailangadi, President of Krishi Vichara Vinimaya Kendra, Moodabidire, Sri Bhaskar Rao, President, Shaalabhivruddi Samiti, Govt. High School, Daregudde, Sri Subhashchandra Chouta, Vice-President of Krishi Vichara Vinimaya Kendra, Moodabidire and Dr. Shivakumar M., Programme Coordinator of Krishi Vigyan Kendra, Mangaluru were guests. Dr. M.N. Venugopal, Dean (Fisheries) was the president of the function. Dr. A.T. Ramachandra Naik, NSS Programme Officer was the coordinator of the camp.

During the camp period, the NSS volunteers were involved in shramadhan by cleaning the premises of schools, temple, playground, street etc. Talks were arranged on soil characteristics and integrated farming, compost making, kitchen garden preparation, visit and study of agricultural

activities including horticultural crops, fish cultivation, livestock rearing, cattle farming *etc.* NSS volunteers were also exposed to various associations in the locality to understand their nature of work and facilities extended to the public. SHGs were also interacted and shared their day-to-day activities with the volunteers.

A one day Farmer-Scientist-Students interaction meet was held during the camp. The activities and the problems of the farmers were listened by the Scientists and Students. The exposure of students to this meet was a great experience and the scientists gave the suggestion to overcome the problems faced by the farmers on crop cultivation and their business activities.

The valedictory function was held on 27.11.2016. Dr. S.M. Shivaprakash, Director of Extension, KVAFSU was the chief guest and presided by Dr. M.N. Venugopal, Dean (Fisheries). The NSS Programme Officer presented the report while students shared their experiences of the 7 days camp.

NSS regular activity on 2nd March, 2016

A campus cleaning programme was organized on 2nd March, 2016. Dr. S.M. Shivaprakash, Director of Extension, KVAFSU was the Chief Guest for the function. Dr. K.M. Shankar, Dean, College of Fisheries, Mangaluru presided over the function, Dr. A.T. Ramachandra Naik, NSS Programme Officer coordinated the campus cleaning programme involving all the UG and PG students and both teaching and non-teaching staff of the college. There was good response from all the students and staff of the college in beautification of the campus. During the cleaning programme, the fallen tree leaves were picked up, swept and dumped in a pit made for the purpose. Further, the broken tile pieces, concrete blocks, bricks, plastic materials, bushy plants, erratic growth of unwanted plants, *etc* were picked up and made a big heap in one of the corners of the campus.

NSS Yojanotsava

Dr. A.T. Ramachandra Naik, NSS Programme Officer lead the KVAFSU team and University Team Manager to represent in the state level cultural programme organized by the NSS unit of Mangaluru University at Sri Dharmasthala Manjunatheswara College, Ujire. b) Research Highlights

VETERINARY COLLEGE, BENGALURU

Title: A study on use of spent maize (*Zea mays*) cob as roughage source in the ration of small ruminants.

The study was conducted to assess the spent maize cob as a source of roughage for feeding sheep. Twenty four lambs of Bannur breed of about 3-5 months of age with body weight ranging from 8 to 15 kg were divided into 3 groups of eight each in a completely randomized design. Twelve weeks feeding trial was carried out with an initial adjustment period of one week and six days digestion trial at the end of experiment. Animals of control group (T_1) were fed finger millet straw and compounded feed mixture (CFM) while the experimental groups were fed either urea and salt (1 per cent W/W) treated maize cob with CFM (T_2) or spent maize cob incorporated total mixed ration (T_3) with a ratio of 50:50 between roughage and CFM.

The chemical analysis revealed that, maize cob was comparable with finger millet straw except for lower CP (4.10 vs 2.61 per cent) and higher NDF and ADL (64.25 vs 80.88; 2.73 vs 6.78 per cent). The energy density (ME MJ/kg DM) was higher in urea treated maize cob (7.88) as compared to untreated maize cob (7.33) or finger millet straw (7.19). There was significant ($P<0.05$) difference in total DMI (g/d) among different groups [401.1 (T_1), 319.2 (T_2) and 406.5 (T_3)]. The ADG [g/d; 31.6 (T_1) to 46.5 (T_3)] and FCR (g DMI / g BW gain; 8.12 – 12.71) were comparable among treatments. The mean apparent digestibility (per cent) of nutrients (DM, OM, CP and NDF) was comparable except for ADF which was significantly ($P<0.05$) lower in T_2 .

It was concluded that, the spent maize cob could be substituted for finger millet straw as a roughage source for feeding small ruminants at least during the periods of scarcity.

To overcome the problems of selective feeding on the concentrate portion of TMR mash and storage, handling and transportation of feed resources to deficit regions, a mixed ration was prepared in the form of block using maize husk and cob as the source of roughage. The ratio of roughage to concentrate supplement in the complete feed block was 40:60. Twenty Mandya / Bannur lambs of 4-6 months of age were divided into two groups of ten each in a completely randomized design. The CFB with finger millet straw was fed to T_1 and other with maize husk and cob was fed to T_2 . Twelve weeks feeding trial was carried out with an initial adjustment period of two weeks and six days digestion trial at the end of experiment.

There was no significant difference in total DMI (g/d and per cent BW) between treatment groups (T_1 ; 451 and 3.30 and T_2 ; 508 and 3.47). The ADG (g/d) and FCR (g DMI/g body weight gain) for T_1 and T_2 groups were statistically non-significant (T_1 ; 65.12 and 7.77 and T_2 ; 77.75 and 4.89). The per cent digestible organic matter in dry matter was also comparable between groups. It is concluded from the present study that, the maize husk and cob could be used in replacement of finger millet straw as a roughage component in complete feed block up to 40 per cent for feeding sheep under intensive production system.

Title: Study on development and effectiveness of mobile application on fodder production in Karnataka

- a. Repository of information regarding 16 fodders suitable to Karnataka was prepared.
- b. Fodder App was developed in android platform with audio – visual support.
- c. Majority (76.66 per cent) of the respondents of study area had perceived the mobile app favourably.
- d. Study showed that the fodder app was effective in improving farmers knowledge on fodder production with knowledge gain of Mysuru division (45per cent), Bengaluru division (42.90per cent), Belagavi division (39.43per cent) and Kalaburgi division (37.50per cent)
- e. Study concluded that fodder app could effectively used as ICT enabled tool for information dissemination for farmers.

Title: Evaluation of Spore forming bacterial probiotic on Growth performance, immunity and gut health in broilers

Progress made: Supplementation of the Spore forming bacterial probiotic to broilers

- Improved body weight, reduced feed intake and FCR.
- Litter moisture was lower in all probiotic supplemented groups
- Gut pathogen load enumeration revealed lowest *E.Coli* counts bacterial probiotic supplemented group than Clostat.
- Salmonella and Clostridium counts were also lower than control in all probiotic groups.
- Highest antibody titres against NDV and IBDV recorded in bacterial probiotic 200 g/ton supplemented grouped coupled with higher spleen weights suggest that bacterial probiotic was much better in improving immune response than Clostat.
- Bacterial probiotic supplementation through water was better than through feed.

Title: Flash based innovative technique as an aid in teaching Veterinary Anatomy

3-D animation video graph of the fore limb of buffalo calf with details of blood supply and orientation of the muscles running on the bones of fore limb has been completed the nerve supply to the same component is under progress. In addition to that the video graph of the original fore limb dissection along with audition was also made. Description of the individual muscles and their blood supply was also highlighted in the animated E-Module. Lastly a quiz pertaining to the limb was also added in the text for the assessment of the student's efficiency. Further modules are in progress.

Title: Morphological studies on fore and hind limb bones of Sloth Bear (*Melursus ursinus*)

Processing of fore limb bones completed by end of March, 2016. The collection and processing of hind limb bones of the bears completed by March, 2017. The main findings of this work add knowledge on detailed structural morphology of fore and hind limb bones of sloth bear in particular and wild carnivores in general. The work also demonstrated the comparative structures of bones to that of domestic carnivores.

Title: Studies on prevalence of food borne Trichinellosis in pigs and its impact on public health

1. Of the total 50 porcine samples (tongue and diaphragm) examined, all the samples screened were found negative for the *Trichinella spiralis*.
2. Trichinellosis is an established parasitic zoonosis known since ancient times. Awareness was created on Zoonotic Trichinellosis, hygienic production and proper cooking methods, during training programmes conducted for Farmers, Butchers, Animal attendants and public by the Dept. of Veterinary Public Health and Epidemiology, Veterinary College, Bengaluru on 13 -03-2017 and 20-04-2017.
3. Although studies carried out elsewhere in the world revealed less than 1 per cent prevalence in domestic pigs yet keeping Indian subcontinent in view elaborate studies comprising large sample size from different parts of the state are required so as to establish the prevalence status at State level.
4. Zootoic Trichinellosis remain largely un-recognized in India. The paucity of information on epidemiology with respect to reservoirs, lack of strict meat inspection practices and inadequate cooking of meat are few among the several factors contributing to the incidence of trichinellosis.

Keeping in view, the economic, zoonotic and food safety aspects of trichinellosis, good farm practices, strict post-mortem inspection of pork and game meat, avoidance of consumption of raw or semi-cooked pork, thorough cooking of meat, effective freezing of pork (-15°C for not less than 3 weeks) and public awareness programs are recommended.

Title: Study on occurrence of gastrointestinal parasites in cats

1. Occurrence of helminthic infestation is more in kittens than adults.
2. No age, breed predilection was observed with respect to occurrence of helminthic infestation in cats

Title: Augmentation of reproductive efficiency in sheep through estrus synchronization and AI

1. Establishment of Nari Suvarna sheep flock

Initially 40 Nari Suvarna ewes and 10 rams which had an 40-50 per cent twin bearing capacity was procured from NARI, Phalton, Maharashtra. The sheep maintained in the flock was used for the evolving a suitable estrus synchronization procedures and standardizing the technology of artificial insemination. The reproductive performance of Nari Suvarna sheep was also assessed both under free grazing system and following supplementation of concentrates. Further, the various reproductive efficiency parameters in this breed were also established for the benefit of farmers.

2. Evolving of a suitable and practical method of estrus synchronization in sheep.

This component of the project was aimed at evolving an estrus synchronization protocol which is cheap, efficient and at the same time easy to follow. It was found that the vaginal sponges fabricated Avikanagar was ten times cheaper and fairly efficient than the intra vaginal releasing

device supply by Virbac. it was also found that the reproductive performance of Nari Suvarna ewes under natural grazing condition without supplementation of concentrate was extremely poor characterized by poor response through estrus synchronization protocol, extremely poor consumption rate, low birth weight of lambs and agalactia in mothers in contrast animals maintained under concentrate feeding showed good response to estrus synchronization protocol. it was also found that the response was better in autumn and winter.

3. Estrus symptoms and duration of estrus

An adult ram was vasectomized for the purpose of estrus detection in addition a criorchid ram born during the course of project was used for estrus detection. During training programme the farmers were shown various signs of estrus exhibited by the ewe after estrus synchronization and made to aware of the importance of estrus detection and the timing formatting.

4. Standardization of semen collection procedures.

The rams maintained in the flock was trained for responding to semen collection procedures using artificial vagina. For this purpose, cones AV and collection tubes were procured from Phalton. The volume, the semen concentration and the characteristics' of the semen of the Nari Suvarna rams was established. Further, the ideal frequency for semen collection was also established. In addition, semen was also diluted with suitable dilutor and the duration for which it can be used was established.

5. Artificial Insemination procedure

The estrus synchronized ewes was inseminated intra vaginally with either fresh or chilled semen or the response studied. Further, since, in future artificial insemination in sheep may be carried out by laparoscopic procedures, an attempt was also been made to standardize the laparoscopic insemination in sheep

6. Training programmes for veterinarians

Hands on training programme were arranged for the veterinary officers of the Dept of AH and VS, Govt. of Karnataka. During this training programme, the veterinarians were practically exposed to the art of estrus detection, estrus synchronization protocol, semen collection technology, semen evaluation and processing and artificial insemination. As far as possible the vets were encouraged to perform this procedure themselves on the flock maintained in the department. Further, the technology of AI and ultrasound diagnosis of pregnancy was also demonstrated. a total of 88 veterinarians deputed for this purpose were given training in the batches 20-22.

7. Training programme for the farmers.

The training programme was not only aimed to popularize Nari Suvarna ewes among farmers but also expose the farmers to the technology of AI, feeding and management of sheep in general and various aspects of health and diseases in sheep including the importance of vaccination, deworming and feeding. a total of 468 farmers were given training during the training programmes in batches of 22-25. They were also given a booklet prepared on sheep Husbandry and reproductive managements

8. Distribution of Nari Suvarna ewes and rams to farmers

At the end of the project, the sheep and ram maintained was distributed to the farmers of Kolar and Tumkur districts. The beneficiaries were identified by the sheep board or Dept of AH and VS and at the time of distribution, the farmers were again given the knowledge of marinating the sheep for health.

Final outcome

1. The project was a small step to introduce the technology of AI to both Veterinarians and sheep farmers as AI in sheep is nonexistent in the state of Karnataka and is likely to be a major technology of breeding sheep in future. In this direction during the training programme it was observed that the veterinarians of the Dept. of AH and VS were not aware of the estrus synchronization protocol, technology of semen collection and AI and training of these officers as done during the project would definitely help the farmers as the AI in sheep and goats is being introducing in the state of Karnataka by establishing small ruminant semen station.
2. In the project a cheap and reliable estrus synchronization protocol was developed and can be easily adopted in the field both by farmers and veterinarians.
3. The framers were encouraged to maintain Nari Suwarna ewes and rams as it had a fairly high chance of twining at the same time, the importance of concentrate feeding was stressed upon.
4. A disadvantage observed in the project was that Nari Suwarna ewes have poor mothering instinct and need to be bottle fed.

Title: Studies on laparoscopic diagnosis of intra-abdominal disorders

Project 1: Laparoscopy proved to be an ideal diagnostic procedure replacing extensive exploratory laparotomy procedure in arriving for conclusions and sample collection, as it is minimally invasive, rapid healing and shorter hospitalization.

Project 2: The project is completed and detailed report has been submitted to Director of Research KVAFSU- Bidar and ICAR New Delhi.

VETERINARY COLLEGE, BIDAR

Title: Safety studies of nitenpyram in rabbits

Limit test carried out in rabbits. LD₅₀ study was done, Nitenpyram administered at the dose rate of 2000mg/kg body wt orally, but no toxicity symptoms/adverse effects were observed, except mild diarrhoea. Therefore the drug is safe in rabbits and used for treatment of ectoparasites infestation. Blood samples were collected and subjected to biochemical and hematology parameters estimation. All the experimental rabbits (n=24) were administered with Nitenpyarm at the dose rate of 10mg/kg body wt orally, single dose for ectoparasite infestation (specifically mite infestation). Blood samples were collected for further analysis and all the parameters were within the normal range.

Title: Efficacy evaluation of poultry feed emulsifier on performance, nutrient metabolism, serum lipid profiles and carcass traits in broiler chicken

Poultry feed emulsifier showed increased broiler performance and carcass traits in chicken.

Title: Efficacy evaluation of herbal growth promoters in improving growth, performance, meat quality attributes and immune response in broilers

Herbal growth promoter showed enhanced performance and meat quality traits in chicken.

Title: Pharmacological evaluation and comparative study of herbal methionine on heat stress and performance in broiler chickens

The herbal methionine had moderate effect in improving heat stress and performance in broilers

Title: Pharmacological evaluation and comparative study of polyherbal antistress compounds on heat stress and immunity profiles in broiler chickens

The polyherbal antistress compound had moderate effect in improving heat stress and immunity profile in broiler

Title: Developing interlocking intramedullary nails and evaluating the nails for tibial fracture in large ruminants

- a. The IILN technique has been standardized in large animals for repair of tibia bone fracture
- b. The results of the techniques are favourable. The different sized animals are operated successfully for tibia bone fractures in large animals.
- c. The IILN is providing immediate post-operative weight bearing in large animals.
- d. The IILN is cost effective and affordable technique to farmers.

Title: Application of SOP plate for treatment of long bone fractures in dogs

Humerus, femur, tibia and radius bone fractures in dogs were successfully repaired using SOP plate.

The SOP technique provided buttress plating in canine long bones

Weight bearing and ambulation were noticed within one day

Compared to other plating techniques the complications were minimal

Title: Repair and reconstruction of surgical conditions of the udder and teat

The different diagnostic methods like palpation, probing, radiography and ultrasonography helped in early and accurate diagnosis of the conditions of the udder and teat.

The retrospective data of cases presented from last 11 years (2004-2016) were analyzed. Total surgical affections were – 15,752 out of that, affections of udder and teat were -78 (Cow – 34, Buffaloe – 31and Goat – 13). Prevalence per centage was- 0.49per cent.

Teat fistula, teat obstructions and teat wounds had more incidences in all animals.

In goats teat fistula was more common condition.

In cows teat obstruction was more common, followed by teat fistula

In buffaloes thelitis, fistula and obstructions were common

Thelectomy, mastectomy, reconstructive repair of teat fistula were effective salvage techniques. The hand milking by farmers, suckling by calves and auto mutilations of wounds has to be avoided in post-operative period. Strict adhering to the asepsis, gentle handling of the tissue during surgery, selection of suture materials and suture pattern, prompt postoperative management and maintenance of hygiene of the udder and teat were effective in controlling the infections and getting recovery from the udder and teat conditions.

Title: Evolving new Kenguri strain of sheep with high prolificacy for sustainable sheep production in Northern Karnataka

In first trial, a group of 20 Kenguri ewes were inseminated with NARI Frozen thawed semen. The lambing rate by inseminating the Kenguri ewes with frozen thawed semen was lowest (10 per cent) in trans-cervical method. None of the Kenguri ewe showed any disease or accident during gestation and lambing after using NARI Suwarna frozen thawed semen. The sex of both the lambs was female with body weight (Kg) ranging from 2.35 to 2.60 with gestation period (days) range of 147 to 151. A new Kenguri strain-1 of sheep (Kenguri > 50per cent + Deccani < 40per cent + Garole < 10per cent) can be produced using frozen thawed semen of NARI Suwarna strain from Kenguri breed.

In second trial, 30 Kenguri ewes were inseminated with fresh NARI Suwarna semen during oestrus period and a total of 26 Kenguri ewes lambed (86.66per cent) with 16 female and 11males and 1 ewe recorded stillbirth. Out of 26 Kenguri ewes 1 reported twinning.

In third trial, a total of 49 Kenguri ewes were inseminated with fresh NARI Suwarna semen during oestrus period and a total of 17 Kenguri ewes lambed (34.69per cent) with 10 female and 7 males. Out of 17 Kenguri ewes 1 reported twinning.

In third trial, a total of 20 + 3 Kenguri ewes were inseminated with fresh NARI Suwarna semen during oestrus period and a total of 14 Kenguri ewes lambed (70.00per cent) with 9 female and 5 males and 3 ewes are waiting for lambing.

A new Kenguri strain-1 of sheep (Kenguri > 50per cent + Deccani < 40per cent + Garole < 10per cent) was produced using fresh / frozen semen of NARI Suwarna strain in Kenguri breed.

Title: A comprehensive novel approach of synchronization of estrus in postpartum native sheep during non-breeding season

In this study, 80 post-partum anoestrus sheep were randomly divided into eight groups and were subject to different treatments of Progesterone injection by IM, SC, Intra Vulvo-vaginal mucosa with or without concentrate feeding for 15 days. A feed control group without progesterone injection and a control group without treatment and concentrate feeding was kept.

Results of the clinical trial in Native sheep.

Group	Heat observed within days after treatment							
	25-50	per cent	50-75	per cent	75-100	per cent	No heat	per cent
IMFP4 (n=10)	3	30.00	3	30.00	2	20.00	2	20.00
SCFP4 (n=10)	4	40.00	-	0.00	4	40.00	2	20.00
VMFP4 (n=10)	2	20.00	2	20.00	2	20.00	4	40.00
IMP4 (n=10)	1	10.00	0	0.00	0	0.00	9	90.00
SCP4 (n=10)	0	0.00	0	0.00	0	0.00	10	100.00
VMP4 (n=10)	0	0.00	0	0.00	0	0.00	10	100.00
FC (n=10)	0	0.00	2	20.00	3	30.00	5	50.00
C (n=10)	0	0.00	0	0.00	0	0.00	10	100.00

From the results obtained, it can be concluded that, feed supplementation along with progesterone injection followed by PGF2 Alfa injection 7 days later, can shorten the post-partum anoestrus phase compared to feed alone or control group animals.

Hence, concentrate feeding along with progesterone injection followed by PGF2 Alfa injection 7 days later can be recommended to shorten the post-partum anoestrus in native sheep.

Title: Polymerase Chain Reaction based diagnosis of Theileriosis in cattle

Analysis of two years of retrospective data from January, 2015 to December 2016 revealed a overall prevalence of bovine theileriosis as 6.33 per cent

The prevalence was significantly higher in crossbred animals (81.63per cent) compared to non-descript animals (18.37per cent)

Prospective study with PCR revealed a prevalence of 31.00 per cent.

Occurrence of bovine theileriosis was with *T. annulata* (40.32 per cent), *T. orientalis* (11.29 per cent) and Mixed infection (48.39 per cent)

Sensitivity and specificity of blood smear examination in detection of theileriosis with PCR as standard diagnostic test was 74.19 per cent and 100 per cent respectively.

Title: Optimizing the process for preparation of chicken pop corns

Preliminary trial was done to standardize process for chicken pop corn preparation with optimum sensory acceptance.

Increased per cent frying yield and cooking yield with less batter pick up was observed with replacement of rice flour for corn flour in batter mix.

Sensory evaluation showed no change in acceptance of products prepared by replacing corn flour with rice/ragi flour

Title: Efficiency evaluation of some herbal products on growth and immunity parameters in Broilers

Herbal products improved the overall performance, growth and economy and boosted humoral Immunity.

Enhanced dressing per centage and carcass quality

Improved the economic returns

Title: Evaluation of feeding value of Sugarcane trash as a component of the diet in Nariswarna x Kenguri strain-1 sheep

The plane sugar cane trash is equal to any of the crop residues in nutritional composition.

The intake of all the nutrients (except NDF and ADF), digestibility of nutrients progressively increased significantly as the proportion of CFM increased in the diet from 60:40 onwards

Inclusion of sugar cane trash in the complete diet < 60 per cent level in sheep diet was found be beneficial

Title: Genotyping of Kenguri and NARI-Suwarna strain (Deccani X Garole) for *Fec-B* gene

Genomic DNA (gDNA) was isolated from blood samples of F₂ generation of Kenguri and NARI Suwarna strain of sheep and it was subjected for routine analysis for quality, purity and quantity. Good quality gDNA was considered for downstream application.

Polymerase chain reaction (PCR) was standardized for reaction components and for thermal profile. Reaction components and thermal profile that yielded specific amplification were utilised for the study.

PCR products were subjected for restriction enzyme digestion using *AvaII*.

Genotype and gene frequencies were estimated. In F₂, only Heterozygotes were detected

All F₂ did not resemble Kenguri sheep
Twinning was noticed in one sheep

VETERINARY COLLEGE, SHIVAMOGGA

Title: Studies on antimicrobial properties of cationic molecules against drug resistant pathogens of veterinary significance

1. The PHMB [Poly (HexaMethylene Biguanide) hydrochloride], a member of the biguanides group of antiseptics was found to exert synergistic effect with ampicillin.
2. Ampicillin resistant MRSA (methicillin resistant *Staphylococcus aureus*) when tested with the combination of PHMB+Ampicillin, the drug combination inhibited the growth of MRSA.

Title: Gross anatomy of bones of Mudhol hound dog

Studied gross morphology of all appendicular and axial skeletal bones
Studied the biometric parameters of appendicular skeletal bones (long bones)
Studied the biometric parameters of skull
Prepared a skeleton of Mudhol hound dog for museum.
Studied Parameters like volume, density, weight and corticomedullary index of long bones of Mudhol hound dog.

To conclude, gross structural and morphological details of the breed will help to understand its behavior and physiological activity. This study helps in the identification and characterization of Mudhol hound dog breed.

Title: Feeding value of De-corticated Cotton seed Meal (DCSM) in commercial layers

DCSM can be replaced with SBM up to 50-60 per cent without any adverse effect in laying hens.
Egg production was improved by incorporating DCSM upto 10 per cent in diet.
DCSM can be used up to 10 per cent as a regular protein source in commercial layer diets.

Title: Investigation of disorders of thoraco-abdominal region based on Ultrasonography findings and ultrasound guided sample collection in cattle

Totally 46 clinical cases of bovines brought to Teaching Veterinary Clinical Complex with clinical sings of either or both cardiopulmonary and Digestive system malfunction were subjected to ultrasonography examination for disease investigation. Normal and abnormal conditions of various visceral organs were studied in all animals. Out of 46 animals, 15-Jersy crossbred, 18-Holstein Friesian crossbred, 2-Hallikar, 1-Sindhi cross and 10-Non-Descript. Thirty-nine were female and seven were male. Age ranged from 3 days to 15 years, however, abnormal findings were more

common in animals aged between 2 years to 6 years. Out of 46 animals, abnormalities by ultrasonography were noted in 42 animals and rest four animals showed near to normal findings.

Ultrasonography helped in visualization of following abnormal findings:

Thoracic region: Abnormal cardiac structure and function (6), Pericardial effusions(5), pleural effusions(2), protrusion of abdominal organs in thoracic region(3).

Abdominal region: Peritoneal effusions(5), Ruminal distension(14), decreased ruminal and reticular contractions(7), Small intestinal distension(8), Large intestinal distension(1), colo-urethral fistula(1), Enlarged liver(2), Enlarged hepatic vessels(1), Distended gall bladder(23), Enlarged spleen(1), protrusion of intestine(3) into subcutaneous region and differentiation of hernia from abscess.

Ultrasound acoustic window for anatomical location, displacement and for ultrasound sample collection was studied in detail and recorded. Fine needle aspiration was found to be most suitable in bovine using 20G or 18G needle of 1½ inch to 4inch needle for routine sample analysis by microbiological and/or cytological investigation. Out of 46 animals ultrasound guided sample collection was done in 18 animals for collection of pleural, pericardial and peritoneal effusions. Lab investigations revealed 12 samples with bacterial infection with inflammatory cells and rest four samples non inflammatory.

Ultrasongraphy of thoracic and abdominal region in bovine greatly helps in disease investigation. Sample collection can be undertaken more frequently due to visualization of most suitable approach, site, depth and any post sample collection complications. FNA sample was sufficient for lab investigation for preliminary diagnosis and treatment purpose.

Title: Studies on Bacterial and Parasitic Enteritis in Small Ruminants in and around Shivamogga

A Study was conducted from May-2015 to December-2016 to know the incidence of Bacterial and Parasitic Enteritis in Small Ruminants in and around Shivamogga. A total of 276 faecal sample were collected from Sheep and Goats having diarrhoea presented to Veterinary College Hospital, Ambulatory adapted villages (Tyajavalli, Sugur) and adjacent villages around Shivamogga (Sominakoppa, Gejjenahalli, Kotegongur). Bacterial culture and identification was done by standard protocol. Parasitic investigation was carried out by both direct method and sedimentation method as per standard procedure. Among 276 samples, 222 samples were found positive for Bacterial and Parasitic infections. Out of 222 positive, 183 (82.5per cent) were positive for Parasitic infections and 39 (17.5per cent) for Bacterial infections.

In the present study, both single and mixed parasitic infections were observed, with highest prevalence was seen with *Strongyle* spp. (33.5 per cent) followed by *Strongyle* spp. and *Trichuris* spp. (14 per cent), *Emeria* spp.(12 per cent), *Strongyle* spp. and *Amphistome* (12 per cent), *Strongyle* spp. *Emeria* spp.,*Trichuris* spp. and *Amphistomes* (9 per cent), *Strongyle* spp. and *Emeria* spp. (8.5per cent), *Fasciola* spp. (7 per cent), *Strongyles* and *Moniezia* spp. (4 per cent). Bacterial isolates were both pure cultures and mixed cultures with major isolate was *E. coli* (45per cent), followed by *E.coli* and *Bacillus subtilis* (15 per cent), *Salmonella* spp. (10 per cent), *Klebsiella* spp. and *Pseudomonas* spp. (10 per cent), *Klebsiella* spp. (5 per cent), *Pseudomonas* spp. (5per cent), *Enterobacter* spp. (5 per cent) and *Salmonella* spp. and *Pseudomonas* spp. (5 per cent).

Enrofloxacin (ES), Ceftriaxone (CRO), Amoxicillin/clavulanic acid (AMC), Sulphamethaxazole + trimethoprim (COT) and Metronidazole (MTZ) antibiotics were used for assessing the sensitivity pattern of the isolated bacteria. Majority of the bacterial isolates showed highest sensitivity to Sulphamethaxazole + trimethoprim.

Haematological investigation revealed decreased haemoglobin, PCV, TEC and increased TLC and Neutrophils levels in bacterial infection, whereas decreased haemoglobin, PCV, TEC and increased eosinophils in parasitic infection. Improvement was seen in the haematological parameters after the treatment.

The animals positive for parasitic infection treated with different anthelmintic drugs viz., albendazole, fenbendazole, oxyclosanide and ivermectin, whereas animals positive for bacterial infection were treated with various antibiotics namely enrofloxacin, ceftriaxone, amoxicillin/clavulanic acid, sulphamethaxazole + trimethoprim and metronidazole. Along with antibiotic and anthelmintic therapy, supportive therapy was also given viz Fluids (RL, DNS), Hematonics (Ferritas) and B-complex liver extract injections (Belamyl).

Conclusion:

Enteritis was more commonly seen in sheep compare to goats.

Enteritis due to parasitic infection was more common compare to bacterial infection.

Both pure and mixed cultures of Bacteria were obtained.

Escherichia coli was the major isolate among bacteria.

Many cases shown mixed parasitic infections rather than single infection.

Among parasitic infection strongylosis was more common.

Animal treated with Sulphamethoxazole+Trimethoprim (Oriprim) showed faster and complete recovery.

Further study required, to identify the viral causes and concurrent infections of bacteria and parasite for enteritis in small ruminants.

VETERINARY COLLEGE, HASSAN

Title: A field trial on effect of supplementation of value added feed blocks on the growth of goat kids

The average daily gain in goats maintained 2 per cent urea supplemented diet (79.93g) and 2 per cent urea with herbal anthelmintic supplemented diet (48.37g) was significantly higher than the control (22.35g). The helminth count significantly ($p<0.05$) decreased in both treatment groups compared to control suggesting that inclusion of dried guava leaves as a source of condensed tannins in the diet has effective anthelmintic property. The use of feed blocks with or without guava leaves was also found to be economical.

Title: Utilization of maize cob shank and sheath as a source of fodder for dairy animals

The chemical composition of maize cob by-products viz., maize cob shank and sheath is similar to that of finger millet straw, a conventional dry fodder source. However, fortification of both the by-products with non-protein nitrogen sources (urea) and mineral mixture was essential to improve the feeding value for livestock. The processing approach such as grinding using shredder machine was advantageous to improve palatability and intake of maize cob by-products.

The technology of total mixed ration (TMR) could be effectively utilized for efficient use of maize cob shank and husk for dairy animal feeding to sustain milk production. Feeding maize cob shank and husk based compressed feed block is economical in high yielding animal.

Title: A study on pathogenesis of epitheliogenesis imperfecta - an inherited disorder of piglets

The research work was carried out in Veterinary College, Hassan from April 2016 to March 2017.

Epitheliogenesis imperfecta is a disease condition where animals will be born devoid of an area of skin, reported to occur in several animal species and its inheritance is suspected to have autosomal recessive component.

In the present study there were two cases of Epitheliogenesis imperfecta (one in ILFC, HVC, Hassan and another one in Agasarahatti, Alur Taluk, Hassan District) in piglets.

Incidence: Among 10 piglets (Male: 6; Female: 4) born with epitheliogenesis imperfecta in ILFC farm only 4 survived (Male: 3; Female: 1) and among 8 piglets (Male: 4; Female: 4) born with epitheliogenesis imperfecta in Agasarahatti farm none survived.

The affected piglets showed multiple areas of skin lesions more concentrated in legs and face with devoid of epidermis, part of the dermis and adnexae. Necropsy of dead animals revealed along with the skin lesions purulent arthritis of hock joints, pneumonia and enteritis.

Histopathological examination of the skin revealed patchy loss of epidermis, presence of bacterial colonies, increased hair follicles and connective tissue in the dermis. No abnormalities detected in other organs.

Summary: The survival of few piglets in ILFC, farm, was due to timely diagnosis and early treatment with streptopenicillin injection, along with skin lesion dressing with cipladine and cotton gauge. However, in Agasarahatti Farm presentation was late and could not save any.

Cause of mortality was mainly attributable to secondary infection leading to arthritis, diarrhea and pneumonia. As skin is one of the major innate barriers, they might have picked up the infection by breach in the skin, which led to pneumonia, arthritis and enteritis. This implied the piglets suffering from EI were vulnerable to infections through discontinuous skin.

Further genetic study is required to confirm the autosomal recessive inheritance.

Title: A study on prevalence of Mycotoxicosis in broilers in and around Hassan by Toxicopathological investigation

The research work was carried out in Veterinary College, Hassan from April 2016 to March, 2017 with the objective of elucidating the prevalence of Mycotoxicosis in Hassan District and characterizing the gross and microscopic pathology of various manifestations.

Mycotoxicosis can affect poultry in many ways, ranging from immuno suppression leading to decreased vaccine efficacy, fatty liver, buccal, comb and wattle necrosis. Other effects include increased intestinal disruption due to physical damage to the intestinal epithelium, poor feather production and uneven growth.

A total of 274 poultry cases were necropsied during the study period, out of which 83 cases showing fatty livers were suspected for Mycotoxicosis.

The prominent gross lesions observed were varying degrees of yellow discolouration, multifocal haemorrhage and necrotic white foci on surface of the liver. Other gross lesions observed were swollen kidneys, enteritis, oedema and haemorrhages.

Histo-pathological examination of liver revealed hemorrhages and congestion of various degrees, vacuolar and fatty degeneration, separation of hepatic cords, necrosis of hepatocytes, bile duct proliferation and fibrosis. Kidney showed hemorrhages and congestion of various degrees, vacuolar and fatty degeneration, tubular degeneration with desquamation. Intestine revealed catarrhal inflammation with hemorrhages and verminous enteritis in few cases. Heart showed disruption of myocardial fibres with haemorrhages. Depletion of cells in the lymphoid organs.

Summary: Based on the gross and microscopic findings the suspected fatty liver cases could be due to mycotoxicosis, although other causes for fatty livers like high energy diets, genetic predisposition, deficiency of lipotropic factors and other factors cannot be neglected. Further toxicological investigation by isolation, identification and quantification of the toxin from feed ingredients is needed to elucidate the prevalence.

Title: Efficacy of Flaxseed as natural antioxidants for the development of functional food in emulsion based meat products

The meat and meat products play an important role in providing the protein source to humans and they are known for high digestibility and bio-availability. In view of the increasing consumer awareness about quality and health benefits of diets, the present study was designed to improve the nutritional quality of chicken nuggets as functional food using flaxseed flour. The study group consisted of control and treatment groups: T-1, T-2, and T-3 containing 1, 2 and 3 per cent flaxseed respectively. The increase in flaxseed flour content in nuggets significantly ($p<0.05$) increased the moisture, fat, fibre and ash content while protein level was found to be slightly reduced. The pH values were significantly lower in treatment groups ($p<0.05$) and cooking yield and emulsion stability was higher with treatment groups ($p<0.05$). Upon fatty acid profiling, considerable increase in the linolenic acid and PUFA such as eicosapentaenoic acid and docosahexaenoic acid content in treatment groups was recorded as compared to the control group. The TBARS values were also significantly higher in treatment groups ($p<0.05$). The ultrastructural studies revealed that treatment group showed increased fat globule size with more compulsion and emulsion stability. Sensory evaluation at various stages of the experiment revealed significantly

higher sensory attributes ($p<0.05$) in the treatment groups. The addition of flaxseed also decreased the total viable count and psychrophilic count significantly ($p<0.01$), yeast and mould count was negligible and no coliforms were isolated during the study. The study elucidated the increased nutritional value of chicken nuggets (fibre, PUFA) with more emulsion stability, antioxidant activity, decreased microbial count and good sensory acceptability with incorporation of flaxseed.

Title: Studies on etiological aspect and surgical management of hoof lesions in dairy cattle in and around Hassan District

Seventy cases of hoof lesions in dairy cattle of Malnad areas of Hassan district were analyzed during the study. Heel lesions were more predominant in these areas (35) followed by interdigital lesions (20) and toe lesions (5). Hoof lesions were more common in well fed cattle particularly after first calving. The breed-wise incidence of hoof lesions revealed that the lesions were more common in Holstein Friesian crossbred cattle (43) followed by Jersey cross bred (18) and other breeds (9). The hoof affections were more predominant in cattle aged >5 years (36 cases) and 2 to 5 year cattle (29 cases). Among the various predisposing causes, slippery floors bad hoof management at calving, bad conformation of the hooves, excess moisture in the cattle sheds and hilly terrains of malnad region were more common. Long hooved animals were more susceptible for hoof affections. Sole lesions were appeared to be more critical compared to other cases. In most instances the heel lesions were identified as early phase of hoof affections. Whiteline disease was less common (3) but appeared to be grave compared to other lesions. Pigeon toe was observed in less exercised and confirmed animals. Various lines of treat were tried including the surgical corrections. Contra-lateral shoeing in heel affections and X-B-K (Xylazine-Butrophanol-Ketamine) standing stun were effectively tried in most cases.

COLLEGE OF FISHERIES, MANGALURU

Title: Defense genes of tiger shrimp (*Penaeus monodon*) with respect to bacteria (*Vibrio harveyi*) and white spot virus (WSSV) infection

The core objective of the project was to study the expression levels of few potent defense genes in various tissues (hemocytes, lymphoid organ, gills etc.) of the tiger shrimp *Penaeus monodon* at different time points with respect to bacterial (*Vibrio harveyi*), viral (WSSV) and a combination of both *Vibrio harveyi* and WSSV infections. When fed with immunostimulants and subsequently challenged with *V. harveyi* and WSSV by real time PCR. Identification of novel defense genes that elicit an immunological reaction and help in the survival of shrimp when challenged with the bacterial and viral pathogens and to clone the novel genes identified, express them using a prokaryotic expression system, characterize the purified protein and study its antimicrobial activity against various shrimp pathogens.

The results showed that in healthy shrimp the genes Akirin, β -actin, Thrombospondine, toll like receptor, heat shock proteins, ELF1 α are normally expressed in all tissues tested. These immune genes were observed to be expressed within 12h of bacterial and within 12-24h of WSSV infection. Akirin, a novel gene reported for the first time in *P. monodon* was seen to be upregulated in immune modulated animals after 48hr post *V. harveyi* infection with a maximum gene expression of about 30 fold in gill tissue. HSP70 and HSP90 showed down regulation in immune stimulated animals post infection. Thrombospondine in gill was up regulated about 120 fold till 24 h post infection in β -glucan fed animals.

The other potent defense genes expressed were phosphatase-like protein, Crustin, death associated protein, eukaryotic initiation factor 5A (eIF5A), cyclophilin A and ribosomal protein 8 (L8). Recombinant crustin and phosphatase-like protein from *P. monodon* exhibited broad range antibacterial activity against shrimp pathogenic *V. harveyi*. Low MIC of recombinant crustin and phosphatase was encountered indicating the bactericidal activity of these peptides even at low concentrations. Study indicates that recombinant crustin and PLP from *P. monodon* could be used as a therapeutic agent for controlling bacterial diseases of shrimp including vibriosis in aquaculture practice. The following defense genes have been sequenced and deposited in GenBank: Phosphatase-like protein (KC561136), CyclophilinA (KF214635), Death associated protein-like (KF214636) and Akirin (KT357016).

Title: Capture and removal of ammonia from fish processing waste using Archaea

The present research is an attempt at isolation and characterization of efficient ammonia oxidizing microbes (AOM) in fish processing effluent treatment plants (FPETPs).

The ammonia-oxidizing bacteria (AOB) that are potentially able to reduce ammonia were successfully isolated and characterized from waste water treatment plants located in and around Mangaluru. Isolated AOB were identified as *Nitrosomonas europaea* on the basis of 16S rRNA gene sequencing and the sequences were submitted to GenBank. AOB isolates showed efficient reduction of ammonia in *in-vitro* study at different time point. Furthermore the potential of AOB isolates in removal of ammonia in sewage water sample was studied.

The isolates were studied for the influence of pH, temperature, salinity and ammonia on their *amoA* gene expression and nitrification activity. Freshwater medium with pH 8 at temperature $30\pm1^{\circ}\text{C}$ was most effective in ammonia removal. A biofilter was fabricated for *in-situ* application studies and the efficacy of the isolates. The native AOB cultures of FPETPs obtained in the present study showed promise as a biotechnological tool for removal of ammonia from FPETPs and aquaculture ponds where ammonia levels are a concern in the effluent.

Title: Community dependence on coastal ecologically sensitive areas (ESAs) in Kundapur Karnataka

The Coastal Zone Regulation Notification 2011 has notified and proposed demarcation of Ecologically Sensitive areas (ESAs) and Critically Vulnerable Areas (CVCAs)(Part V Special Areas) *Para 7(v)*, Class B of the CRZ Notification 2011. CVCA are resource areas within Coastal Regulation Zone (CRZ) that are “ecologically important areas” and that are to be “managed with the involvement of the local coastal communities including the fisher folk.” The CVCAs are also referred to the *area requiring special consideration for the purpose of protecting the critical coastal environment and difficulties faced by local communities*. CRZ 2011 has notified two resource areas of Karwar and Kundapur in Karnataka as CVCA among the 12 such areas in 9 coastal states of India. The objectives of the study were to assess the extent of community dependence on the ESA ecosystems resources and the ability to govern through collective household survey.

Based on a comprehensive survey of 1600 households in 20 panchayat area of Kundapur region and population census data 2011, developed index of the extent of community dependence on the coastal resources to gauge the perception of the community on the need and strategies for conservation. The study compiled the coastal resource dependency in the region through review of secondary data. Conducted focused group discussions in order to validate the primary data by involving the community representatives from the study area. Socio-Economic Index (luxury index, basic needs index and richness index), Resource Utilization Index, high communication and basic mobility index from resource utilization index were estimated. Based on the index five resource areas were identified as CVCAs in Kundapur for demarcation as CVCA.

Title: All India Coordinated Research project on Post-Harvest Technology

Component 1: Technology for the production of silage using seafood industry waste for animal feed

Fish silage using fish processing industry waste was prepared and incorporated at – level in the preparation of poultry feed. The prepared pelleted feed, fed to poultry birds showed the growth and feed conversion efficiency comparable to commercially available poultry feed, with comparatively at low cost. This study showed the possibility of utilization of fish waste for the preparation of poultry feed thereby paving a way for its effective utilization.

Component 2: Development of gender friendly refrigerated fish vending and display unit using solar energy

The fish vending and display unit along with the refrigeration unit based on vapour courresion refrigeration system powered by solar energy was developed by installing solar power. The unit attained a temperature of $3-6^{\circ}\text{C}$ and the stored fresh fish at this temperature could in fresh

condition without spoilage for up to 10 days. This environmental friendly unit is useful in selling fish in fresh condition in any place including remote rural area.

Title: Development of artificial reefs in inshore waters to enhance the marine fish

Artificial reefs made out of cement concrete in the form of tripods and hallow blocks of the dimension 1.5 x 1 x 1 m and catch weighing about 40 kg. About 900sq. meter reef structures was installed at regular interval of about 50 meter distance at 15 meter depth off Uppunda, Udupi Dist. Building of artificial reefs is helpful in congregating fishes for nesting and breeding. As there will be protection from waves and currents, the artificial reefs also serve as nurseries for many marine fishes and invertebrates. A chain of new events such as niche-adoption by the natural stocks for their biological activities, competition for the available (protected) space and food, assembling of school-forming fishes in sizable numbers, relocation of small and medium sized predatory fishes, among others. Protection and development of nursery grounds by installation of such concrete blocks and thereby enhancing of primary production and promoting marine fishery resources along the coast. Fisheries resources availability and the species composition in terms of quantity was carried out before and after erection of artificial reef structures and stock assessment was being carried out throughout the project period. Presently, many local fishermen are fishing in the project area and they are getting good catch.

INSTITUTE OF ANIMAL HEALTH AND VETERINARY BIOLOGICALS, BENGALURU

Title: Comparative genomics of NDV field isolates with vaccine strain

Objectives:

Isolation of Newcastle Disease Virus from field outbreaks.

Molecular studies targeting “F” gene of the vaccine strains and the isolated viruses.

Comparative genomics of isolated viruses with vaccine seed strainDate of commencement.

Isolation of a field strain of NDV.

Comparison of field isolates genome with the vaccine strains.

Characterizations of field isolate which is a prerequisite for considering it as challenge strain.

The isolated and characterised field strain can be handed over to Quality control as challenge strain for carrying out potency test with respect to NDV vaccine.

Further complete genome study of “F” gene of all the vaccine strains and also the field strain will be helpful in developing a recombinant vaccine.

Further filed strains need to be isolated to know the dynamicity of the circulating field strains.

CANINE RESEARCH AND INFORMATION CENTER, TIMMAPUR, BAGALKOT

Title: Phenotypic characterization of both male and female dogs of Mudhol Hound breeds

Mean ± S.E. (cm) of body measurements of adult Mudhol Hound dogs.			
	Morphometric variable	Adult male Mudhol Hound Dog (n= 50)	Adult female Mudhol Hound Dog (n= 50)
01	Body Length	92.90 ± 0.70 **	85.70 ± 0.64 **
02	Head Length	27.13 ± 0.26	25.88 ± 0.20
03	Muzzle Length	15.90 ± 1.04	12.61 ± 0.13
04	Tail Length	57.85 ± 0.81	50.60 ± 0.60
05	Height at withers	76.62 ± 0.49 **	69.56 ± 0.49 **
06	Height at Rump	76.07 ± 0.37	69.80 ± 0.45
07	Chest Girth	72.93 ± 0.67 **	66.56 ± 0.56 **
08	Belly Girth	44.45 ± 0.63	41.70 ± 0.56
09	Ear Length	14.32 ± 0.17	12.87 ± 0.17
10	Ear width	8.88 ± 0.12	8.29 ± 0.12
11	Neck Length	25.47 ± 0.37	23.60 ± 0.32
12	Eye Colour	Brown	Brown
13	Coat Colour	White/ fawn/ brindle/ patchy	White/ fawn/ brindle/ patchy

** Sex had highly significant effect ($P < 0.05$) on body length , chest girth and height at withers.

INSTITUTE OF WILDLIFE VETERINARY RESEARCH, KODAGU

Title: Prevalence of gastro- intestinal parasitic infections in Indian Wild Boars (*Sus scrofa*) in the campus of Institute of Wildlife Veterinary Research, Doddaluvara, Kodagu District

Out of 25 faecal samples examined during period, 20 (80.00 per cent) samples were positive for helminth and coccidian parasites.

Among the different endoparasites found in wild boars, the prevalence of Strongyle sp., Strongyloides sp., and coccidian (*Eimeria* sp.) parasites were found to be 48 per cent, 8 per cent and 8 per cent respectively.

Mixed infection of Coccidia and Strongyle was found in 12 per cent of samples examined, while mixed infection of Strongyle sp. Ascaris sp. And Coccidia was found in 4 per cent of sample examined.

The quantitative assessment using modified McMaster's egg/ oocyst counting technique shown the intensity of Strongyle infection was ranging from 100 to 2100 eggs per gram of faeces. Average number of coccidian oocysts per gram of faeces in two samples that showed heavy infection was 27850.

Title: Prevalence of gastrointestinal parasites of free ranging Indian Hares (*Lepus nigricollis*) in Institute of Wildlife Veterinary Research campus, Doddaluvara of Kodagu District, Karnataka State

Out of 38 faecal samples, a total of 32 (84.21 per cent) samples were found to be positive for gastrointestinal parasites by coprological examination.

Out of 38 faecal samples screened, eggs of Strongyle, Strongyloides and Trichuris sp. were found in 18 (47.37 per cent), 9 (23.68 per cent) and 8 (21.05 per cent) samples respectively, either as individual sp. infection or a part of mixed infections.

Coccidian oocysts were found in 17 out of 38 (44.73 per cent) samples examined.

Quantitative examination for parasitic burden done using modified Mc Master's technique revealed 200 to 1400 eggs of Strongyle sp. per gram and 500 to 1,49,700 Coccidian oocysts per gram of faeces respectively.

The EPG of infection of Trichuris sp. was found to be 1900.

The study indicated the high risk of continuous parasitic burden in free ranging hares.

Title: Survey of gastrointestinal parasites in wild ruminants kept under captivity at certain zoological gardens of Karnataka

Out of 130 freshly voided faecal samples collected from wild ruminants of zoological gardens of Thyavarekoppa (Shivamogga) Gandekatte (Hassan), Adumalleshwara, (Chitradurga), Murughamut (Chitradurga) and Anagodu (Davanagere), 14 (10.76) were positive for parasitic infestations.

Gastrointestinal parasitic infestation was found in 2 out of 5 zoological gardens surveyed.

Among the total of 59 faecal samples of Sambar deer and 54 samples of Spotted deer, 10 (16.95 per cent) and 04 (7.41 per cent) samples were positive for parasitic infestations.

None of the 17 faecal samples from Black buck were positive for parasitic infestation.

In Sambar deer, prevalence of Strongyle sp., Monezia sp. and mixed infestation of Monezia and Strongyle sp. were 13.56 per cent, 1.69 per cent, and 1.69 per cent respectively.

Out of 54 faecal samples of spotted deer screened, prevalence of Strongyle sp., Strongyloides sp., and mixed infection of Strongyle and Strongyloides sp. were found to be 3.70 per cent, 1.85 per cent, and 1.85 per cent respectively.

Title: Prevalence of gastrointestinal parasites of free ranging Indian Pea fowl (*Pavo cristatus*) in the campus of Institute of Wildlife Veterinary Research, Doddaluvara of Kodagu District

Out of 73 fresh faecal samples, a total of 32 (43.84 per cent) samples were found to be positive for gastrointestinal parasites by coprological examination.

Among the positive faecal samples, 29 (90.63 per cent) samples were positive for single genus parasites and 03 (09.37 per cent) samples shown mixed infections of different parasitic genera.

Out of 73 faecal samples screened, Heterakis eggs, Ascarid eggs, Capillarid eggs and were found in 06 (8.22 per cent), 03 (4.11 per cent) and 1 (1.37 per cent) samples respectively, either as individual sp. infection or a part of mixed infections.

Coccidian oocysts were found in 25 out of 73 (30.14 per cent) samples examined.

The Quantitative examination for parasitic burden by using modified Mc Master's technique revealed the range of 30,500 to 89,500 oocysts per gram of faeces in case of coccidian parasite infection.

The number of Capillarid eggs and Heterakis eggs per gram of faeces were found to be 1200 and 100 respectively.

The presence of coccidian oocysts in substantial number of faecal samples of free ranging peafowl indicated the risk of continuous coccidian burden in free ranging Indian pea fowls.

LIVESTOCK RESEARCH AND INFORMATION CENTER (SHEEP), NAGAMANGALA

Title: Prevalence and Pathological studies on Paratuberculosis (Johne's Disease) in Mandya Sheep

In the present study 434 serum samples along with faecal samples were collected for initial screening of Paratuberculosis in Mandya Sheep and 25 samples were positive for JD indicating the prevalence rate around 6 per cent

Various clinical signs in suspected cases were cachexia, anemia, paleness of conjunctival mucous membrane, jawl edema, going down in condition and intermittent diarrhoea.

The hematological parameters (Hb, TEC, TLC, DLC, Platelt Count) were estimated and found that there was decreased level of Total Erythrocyte Count and Hemoglobin concentration significantly. There was altered Neutrophil to Lymphocyte ratio in DLC. TLC level also decreased to some extent and there was no much significant alteration in Platelet Count.

The biochemical parameters (Total Protein, Albumin, Total Bilirubin, Creatinine, Cholesterol, Glucose, ALT, AST, Triglycerides, Calcium, Phosphorous and Magnesium,) in clinical and subclinical JD was estimated and found that there was decreased serum concentrations of calcium, total serum proteins, and serum albumin compared with controls in JD. Glucose, cholesterol, albumin, creatinine decreased significantly in subclinical and clinical cases. Alanine transaminase (ALT), Aspartate aminotransferase (AST) and Total bilirubin increased significantly in clinical cases compared to sub-clinical cases. No significant difference was observed in triglycerides and phosphorous in clinical and sub-clinical cases compared to control sheep.

Grossly lesions recorded were muscular atrophy, thickening and corrugation of intestines especially at ileocaecal junction, chording of mesenteric lymphatics with enlarged and oedematous lymph nodes. Gelatinous fat atrophy was very conspicuous in omental, mesenteric, pericardial and perirenal fat.

Histopathological lesions included microgranulomas (paucibacillary) with few epitheloid cells, while large granulomas (multibacillary) were characterized by extensive infiltration of macrophages and epitheloid cells along with acid fast organisms.

Outcome:

Various diagnostic tests were adopted included Faecal smear exmination after Ziehl Nielson staining, Indirect ELISA, Faecal PCR, Johnin test and found that different diagnostic tests are

helpful in determining different stages of Johne's Disease and thus a definitive strategies need to be made for collecting the samples at different stages of infection.

Title: Evaluation of Prophylactic and Therapeutic Efficacy of Salcochek and Salcochek Pro against *Clostridium perfringens*-induced necrotic enteritis in chickens

Pharmaco-active constituent herbs of AV/ADC/16 alleviated diarrhoea symptoms by adsorption and inactivation of enterotoxins and protecting gastro-intestinal mucosa without any adverse effects and improve overall performance of birds in terms of growth rate and feed efficiency. The new polyherbal antidiarrhoeal formulation can be recommended as a prophylaxis for treatment of bacterial enteritis in poultry.

2) Ongoing Projects

b) Research Highlights

VETERINARY COLLEGE, BENGALURU

Title: Development of new meat type crossbred sheep with exotic Dorper breed

Construction of sheep yard completed and awaiting for handing over from estate branch.

Purchase of two Dorper Rams is completed

Purchased a batch of 20 indigenous sheep and preliminary trials are in progress.

Title: Studies on molecular genetic diversity of reproductive trait gene in indigenous sheep

A comparative study on MTNR1A gene polymorphism between Mandya and NARI Suwarna sheep was carried out.

RsaI- RFLP analysis revealed no differences in polymorphic pattern of the MTNR1A gene between the above mentioned breeds.

Further studies on characterization of polymorphic pattern of DAZL gene in Mandya, Hassan and NARI Suwarna sheep breeds is in progress.

Title: Genetic Characterization of Mudhol breed of Dog using microsatellites

Characterization and analysis for Twenty two microsatellites viz., AHT137, AHTh171, AHTh260, AHTk253, CXX279, FH2054, FH2326, FH2848, INU005, INU030, INU055, PEZ03, REN162C04, REN247M23, REN64E19, INRA21, PEZ11, PEZ12, PEZ17, REN105L0, REN169D, REN169018 have been completed.

Characterization and analysis of additional 5 microsatellite markers is in progress.

Title: Studies on molecular genetic markers for traits of economic importance in crossbred cattle

Procurement of Chemicals and other laboratory supplies is in progress

Title: Studies on genetic polymorphisms of candidate genes for meat quality in Mandya sheep

Chemicals and laboratory consumables have been procured

Research activities initiated

Title: Association study of genetic variants at Single Nucleotide Polymorphism of the MBL 1 gene with mastitis in Holstein Friesian crossbred and Deoni cattle

The research work is approved by SCP and TSP Grants, 2016-17. Chemicals and biological reagents are procured. Work is in progress

Title: Promoting Health, Livelihood and Sustainable Livestock Systems; India Research Initiative on Peri-Urban Human-Animal-Environment Interface

A. Estimate the burden

Estimate the prevalence of *M. bovis* infection among livestock in small holder dairy farms in peri-urban areas.

Describe and quantity antibiotic use and associated levels of milk production, including testing of pooled milk samples for antibiotic residues

B. Describe the problem

Assess the drivers and farm-level risks of Bovine tuberculosis to workers, their families, animals and the larger community.

Identify drivers of antibiotic use at the farm, market and policy levels.

C. Identify policy targets

Inventory policies and farm practices in 3 different dairy producing regions in India.

Evaluate them against International practices to minimize the prevalence of *M. bovis* and antimicrobial use and the spread of resistance.

D. Knowledge-to-action: Develop and implement examples of best practices to demonstrate sustainable and locally relevant alternatives to reduce the risk of *M. bovis* and antibiotic use.

Title: Strengthening of Poultry farm at Poultry science Department, Veterinary College, KVAFSU, Hebbal, Bengaluru for empowerment of rural youth and rural women.

Distribution of 4 week old chicks to the beneficiaries initiated
Separate revolving fund to the project created

Title: Automation of Giriraja breeder house and Establishment of Hatcheries at constituent colleges of the University

Automation work through e-tendering initiated

Title: Performance of Commercial broilers supplemented with Processed Organic waste

In-vivo trial completed. Laboratory analyses and compilation of results is in progress.

Title: Study on the efficacy HimTOX to ameliorate toxic effects of mycotoxin in broilers

Production of Aflatoxin and Ochratoxin is in Progress.

Title: Develop and Evaluate Use of Mobile application for Cattle Farming: A New Generation Technology Transfer for Sustainable Dairy Production

Technical repository of information for cattle farming was completed and Evaluation by subject matter specialists.

Development of Audio Visual Mobile Application on Cattle production and testing its content was completed

Launching of the mobile App and studying its impact is under progress

Title: Dairy farmers Knowledge, Perception and Adaptation Measures towards Climatic Variability – An Exploratory study in Karnataka

Interview schedule construction to assess the Knowledge, Perception and to identify the Adaptation Measures towards Climatic Variability was completed.

Data collection completed

Analysis under progress.

Title: Flash based innovative technique as an aid in teaching Veterinary Anatomy

Two modules have been completed. The animated forelimb bone articulations have been depicted. The orientation of various forelimb muscles have been animated along with blood supply to these muscles. The second module on head region animation depicting the bones, muscles and their blood supply has been completed.

Title: Zero Formalin Technique For of Biological Specimens

The process of procurement of chemicals and other consumables requires for the project is in progress.

Title: Detection of Theileria organisms in ticks infesting sheep by PCR

A total of 128 ticks were collected from sheep infected with theileriosis belonging to Bengaluru urban (34), Chikkaballapura (48), Mandya (29) and Ramanagar (17) districts. The ticks were identified as *Haemaphysalis kutchensis* (54.46per cent), *H. intermedia* (15.62per cent), *H. bispinosa* (7.02per cent), *Rhipicephalus haemaphysaloides* (8.59per cent), *R. sanguineus* (7.81per cent) and *Hyalomma* spp.(6.25per cent) based on morphological characters. The ticks were dissected out and salivary glands were stored at -20°C for further use.

Title: Dynamics of Epidemiological intelligence and risk factor analysis for Surra in Wild and domestic animals

Total of 107, blood sample of cattle, buffalo, sheep and goat from in and around forest area of Londa Kanapur, Sankeshwar and Belgaum. The blood smears of the animals, examined did not

reveal trypanosomes organisms. The blood samples are stored in -20°C for further molecular diagnosis.

Title: Project on Diagnosis of Rabies and Anthrax in Animals: Outreach Programme on Zoonotic diseases.

Diagnosis of Rabies

Expressed RABV-G protein and characterized immunologically.

Standardized indirect ELISA by using Rabies virus G-antigen and pETRVL- G expressed protein for sero-monitoring of vaccinal antibodies against rabies in dogs.

Diagnosis of Anthrax

Identified *B. anthracis* from field samples collected during Anthrax outbreaks from Karnataka.

Molecular confirmation of the isolates using genes coding for protective antigen (PA) and capsule by polymerase chain reaction (PCR).

Standardized Co-agglutination test (CAT) for the detection of *B.anthracis antigen* in field samples.

Standardization and application of PCR for *B.anthracis* isolates by targeting PA gene

Lane M – 100bp

Lane 1-5-B.anthracis isolates

Lane 6-Staphylococcus aureus (negative control)

Lane 7-No template control

Title: ‘Studies on prevalence of *Arcobacter* sp. (Emerging food-borne pathogen) in foods of animal origin’.

I. Collection of Samples

A total of 50 chicken meat samples were collected from retail outlets in Bengaluru.

II. Isolation studies

The chicken meat samples were homogenized and inoculated into *Arcobacter* enrichment broth/CAT broth and incubated at 28°C under microaerobic conditions.

The enriched samples were streaked onto the CAT agar plates and incubated at 28°C for 48-72 hrs under microaerobic conditions for isolation of *Arcobacter* spp.

Suspected *Arcobacter* colonies (showing translucent to whitish, 2-4mm diameter, convex and opaque colonies with entire edge) showing characteristic helical, curved or S-shaped morphology and were sub-cultured onto solid media and incubated at 28°C under aerobic condition for 48-72 hrs to get pure culture.

Out of 50 chicken meat samples screened, 09 (18 per cent) samples were found positive for *Arcobacter* sp. by cultural method.

Title: Studies on clinico-pathology and molecular diagnosis of paratuberculosis in small ruminants

Faeces, serum and tissues were collected from paratuberculosis suspected field cases (sheep and Goat), slaughter house and culled animals infected with paratuberculosis from organized farms.

680 serum samples were collected from sheep from an organized Bannur sheep farm, Mandya District. Indirect ELISA was carried out to find out sero prevalence of disease. Out of 680 serum samples, 121 were sero positive with prevalence rate of 17 per cent.

Post-mortem examination of 60 culled sero positive animals were carried out. Gross and histological lesions were recorded.

Out of 60 cases, 15 animals showed typical gross lesions such as intestinal corrugations and thickening with chondring of mesenteric lymphnodes.

The histological lesion consisted of microgranuloma with infiltration of mono-nuclear cells such as macrophages and lymphocytes in intestines and lymphnodes.

The organisms were demonstrated by acid fast staining of impressions smears and tissue sections.

Finally IS 900 PCR was carried out to confirm the paratuberculosis

Title: Studies on Pharmacokinetics and Biodistribution of Azithromycin in broiler chickens

Results are yet to be concluded

Title: Safety and Efficacy evaluation of paclitaxel nanoparticles in mammary tumor induced rats

Yet to start

Title: Induction of lactation in unproductive animals

The project is initiated and the results are awaited.

Title: Validation of ethnoveterinary practices in the management of common ailments of livestock

The project is just initiated and the results are awaited.

Title: Studies on Epidemiological, Clinical aspects of Leptospirosis in Dogs

To evaluate the role of predisposing factors for leptospirosis in dogs

To analyses hematological and biochemical parameters associated with leptospirosis

To study sonographic changes in liver and kidney of leptospira confirmed dogs

To study routine farm managemental practices of milk production collect data on knowledge attitude of farmers in identified farms

To analyses hematological parameters

To study prevalence of bovine tuberculosis of small farms located at peri urban Bengaluru

Title: Studies on bovine Tuberculosis in small dairy holdings at Peri-urban area of Bengaluru

Over the period of last four months 2442 cases of various gynaecological disorders in dogs were presented to the dept of VGO and vaginal leiomyoma was diagnosed in 22 cases.

The age at which it was first diagnosed has varied between 7.2 years to 16.6 years and the breeds in which it was presented were

- Laborador Retriever (4 animals),
- German Shepherd (4 animals),
- Spitz (9 animals),
- Mogrel (5 animals).

Every animal in which leiomyoma was diagnosed exhibited multiple growths. The clinical signs included constant licking of the vulva, serosanguinous vaginal discharge and perineal bulging.

Title: Characterization and prognostic evaluation of embryonic stem cell signature in canine mammary neoplasia

Collection of data pertinent to occurrence of mammary tumor has started and selected cases of mammary tumor are subjected for thoracic and abdominal radiography, ultrasonography and in few cases regional lymph node biopsy are taken. Post surgical survival period and relapse of tumor is being monitored

VETERINARY COLLEGE, BIDAR

Title: Study the Safety and Immunogenicity of Tetanus toxiod Vaccine in animals

The Tetanus toxiod Vaccine Received from III Hyd ,March 2017 , the animals for vaccination will be done in the month of may 2017, Other Serological tests will be conducted after 0th day and 30th day interval

Title: Studies on Mange infestation in donkeys in and around Bidar

Sixty per cent of the objective mandates have been achieved with utilization of the budget allotted.

Total of 56 Skin scrapings of donkeys with skin disorders were screened for mite infestation in and around Bidar

Title: Epidemiological Study on shedding pattern of *E. coli* O157:H7 in Deoni vis a vis exotic cattle breed

In the first project, microbial isolation of *E. coli* O157:H7 from 300 samples (150 each from Deoni and exotic breeds) has been completed. Of the 300 samples 47 samples (35 from exotic breeds and 12 from Deoni) were positive for *E. coli* O157:H7. Molecular identification and confirmation of the isolates by using latex agglutination and multiplex PCR is yet to be carried out.

Title: Detection and quantification of antibiotic residues in chicken meat using microbiological and HPLC assays from Hyderabad-Karnataka region

In the second project, 54 meat samples collected from bidar district were subjected to microbiological assay of which 23 samples found to be positive for the presence of antibiotic residues

Title: Validationof ethnoveterinary practices in the management of common ailments of livestock

Sixty per cent of the objective mandate has been achieved with utilization of the budget allotted. Planning organisation coordination and implementation to achieve the objectives within six months as most of the herbs are available during rainy and winter season .Validation of Etrhnoveterinary practices *in-vivo* shall begin from June

Documentation of Common Ehnoveterinary practices followed for common ailments of animals have been recorded from the state of Karnataka and across the country and database of veterinary herbals and plants have been compiled and process of manual printing under process.

Procurement of Basic Chemicals and Glassware for establishment of facilities for the scientific validation of the various herbs/herbal formulations obtained during the various documentation works is completed.

Herbal museum and Herbal garden have been established in the college, with collection of the powders and planting of the herbs will be done in the coming rainy season in June.

Many NGO's working in the field of Ethno veterinary Practices for various farmer communities of animal husbandry sectors were also contacted and information gathering along with documentation work is under progress.

Identified Ethno veterinary Practitioners in Bidar District and conducted documentation workshop (Videography and Photography). Twenty Three Ethnoveterinary Practitioners participated and gave their inputs pertaining to various Ethno Veterinary Practices that are being practiced by them.

Title: Therapeutic management of infertile animals and organizing infertility treatment camps for AI synchronized by use of CIDR in crossbred cows and buffaloes in Bidar district

All the required medicines and supplements were procured through Director, Dept. of AHVS.

Trained 50 Veterinary officers along with 100 Para veterinarians from the Dept. of AHVS, Bidar regarding Estrus Synchronization methods using CIDR and methods to improve conception rate at field level.

A total of 25 infertility camps were conducted in three different taluks covering around 1200 animals of Bidar district.

Infertility camps for Basava Kalyan taluk were completed.

Currently follow-up and further infertility camps in other taluks of Bidar district is under progress.

Title: Induction of fertile Estrus in Anestrus Local Ewes in Bidar District

All required medicines and feed has been procured and full budget has been utilized.

Clinical trial needs to be initiated.

Title: Two kidding per year program in Goats

All required medicines and feed has been procured and full budget has been utilized.

Clinical trial needs to be initiated

Title: Application of Anti-luteolytic strategies in treating repeat breeding cows

Completed the clinical trial in 50 animals, presently sample analysis and result compilation is under progress.

Title: Support to Livestock and Extension Activities in Bidar District under Sujala-III

Abstract of Sujala-III Project Activities

Activities	Location	Target	Achieved	Remarks
Awareness programmes/ workshop on Identified Intervention	GP Level	8	09	
	District Level	1 Nos.	01	
On Farm Demonstrations (OFD)				
Summer management of buffaloes	Village Level	4 Nos.	03 (In progress)	
Enrichment of dry fodder/ Management of calf (Cont..)	Village Level	14 Nos.	14	
Silage making by using silo bags	Village Level	8 Nos	08	
On Farm Trials (OFT)				
On-farm trials in goats during transition period	Village Level	10 Nos	10 Nos.	
Participatory Research				
Detection and control of sub-clinical mastitis	Village Level	4 Nos.	05	
Production Units				
Establishment of fodder nurseries (Minimum of 5 varieties in 2 guntas)	Village Level	2 Nos.	03	
Introduction of Rams/Bucks	Village Level	10 Nos. Bucks	13 Nos. Bucks	
Value addition of milk - Preparation of milk products	Village Level	2 Nos.	02	
Other Activities				
Promotion of <i>Sesbania</i> as fodder for livestock	Village Level	--	2 (In progress)	

Title: A study of the performance of Nari Swarna x Kenguri crossbreds

No. of lambings n= 75

Sex ratio : 1 : 1.8

Mean birth weight (kg): 2.84

Mean birth weight of male lambs (kg): 2.96

Mean birth weight of female lambs (kg): 2.72

Title: Characterization of Bidri and Nandidurga goats of Karnataka

Survey was conducted in Chitradurga, Challakere and Hiriyur taluks of Chitradurga district for Nandidurga goats; and in Bidar, Bhalki and Humnabad taluks of Bidar district for Bidri goats. Information on morphological, Socio economic, management and performance parameters was collected in 20 flocks from 6 villages on Nandidurga goat and 11 flocks of Bidri goats. There was uniformity and purity within both populations of goats. 50 random blood samples from unrelated

goats were collected for both populations from their respective breeding tract. DNA has been isolated and quality and quantity has been verified.

Nandidurga goat: Total goat population of breeding tract was 6.6 lakh. Average flock size was 29.6 (12-93). Flocks were stationary. Goats were housed in kutcha sheds during night only. Goats are raised on grazing only with no supplementation. Coat colour is white. Eyelids are brown or black. Ears are leafy and pendulous. Goats are not milked and reared for meat only. Twining is common. Adult weight varies from 30 to 50 kg in males and 26 to 40 kg in females.

Bidri goat: Total goat population of breeding tract was 5.2 lakh. Average flock size was 74.3 (21-130). Flocks were stationary. Goats were housed in kutcha open sheds during night only. Goats are raised on grazing only. Coat colour is Black. Muzzle, eyelids and hooves are black. Horns are present. Ears are pendulous. Goats are reared for meat only. Twining is common. Adult weight varies from 31 to 47 kg in males and 24 to 40 kg in females.

VETERINARY COLLEGE, SHIVAMOGGA

Title: e-Varaha: Information System for Safe Pork Production in North Eastern India

Development of Decision Support System for pig/ pork is under progress.

Development of image analysis system for the identification of *Ascaris suum* in pig feces is under process.

Title: Isolation and characterization of bacteriophages specific to pathogenic bacteria in livestock

Isolation of bacteriophage is under process

Title: A systematic documentation of the pathological conditions in captive wild animals in and around Shivamogga

The work on this project began during 2014-15. The current year 2016-17 is the third year of work in this project. The area covered are in and around Shivamogga that come under the Shivamogga Wildlife Division, Tyavarekoppa Lion Safari and Sakrebylu forest area , and Bhadra Reserve forest, Shettihalli range forest, Balehonnur forest, Kumsi range forest and also Chikmagalur wildlife division.

Several cases of wild captive animals received for post mortem examination at Veterinary College, Shivamogga have been subjected to various types of investigations in support of diagnosis of pathological conditions. Gross pathological, histopathological, cytopathological, microbiological and in some cases haematological investigations are being carried out.

During the year 2016 (March-April to December), necropsy cases have been documented viz., Sambar deer, Indian Rock Python, Peahen, Peacock, Silver crested Pheasants (male and female), Kite and Leopards. In free range, fatal cases of Spotted deer (two numbers), Gaur and Tigers (two) have been documented. Few of them were forensic cases.

Title: Characterization and prognostic evaluation of embryonic stem cell signatures in canine mammary neoplasia

Objectives:

- To document and characterize embryonic stem cell markers in canine mammary tumours
- To study the prognostic relevance of embryonic stem cell markers in canine mammary tumours.

Title: Development of Scaffold Technology for Industrial Progress, Societal Benefit and Environmental Safety

Preparation of decellularized ECM(bioscaffold) from the fresh hollow organ matrix of food animals by modified decellularization method (Sealed Transmural Osmotic Flow) using 0.5 per cent fresh bile instead of synthetic detergents, for complete removal of the cells but without changing the quality of ECM's native structure after decellularization.

Title: Upgrading the facilities in the area of meat processing including establishment of mini abattoir and quality control

Objectives:

Creating infrastructure in the Department of Livestock Products Technology, which includes creation of facilities like establishment of slaughter line for sheep, goat and poultry.

Hands-on training to Undergraduates, Butchers, Veterinary Officers, meat Inspectors, interested entrepreneurs and Meat industry persons in the new facilities on recent technologies in the post-harvest technology.

Progress Made:

The construction of slaughter house for sheep and goat has completed and sheep slaughter instruments were installed and made functional

Instruments *Viz.*, Deep freezer, Incubator, Electrical fryer, visi cooler, hot air oven, gas fryer, meat storage trolleys with SS container, Poultry scalding machine, Insect killer, ramp and ladder, procured under 2nd instalment (Rs. 37.5 Lac) were installed and made functional

The purchase of remaining instruments (*Viz.*, Texture Analyser, Meat band saw, Modified atmosphere packaging unit, UV-Vis spectrophotometer, Laminar flow and Refrigerator etc. is under e-Tender procurement process.

Title: Livestock support and Extension Activities

Workshops on identified interventions.

On- Farm demonstrations on enrichment of dry fodder, Ballanced feed, Silage making using silo bags.

Participatory research to improve SNF and Fat, Detection and control of sub clinical mastitis.

Production unit: Establishment of fodder nurseries, Establishment of rural hatchery units, Wool cording and Value addition of milk – preparation of milk products.

On- farm trials in goats on transition period.

Feeding regime based on body condition score for monitoring reproductive cycle.

Title: A study on the effectiveness of homeopathic complex in chronic mastitis in Cattle and Buffaloes.

The animals under trial were divided in to three groups. First group will be treated with *Calcarea fluorua* (200 potency, 40 size pills.) drug. Under this group totally 06 animals were treated. In the second group commercial homeopathic preparations (Teatasule fibro gold Kit, Goel vet Pharma UP) were using. Since the drug was recently procured one animal was treated and the results are awaited. In the third group the animals will be treated with allopathic medications. And no trials were conducted till now. The project will be continued.

Title: Prevalence, Haematology and Biochemical aspects of Anaplasmosis in Cattle in and around Shivamogga

Blood sample were collected from cattle in and around Shivamogga.

Blood smear examination done.

Hematology and biochemical analysis done.

ELISA test performed.

Interpretation of results done.

Appropriate statistical analysis done.

PCR to be performed for identification of *Anaplasma* species.

Title: Establishment of Food Rheology Laboratory

A State-of-the-Art Food Rheology laboratory has been established. Oscillatory Rheometer and Water Activity Meter have been purchased and are being put to use. All other necessary equipments will be procured through e-tender. Trials are being taken with Rheometer and Water Activity Meter by the Post Graduate and Doctoral Students. The facilities in the laboratory are being used for research and training purposes.

Title: Establishment of Food Processing Training Centre

Food Processing Training Center has been established and methods of preparation of various bakery products have been standardized. The module for training programmes for the dairy farmers and entrepreneurs has been prepared and the training programmes will commence very soon.

Title: VTCC network project on Dairy Microbes

A total of 20 numbers of phenotyped lactic acid bacterial isolates are given for gene sequencing for confirmation of the identity and results awaited. Domestic *dahi* samples of 6 numbers, 3 each from Dharmapuri and Salem of Tamilnadu are collected and subjected to plating to isolate the lactic acid bacteria. Phenotyping of total number of 10 lactic isolates obtained from *dahi* samples is now in progress.

Title: Studies on the therapeutic properties of the fermented milks incorporated with oats (*Avena satvia*)

Optimization of *dahi* using different levels of *dahi* cultures (1, 1.5 and 2 per cent), different levels of oat- cow milk blends (10:80, 20:80 and 30:70) and different levels of beta glucan (0.3 per cent, 0.6 per cent and 0.9 per cent) and control without beta glucan or oat milk. Maximum scores were observed for *dahi* prepared using 20: 80 levels of oat milk: cow milk blends, 1.5 per cent of *dahi* culture and in case of beta glucan incorporated *dahi*, 1.5per cent culture and 0.6 per cent of beta glucan levels.

Further, the composition of the optimized oat-milk –cow milk *dahi*, beta glucan incorporated *dahi* and control *dahi* was determined. All the *dahi* samples showed nonsignificant difference with respect to moisture, protein and fat.

Therapeutic properties of *dahi* like *in vitro* antioxidant property were studied. Antioxidant activity of control *dahi* was significantly lower than the oat milk – cow milk blended *dahi* as well as beta glucan incorporated *dahi*. However, antioxidant potential of latter was significantly higher than the former.

Glycemic response of the formulated *dahi* samples were studied using feeding experimental rats with formulated *dahi* samples and standard rat feed mix for a period of 5 weeks. After 5 weeks, the blood glucose was reduced and remained constant in all the groups of rats fed with control and formulated *dahi* samples. Blood glucose content reduction was significantly lower in case of rat groups fed with formulated *dahi* samples.

Antimicrobial activity of the control and formulated *dahi* samples was tested against *Staphylococcus aureus*, *Salmonella* species and *E. coli*. None of the *dahi* samples showed inhibitory effect on their growth.

Storage studies of the formulated *dahi* indicated retention of acceptability up to 6 days .The products did not show any growth of coliform throughout the storage period and yeast and mold up to 3 days which were within standards prescribed.

COLLEGE OF FISHERIES, MANGALURU

Title: All India Network Project on Mariculture

a. Broodstock development and hatchery technology of sand whiting (*Sillago Spp.*)

The work on broodstock development sand whiting from wild caught juveniles was continued during the period under report. The fish were reared in a probiotic system (*Lactobacillus acidophilus*) in batches for a period of 60 to 90 days and conditioned to accept specially formulated artificial feeds developed at the centre and then transferred to brood stock rearing ponds Of 800 sqm for further rearing to adult size of 80 g size. As of now excellent maturity both in male and female has been observed as evidenced below.

For spawning an *in situ* breeding technique in earthen pond has been designed wherein the brood fish shall be held in earthen pond till they attain maturity and spawned in specially fabricated spawning cage installed in the same brood fish pond itself as the fish are too sensitive to handling and transfer to another environment which would result in resorption of gonads.

b. Broodstock development and hatchery technology of milk fish (*Chanos chanos*): Collection and conditioning.

The work on broodstock development of milk fish is in progress in second stage brood fish rearing ponds with 1600 sqm water spread area. The brood fish have grown over 1.60 kg at the end of 2nd year of rearing with commercial floating feed with protein not less than 30 per cent.

The gonadal examination of milk fish revealed thin thread like milky white gonads at immature stage.

c. Fish seed resource survey and establishment of fish seed bank along Uttara Kannada, Udupi and Dakshina Kannada Districts.

A total of 22 fish seed survey were conducted to assess the availability of seed of prioritized fish species along the coast of Uttara Kannada District. Rich resources of sand whiting, mullets, pompano and barracuda are available for establishing fish seed collection banks.

Title: Evaluation of efficacy of Mangala Setright and Mangala Borosan on water quality and fish production

Mangala Borosan showed better growth performance in carps at dosage of 25 kg per ha. At this dosage, water quality parameters were maintained optimum range in the fish ponds. In case of Mangala Setright, a dosage of 150 kg per ha showed better growth performance in carps and water quality parameters were well maintained at this dosage.

Title: National Surveillance Programme for Aquatic Animal Diseases (Freshwater)

Fish samples from active surveillance districts namely Mysuru, Mandya, Shivamogga, Ballari, Koppala and Raichur are collected and screened for Koi Herpes Virus and Spring Viraemia of Carps. All samples are reported negative. Training programme on importance of disease surveillance in aquaculture were conducted for the department officials and fish farmers of Mysuru and Mandya districts.

Title: Coastal water quality monitoring near M/s. UPCL seawater intake and effluent discharge point off Padubidri

In this monitoring project, assessment of physical, chemical and biological parameters of seawater near the vicinity of effluent discharge point, as well as bioassay studies were carried out. During the study the coastal water quality was in the vicinity of effluent discharge point of UPCL in the Arabian Sea assessing water, sediment, plankton and benthos. Report submitted to the sponsoring agencies every month.

Title: Monitoring of pollution impact by discharge of treated effluents from BASF, Mangaluru

This monitoring project was aimed at assessing physical, chemical and biological parameters of seawater near the vicinity of effluent discharge point from BASF.

The coastal water quality in the vicinity of discharge of point of BASF in the Arabian Sea was monitored by assessing water quality, sediment, characters and composition of plankton and benthos. Report submitted to the sponsoring agencies every month.

Title: Ecological monitoring of Arabian Sea receiving effluents from MCF Ltd.,

Assessment of physical and chemical parameters of seawater near the vicinity of effluent discharge point of the fertilizer industry was monitored. Seasonal and temporal variation of phytoplankton, zooplankton and benthic organisms and bioassay studies on the receiving water was performed.

The study monitored the coastal water quality in the vicinity of discharge point of MCF in the Arabian Sea by assessing water quality, sediment, characters and composition of plankton and benthos. Reports were submitted to the sponsoring agencies every month.

Title: MSEZL Marine Outfall Discharge Point in the Arabian Sea, Mangaluru

Assessment of physical, chemical and biological parameters of seawater near MSEZL discharge point was monitored. During the study, the coastal water quality was monitored in the vicinity of discharge point of MSEZL in the Arabian Sea assessing water, sediment, plankton and benthos. Report was submitted to the sponsoring agencies every month.

Title: INCOIS - Influence of oceanographic parameters on plankton assemblage and pelagic fisheries using Satellite data along the coast of Dakshina Kannada and Udupi Districts of Karnataka

The objectives of the study were validation and propagation of Potential Fishing Zone (PFZ) advisories of INCOIS, assessment of oceanographic parameters in relation to plankton assemblage, to study the food and feeding habits and population characteristics of commercially important pelagic fishes, to correlate the oceanographic parameters with pelagic fishery, to ascertain the breeding seasonality of commercially important pelagic fishes

The study indicated oil sardine catch positively correlated with Chl-a concentration, Good catch of sardine recorded in Mangaluru and Malpe harbour from October- 2014 to December-2014 and October- 2015 to December-2015. Sea surface temperature showed negative correlation with sardine catch and positive correlation with mackerel catch. Catch of mackerel and sardine negatively correlated. Salinity negatively correlated with pH and dissolved oxygen of water and positively correlated with water temperature. An increased fish catch was observed in the PFZ area as compared to Non-PFZ's area. Validation experiments conducted using trawler showed higher catch in predicted areas. In Sardine (*Sardinella longiceps*), 78 per cent of the fishes from PFZ had full stomach distension indicating better availability of food at PFZ with fully digested greenish mass as major diet while only 35 per cent from non-PFZ had full-stomach distension. Macrel (*Rastrelliger kanagurta*) harvested from PFZ fed extensively on smaller pelagic and 76 per cent of

the fishes from PFZ had full stomach and partially digested teleosts were visible. PFZ data provided by the INCOIS have proved to be a useful tool in enhancing the fish catch.

Title: Bioassay and soil analysis

Bioassay experiments were conducted on monthly basis on treated effluent samples supplied by Sequent Scientific Limited, Baikampady, Mangaluru using common carp. (*Cyprinus carpio L*) and monthly reports have been submitted to the sponsoring agency regularly.

Title: Inventorying of mangroves associated flora and fauna: Need for co-management for conservation and sustainable utilization based on satellite imagery and GIS along Dakshina Kannada Districts of Karnataka

Field survey of the mangrove ecosystem along Dakshina Kannada and Udupi districts (along Lat. 12.85.7 N and Long. 74.86.76 N E to 13.55.134 N and 74.35.511 E) was carried out. A questionnaire was prepared to collect the data of demographic features and biodiversity survey of fauna and flora. Collected fauna and flora were identified to species level using standard taxonomic keys viz. Fishes of India, FAO identification sheets, Integrated Taxonomic Information System (ITIS) standard report (<http://www.itis.gov>), Fish Base (<http://fishbase.org>) and other reference books. Mangrove density and area was established using GPS. Mangrove distribution, change pattern etc are recorded using Secondary information from department of forests, dept. of fisheries, revenue dept. and remote sensing images. The available data is processed using GIS.

Title: Sustaining livelihood security in rural women of Dakshina Kannada - integrated livestock and fisheries production

The project is implemented in Beltangady taluk of Dakshina Kannada district. The target groups are women who are small and marginal farmers, unemployed and willing to take all the 4 enterprises like ornamental fish culture, piggery and rearing goats and poultry birds. Based on the comprehensive survey of available natural, physical and human resources. 4 villages (Nada, Kanyadi, Mundur and Savanalu) were selected from the 2 gram panchayaths Nada and Melanthabettu. The criteria for the selection of villages within the panchayath were total number of BPL families, influence of naxalite movement and infrastructure development. As per the stratified random sampling procedure, 5 beneficiaries from each village, a total of 20 beneficiaries who are willing to undertake all the identified 4 enterprises were selected. Later, family background, demographic profile, resource endowment, education level and entrepreneurial skills of all the 20 selected beneficiaries were assessed.

Title: DBT – Bioinformatics –Distributed Information Sub Centre (DISC)

The following activities were conducted by the bioinformatics centre.

- A case study of ciguatera fish poisoning in Mangaluru, India

Ciguatera fish poisoning (CFP) is the human intoxication caused by consumption of fish which have accumulated ciguatoxins (CTXs). Two individuals of a family developed suspected ciguatera poisoning after consuming unknown fish purchased from a local market in Mangaluru.

For identification of fish from its remnants, the fish meat DNA was subjected to 16S and COI DNA barcoding and sequenced. Using bioinformatic tools the sequences were analysed and the fish confirmed to be *Lutjanus bohar*. A mouse bioassay study detected high levels of CTX in the implicated fish and mice injected with toxin showed typical symptoms of CTX. This is a first case report of CFP due to consumption of *L. bohar* in India.

b. DNA barcoding of fishes:

Fish species belonging to the genus *Nemipterus* (Thread fin breams), *Sardinella* (sardines), *Coilia* (anchovies), *Cyanoglossus* (soles) and *Synapturasp* prevalent along Mangaluru coast were identified using the DNA barcoding technique. The cytochrome oxidase I and 16S RNA genes of mitochondrial DNA was used in fish phylogenetics. Universal primers as well those designed by us were used in amplifying the COI and the 16s rRNA genes, the products which was sequenced and subjected to bioinformatics analysis.

c. *In silico* studies of shrimp white spot syndrome virus

The available whole genomes sequences of WSSV was screened for the presence of protein domains involved in ubiquitination process. Sequence analysis and structural modelling showed WSSV to possess several of these domains, homologous to similar proteins in eukaryotes. Wet lab studies for studying the expression of these proteins during the virus infection process is in progress.

The WSSV proteins have been studied for the presence of transmembrane domains using bioinformatics tools. The transmembrane proteins identified have been studied for their orientation and characterized.

d. Studies on *Vibrio vulnificus* associated with seafoods

V. vulnificus isolated from clam (*Meretrix meretrix*) procured from local markets were genotyped using the 16S rRNA and *vcg* typing methods. The 16S rRNA and *vcg* gene sequences were sequenced and subjected to bioinformatics analysis. Genotyping identified the isolates to be of type 16S rRNA typeB and *vcgC* type respectively. Analysis of representative 16S rRNA and *vcg* gene sequences further substantiated that the *V.vulnificus* associated with clams to be of clinical origin, implicated as virulent type responsible for causing infection in humans.

Title: National Surveillance Programme for Aquatic Animal Diseases: Surveillance of shrimp diseases in coastal Karnataka.

Shrimp samples and pond water was collected regularly every month along the coastal Karnataka from shrimp culture farms and the samples were transported to the laboratory. The samples were tested for the presence of DNA viruses such as white spot syndrome virus (WSSV), monodon baculovirus (MBV), hepatopancreatic parvovirus (HPV), infectious hypodermal and hematopoietic necrosis virus (IHNV) and RNA viruses such as taura syndrome virus (TSV), yellow head virus (YHV), infectious myonecrosis virus (IMNV) and other emerging pathogens causing acute hepatopancreatic necrosis disease (AHPND) and enterocytozoonhepatopenaei

(EHP). The results were documented and monthly and quarterly were sent to the NBFGR, Lucknow.

The farmers were informed about the results of analysis of samples, disease status and in few cases suggested them for the emergency harvest of their crop because of WSSV infection. Further, passive surveillance was also undertaken by carrying out pathogen analysis of shrimps provided to us at our laboratory by shrimp farmers. Baseline data information for 125 new shrimp farms was collected along the coastal Karnataka and uploaded to the database of National Surveillance programme for aquaculture and animal diseases (NSPAAD).

Title: Novel molecular approaches for advancing prediction and mitigation of disease outbreaks in aquaculture for small scale farmers

Three different culture systems were selected for the study. This included,

Extensive system: Natural system involves trapping different fish species during high tide and harvesting during low tide, Intensive Shrimp culture system: *Litopenaeus vannamei* cultured employing modern practices and Freshwater culture system: Involves culture of Indian major carp i.e *Labeo rohita (rohu)*

The water quality parameters from different culture system are being assessed regularly for predicting disease risk. Histology for diagnostic pathology is being standardized. cDNA extraction from source water and incubation samples will be collected and processed for amplicon sequencing.

Title: Isolation and characterization of bioactive compounds from marine bacteria

Marine bacteria are emerging as a significant source of bioactive molecules in the recent years. But only a few studies have been conducted on marine bacteria, particularly from tropical environments. In this study, 12 sediment samples were collected from each sampling station which includes Surathkal, Someshwar, Ullala and Mangrove areas. The samples were subjected to bacteriological analysis using spread plate technique. Plates showing isolated colonies were replica plated to screen for the production of antimicrobial substances. Two indicator bacteria were used for the screening: *Staphylococcus aureus* as a representative of Gram positive bacteria and *Vibrio harveyi* as representative of Gram negative bacteria.

A total of 57 bacteria with antimicrobial property were isolated. Of these, 19 were from Someshwar, 12 from Surathkal, 11 from Ullala and 15 from mangrove area. These were subjected to a battery of biochemical tests for identification. Among them 48 were identified as *Bacillus* spp and 9 as *Pseudomonas* spp.

Further screening of the 57 isolates based on the zone of inhibition led to the selection of 8 isolates that showed significant antimicrobial activity against test strain. The optimum growth conditions for these isolates are being standardized for the maximum production and scaling up of antimicrobial substances. The active compounds from these isolates will be subjected to purification processes and will be used for conducting biological assays. The active inhibitory compounds thus obtained will be tested for their action against fish and shell fish pathogens.

Title: Development of therapeutic phage consortia to manage *Aeromonas hydrophila* infection in aquaculture systems

The project funded by DBT, Govt. of India is newly sanctioned on 13/02/2017 and the work is just initiated.

Title: All India Coordinated Research project on Post-Harvest Technology

1. Production of fish oil concentrates rich in omega-3 fatty acids

This work is aimed at quantifying and characterizing lipid recovered with pH shift method and determination of effectiveness of lipase assisted hydrolysis on the concentration of EPA and DHA in fish oil. The work has been initiated where in sardine fish oil was separated by pH shift method and is being compared with the oil separated by conventional method. The GC analysis of the oil is pending for want of installation of GC unit.

2. Development of small scale fish meat picking unit and its performance evaluation

To develop the efficient fish meat picking machine the working design of the existing meat picking machine was used as referee and new machine devised involving hydraulic and rotary screw press. Designing and fabrication was outsourced to a private fabrication unit in Bengaluru. However, the performance of the equipment was not upto the mark and hence discarded. A New approach involving rotary rail mechanism is in progress.

Title: An Assessment of Ecological-Economic Benefits of Estuaries in Karnataka, India

Based on the preliminary workshop conducted during first phase of the work, consultation with expert, following research issues have been identified for further detailed work.

Ecological-Economic and livelihood aspects of sand mining and bivalve-fishery production in the estuary: To develop an ecological-economic model, to quantify how the depletion of bivalve catch is a function of sand mining, water quality parameters, bivalve harvests and other parameters.

Revisiting coastal wetlands (Gazni land) by keeping earlier research (Bhatta et al., 1998) paper as a base: Mapping of the entire gazani area to know the developments since 1995 in terms of land use and land cover changes, area under shrimp farming, area under rice cultivation, built up area, etc. and link it with the changes in the profitability of different emerging enterprises.

Economic valuation of bivalve production through livelihood approach : Instead of looking at the value of bivalve as market price of the harvested quantity, we may look at the loss of livelihood (employment, women's role, income and migration)

Impact analysis of proposed port development project on different activities such as salt, rice, etc.

As part of the research study a comprehensive survey of two livelihood activities were completed namely crab fisheries and bivalve fisheries present status, threats and potential prospects for restoration and conservation were analysed.

INSTITUTE OF ANIMAL HEALTH AND VETERINARY BIOLOGICALS, BENGALURU

Title: All India Co-ordinated Research Project on Animal Disease Monitoring and Surveillance

Objectives:

The main objectives of the research project are as follows:

Effective updating of NADRES with active disease data and climatic and non-climatic risk factor.

Investigation of endemic, emerging and remerging animal disease out breaks using innovative technologies.

Strengthening of national livestock serum respository.

Seromonitoring of animal disease based on sampling plan.

Analysis on economic losses due to animal disease and control measures adopted for their management

Details of the Outbreaks, Attacks and Deaths due to Notifiable disease in the State during 2016-17

#	Disease	OB's	Attacks	Deaths (per cent)
1	Anthrax	37	282	282(100)
2	Blackquarter	36	271	144(53.13)
3	Haemorrhagic Septicemia	30	2141	551(25.73)
4	Enterotoxaemia	29	1925	839(43.58)
5	Peste des Petits Ruminants	17	826	283(34.26)
6	Sheep and Goat Pox	34	1045	302(28.89)
7	Bluetongue	2	57	29(50.87)
8	Rabies	0	0	0
9	Brucellosis	2	22	0
10	Classical swine Fever	1	25	20(80)
11	Mycoplasmosis	9	413	122(29.53)
Total		197	7007	2572(36.7)

Title: All India Co-ordinated Research Project for Epidemiological Studies on Foot and Mouth disease

Objectives:

1. To conduct systematic epidemiological studies on Foot and Mouth disease in Karnataka and to assess the incidence in relation to;
 - a) Population profile.
 - b) Agro-Geo-Climatic distribution.
 - c) Occurrence of different types and sub types of virus.
 - d) Duration and dynamics of outbreaks, and
 - e) Susceptibility and economic losses.

2. To assess the role of various factors associated with origin, course and development of the outbreaks of the disease.
3. Serosurveillance of FMD in the Karnataka state under National FMD Sero-surveillance programme.
4. Seromonitoring of vaccinal immunity against FMD virus serotypes O, A, Asia-1 under FMD control programme for the state of Karnataka.
5. To monitor the incidence of FMD in well organized farms where regular vaccination is undertaken and to collect, compile and analyze the data of such organized farms to evaluate the efficacy of the vaccines and the factors associated with the perpetuation of FMD virus in the region.
6. To apprise the authorities of the state Animal Husbandry Department, Field Veterinarians and livestock owners concerning the disease situation and suggest prophylactic programmes and strategies for the control of the disease.

Completed Objectives: Progress made

PROGRESS REPORT OF FOOT AND MOUTH DISEASE BENGALURU REGIONAL CENTRE DURING THE PERIOD 2016-17

Months	No.of incidence	Virus identified in FMD incidence	No.of clinical samples processed	Virus type identified				No.of pre/post and DIVA vaccinal serum samples processed	Total no. of samples processed

Title: Southern Regional Disease Diagnostic Laboratory

Objectives:

- To serve as Regional Referral Laboratory for economically important livestock diseases (bacterial, viral, parasitic etc.), any drug/pesticide residue and toxicities by providing diagnostic services (both primary and confirmatory) to the states of the region.
- To maintain a data bank on the epidemiology of the economically important diseases of the region and circulate to all the states on a periodic basis.

Collection and transmission of all isolates of viral, bacterial and parasitic agents to the National Repository at National Reference Laboratory.

To follow the approved standard reagents and techniques for generation of the diagnostic results.

To train scientists/officers from the State Diagnostic Laboratories of the region in the state of the art technology for diagnosis of animal diseases and provide consultancy and expert services to the states of the region.

To undertake identified special programs for disease surveillance/diagnosis as per the direction of Government of India from time to time in view of its epidemiological significance and importance etc., Bovine Spongiform Encephalopathy (BSE), Scrapie, Contagious Equine Metritis (CEM), Highly Pathogenic Avian Influenza etc.

Any data generated by the RDDL could be published only after prior permission from DAHD.

Progress made so far:

During the year under report April 2016 to March 2017

Samples were analyzed at Diagnostic Pathology.

Samples were analyzed at Diagnostic Parasitology.

Samples were analyzed at Diagnostic Bacteriology and Mycology.

30998 samples were analyzed at Diagnostic Virology.

23119 samples were analyzed at Sero epidemiology.

1385 amples were analyzed at Biochemistry and Toxicology

A total of 64636 samples were analyzed at SRDDL in different sections.

Title: Standardization and production of species specific antいsnake venom from chicken eggs

Objectives:

Generation of species-specific ASV in chicken egg.

Extraction and purification ASV antibodies from egg yolk.

Detection and Quantitation by ELISA

Toxicological safety studies in lab animals.

Progress made:

Procurement of snake venom from all 4 species of snake has been done from The Irula Snake Catchers Industrial Co-Operative Society, Tamil Nadu.

A pilot scale poultry housing 40 layers aged 20 weeks has been setup at KVAFSU poultry farm.

Immunization of these chickens with species snake venom has been carried out after formulating the snake venom in suitable adjuvants.

Booster dose administration has also been completed.

Eggs are being collected and stored in the cold room for further processing.

All the arrangements for the ASV extraction from eggs are through and once extraction is complete other related tests will be carried out, which will be carried out shortly.

Setting up of lab for conducting the research on ASV extraction from eggs.

RURAL DEVELOPMENT & FARMER APPEAL
GOVT. OF KARNATAKA

Title: Development and Evaluation of Pentavalent Bluetongue vaccine for sheep and standardisation of rapid diagnostics for early detection of Bluetongue

Objectives:

- Isolation of virus in cell culture from blood samples from field outbreaks.
- Identification of virus by using PCR.
- Design of specific primers for BTV isolates.
- Validation of primers for their specificity.
- Real time PCR for rapid diagnosis.
- Standardization of developed pentavalent vaccine and its trials in field condition by sero monitoring.
- Raising hyper-immune sera and study of cross reactivity study.
- Standardization of indirect- ELISA.

Progress made:

BTV serotypes 1, 2, 10, 16 and 23 have been passaged in BHK21 cell line for pentavalent vaccine standardization.

The passaged virus has been Titrated, Inactivated with BEI and Blended.

Primers for BTV-9, BTV-11, BTV-15 and BTV-22 have been procured and it will be checked in Hissar, Haryana agricultural university.

Hyper-immune sera have been raised in sheep. This can be utilized for cross reactivity study of vaccine strains.

Primes for serotyping i.e, BTV 3, 4, 5, 6, 7, 8, 12, 13, 14, 17, 18, 19, 20, 21 and 24 have been designed. Yet to be procured.

Monoclonals for BTV diagnosis are being developed

Development of pentavalent vaccine is under progress

Title: Ultramodern laboratory facility for production of vaccines against sheep diseases and zoonotic diseases

Objectives:

Establishment of ultra modern vaccine production for the vaccines against sheep diseases and zoonotic diseases

Progress made:

Land identified for the establishment of facility. Proposals for civil construction by Karnataka housing board submitted to government of Karnataka

Preliminary discussions were held for the designing of the lab as per CGMP and user requirements were conducted

Title: Modification of animal challenge facility for testing vaccines as per GMP

Objectives:

Establishment of Animal challenge facility for testing of vaccines as per GMP so as to carry out regulatory tests for vaccines.

Progress made:

Land has been identified and User requirements finalised.

Approval for Tender is obtained and further tendering for Design and execution of animal challenge facility is under progress.

Title: Livestock methane reduction through immunization based approaches

Objective:

Formulation of Species specific vaccine(s) for the active immunization of Cattle

Progress made:

Initial culture work has been started.

Prepared Standard operating procedures and standardized the culturing techniques for the anaerobic cultures

Title: Screening for Genetic Disorders in Breeding Bulls in Karnataka State

Objectives:

To develop infrastructural facility for diagnosis of genetic disorders at the Institute.

To screen the breeding bulls of semen stations for genetic disorders in Karnataka state.

Genetic characterization / Karyotyping of young bulls meant for breeding purposes in Karnataka state.

Progress made:

:

During the financial year 2016- 17 a total of 156 DNA samples were processed from blood samples by different DNA Isolation technique and preserved for further processing. All 156 DNA samples were subjected to PCR-RFLP technique and screened for genetic disorders like BLAD, BC, DUMPS and FXI deficiency in breeding bulls. Regarding the Karyotyping for chromosomal abnormalities, standardization of protocol has been done using 63 heparinised blood samples from different species till date. The regular karyotyping for newly introduced breeding bull calves have been carrying out in all Karnataka Breeding bull Farms. A total of 9 samples have been processed and 7 samples are under processing.

Title: Development of bicistronic DNA vaccine for Classical Swine Fever with GM-CSF as a molecular adjuvant

Objectives:

To clone and evaluate CSF E2 as an immunogen.

To clone, express and characterize porcine GMCSF.

To construct a bicistronic messenger producing DNA vaccine with E2 and GMCSF genes using FMDV IRES.

To evaluate the construct as a vaccine candidate in vitro and in vivo studies.

Progress made:

- Designed primers for E2 specific region.
- PK-15cells infected with CSFV vaccine virus.
- Isolated RNA from the infected cells and synthesised cDNA.
- Amplified E2 specific gene and cloned into TA vector.
- Clone confirmed by RE digest and sequence analysis.

Title: Providing Equipments to Disease Diagnostic Laboratory Bagalkot (Bagalkot Dist), Kolar (Kolar Dist), Sira (Tumkur Dist) and Sirsi (Uttara Kannada Dist)

Outcome:

- Laboratories have been Established during 2013-14
- Equipments have been purchased
- Staff for the said laboratory is by deputation of veterinary officer from Dept of AH and VS, Govt of Karnataka and parastaff (Technicians and Attenders) through out sourcing
- New laboratory building are being constructed at Sira, Kolar and Sirsi

Title: Development of combined sheep pox and peste des petits ruminants' vaccine for small ruminants

Objectives:

- Developing a cost effective combined Sheep pox and PPR vaccine
- Standardization of the dose for the vaccine
- Evaluation of the vaccine for sterility, safety and potency.
- Evaluating the immune response of combined SP and PPR vaccine under laboratory conditions.
- Evaluating the immune response of combined SP and PPR vaccine under field conditions

Progress made:

- Vaccine is prepared and needs to be evaluated for immune response

Title: Standardization of dose reduction of H S vaccine

Objectives:

- Production of HS vaccine by fermentation technology
- Standardization of dose reduction from 5 ml to 2 ml by following parameters as per IP standards:
 - Nephelometric or turbidometric readings
 - Biomass – dry weight of the culture
 - Colony forming units per ml of the culture
- To evaluate the dose reduced vaccine under experimental conditions.
- To evaluate the dose reduced vaccine under field conditions.
- To study the immune response by PHA, ELISA.

Progress Made:

Production and standardization of dose reduced HS vaccine
Safety, sterility test done and found to be safe and sterile.
Potency test done in rabbits and mice and found to be potent.
Evaluation of vaccine in rabbits and in calves.
Study of humoral immune response by PHA.

Title: Standardization of dose reduction of Black Quarter vaccine

Objectives:

Production of BQ vaccine by fermentation technology
Standardization of dose reduction from 5 ml to 2 ml by following parameters as per IP standards:

- Nephelometric or turbidometric readings
- Colony forming units per ml of the culture

To evaluate the dose reduced vaccine under experimental conditions.
To evaluate the dose reduced vaccine under field conditions.
To study the immune response by PHA, ELISA and Flow cytometry.

Progress Made:

Production and standardization of dose reduced HS vaccine
Safety, sterility test done and found to be safe and sterile.
Potency test done in rabbits and mice and found to be potent.
Evaluation of vaccine in rabbits and in calves.
Study of humoral immune response by PHA.

Title: Development and evaluation of HS and BQ combined vaccine using alum as an adjuvant by fermentation technology

Objectives:

Production of HS and BQ combined vaccine
To evaluate the vaccine under controlled conditions
To evaluate the vaccine under field conditions
To study the immune response by PHA and ELISA

Progress Made:

Production and standardization of dose reduced HS and BQ vaccine
Safety, sterility test done and found to be safe and sterile.
Potency test done in rabbits, mice, G. Pig and found to be potent.
Evaluation of vaccine in rabbits, G. Pig and in calves.

Title: Establishment of Hematological and biochemical profile of Deoni of cattle

Objective:

- To establish normal haematological reference values for Deoni breed of cattle
- To establish normal serum biochemical reference values for Deoni breed of cattle
- Screening for genetic disorders

Progress Made:

- In all fifty five blood samples with and without anticoagulant were collected from Deoni breed of animals across Bidar district taking representation from all the taluks.
- Hematological analysis of the samples is completed.
- Biochemical analysis of the samples is completed.
- Statistical analysis is in progress.

Title: Establishment of Hematological Profile of Malnadgidda breed of cattle

Objective:

- To establish the normal hematological reference values/profile for Malnad Gidda breed of cattle.
- Screening for genetic disorders.

Progress Made:

- 109 samples have been collected from Uttara Kannada district taking representation from all the taluks.
- Hematological analysis of the 109 samples is complete.
- Statistical analysis is in progress.

Title: Study of the hematological and serum biochemical profile of calves affected with pot belly / pendulous abdomen condition

Objective:

- To establish haematological profile of pot belly condition in Malnad Gidda breed of cattle.
- To establish serum biochemical profile of pot belly condition in Malnad Gidda breed of cattle.
- To ascertain parasitic load in calves affected with pot belly/pendulous abdomen condition.

Progress made:

Sample collection from all the taluks of Uttara Kannada district and laboratory analysis of the same is in progress.

1. Screening for Sexually Transmitted Diseases, carried out during 2016-17:

<i>Sl. No.</i>	<i>Scientists Involved</i>	<i>Date and Place</i>	<i>Disease suspected</i>

LIVESTOCK RESEARCH AND INFORMATION CENTER (SHEEP), NAGAMANGALA

Title: Mega Sheep Seed Project (Mandy Sheep) (ICAR funded project)

Preliminary survey was done for updating of flock status in the home tract area of Mandy sheep.

Strengthened conservation of Mandy sheep in the form of *in-situ* conservation by establishing elite Mandy sheep seed flock as nucleus breeding unit at LRIC(S), Nagamangala, KVAFSU, Mandy (Dist), Karnataka.

The overall goal of MSSP-MS is genetic improvement of Mandy Sheep through selective breeding and supply of elite breeding rams to the beneficiary farmers and conservation of elite germplasm in the form of In-situ conservation.

Since inception of the project, 727 farmers have been registered and grouped under one of the six working centers (grouped 1060 to 5446 sheep per center) that are under operation in the home tract of Mandy sheep.

During the financial year ending 31st March, 2017, 50 elite breeding rams have been distributed to the beneficiary farmers in the field to cover 2103 breedable ewes.

Since from the inception of the project a total of 283 elite breeding rams that were born and raised at the farm were distributed to the identified 292 farmers in the home tract to cover their 10,339 breedable ewes.

A total of 279 breeding ewes and 10 elite breeding rams are being maintained for the purpose of breeding and production of elite germplasm at the farm.

Tupping and lambing per centage based on ewe available basis was found to be 97.07per cent and 92.89per cent, respectively, whereas the lambing per centage on tupped basis was at 97.03 per cent.

Live body weight during 2016-17 at birth, 3 - month, 6 - month, 9 - month and 12 -month of age were recorded to be 2.10 ± 0.01 , 10.62 ± 0.07 , 15.14 ± 0.10 , 17.30 ± 0.10 and 21.14 ± 0.17 kg, respectively.

The fleece yield was documented as 273.29 ± 7.79 and 268.66 ± 6.15 g for first six month and adult six month fleece yield, respectively.

Performance of the distributed breeding rams and their progeny from beneficiary flocks at field level is being monitored on regular basis.

A total of 3470 progenies were born to the distributed elite rams in the beneficiary field flock.

Live body weight of the progenies of distributed rams during the period 2016-17 at birth, three, six, nine and twelve months of age were recorded to be 2.07 ± 0.01 , 10.49 ± 0.03 , 15.47 ± 0.03 , 17.48 ± 0.04 and 21.27 ± 0.09 kg, respectively.

The growth performance of the progenies of the distributed ram has been showing improvement from year to year in all the age groups over the average of base population.

Awareness program to beneficiaries regarding silage making, straw enrichment and proper utilization of fodder and other feed resources.

Encouraging the progressive farmers regarding breed conservation.

Oestrus synchronization and Artificial Insemination in the ewes maintained at farm and field.

INSTITUTE OF WILDLIFE VETERINARY RESEARCH, KODAGU

Title: Prevalence of gastrointestinal parasites of Captive Asian Elephants (*Elephas maximus*)

A total of 63 faecal samples from captive elephants belonging to Elephant camp Sakrebail and Elephant camp Dubare were collected and examined for the presence of parasitic eggs.

Title: Study on urine constituents of Captive Asian Elephants (*Elephas maximus*)

A total of 11 urine samples from apparently healthy captive elephants from Elephant camp Sakrebail have been analysed by urine analysis using Urine analyzer.

FISHERIES RESEARCH AND INFORMATION CENTER, ANKOLA

Title: All India Network Project on Mariculture

I. *Sillago sihama*

Developed probiotic holding and rearing system for rearing juvenile fish

Developed feed for rearing juveniles and broodstock fish

Achieved captive maturation of gonads both in male and female fish

II. *Chanos chanos*

Broodstock development in progress and the fish has attained a weight in the range of 1.5 to 1.8 kg.

Gonadal maturation has shown immature growth, thin thread like.

III. Fish seed resource survey for establishing seed bank

The fish seed survey revealed prioritized fish species like sand whiting, paampano, mullets and red snapper along the coast of Uttara Kannada Dist.

IV. Participatory cage culture

1. One training programme on open sea cage aquaculture has been conducted and 41 fishermen participated in the programme.

2. a) To study the feeding ecology in order to minimize the wastage of feed and optimize the growth.

b) Utilization of vast brackish water area of Karwar coast for pearl spot culture and to encourage the individual farmers for the culture of pearl spot.

3. Growth and survival of Brackishwater fishes (mullets) in shrimp ponds (farm ponds).

CANINE RESEARCH AND INFORMATION CENTER, TIMMAPUR, BAGALKOT

Title: Livelihood Security through Mudhol hound rearing

Pups distributed to 244 beneficiaries (229 male + 258 female = 487 puppies) along with Puppy food and calcium and vitamins supplements.

Hundred dogs have been micro-chipped and registered with Kennel Club of India in Collaboration Mysuru Kennel Club Bengaluru and Society for Indian Breeds of Dogs, Bengaluru.

The beneficiaries are being educated regarding the care and management of puppies, pregnant animals and whelped animals.

ANIMAL HUSBANDRY POLYTECHNIC, SHIGGAON, HAVERI

Title: Livestock Support and Extension Activities under Sujala 3, Gadag district

Awareness among farmers is created regarding chaffing of fodder, fodder enrichment, fodder nursery, low fat and SNF problem in milk, sub-clinical mastitis, supplementary feeding during late gestation etc.

At four villages four fodder nurseries are established.

Fifteen on farm demonstrations on fodder enrichment are conducted. Twenty five farmers adopted urea ammoniation of straw. Twenty five farmers have adopted direct urea feeding with straw.

Thirty three per cent animals found to be positive for sub-clinical mastitis.

Lift designed for downer cows has been successful with five animals out of seven tried.

3. Research Collaborations / MoUs:

(i) List of MOU's signed by the University at International Level

#	Institutions involved in MOU	Date of MOU	Details Regarding MOU	Remarks
COLLEGE OF FISHERIES, MANGALURU				
1	University of Exeter, United Kingdom	29.06.2016	MOU signed as part of Indo-UK, DBT-BBSCR Aquaculture project titled Novel molecular approaches for advancing prediction and mitigation of disease outbreak in aquaculture for small scale farmers. This 3 years project funded by Department of Biotechnology, Govt. of India is operated by Dr. M.N. Venugopal as Principal Investigator at the College of Fisheries, Mangaluru	-

(ii) List of MOU's signed by the University at National Level

#	Institutions involved in MOU	Date of MOU	Details Regarding MOU	Remarks
VETERINARY COLLEGE, SHIVA MOGGA				
1	ICAR-National Research Centre on Pig, Guwahati	11.06.2016	Facilitation of collaborative research	Executed for the functioning of the ITRA sponsored eVaraha project
2	National Research Centre, Pigs Guwahati	2016	e-Varaha: Information System for safe pork production in Eastern India – Pig Parasites	
3	Indian Institute of Technology, Guwahati	2016	e-Varaha: Information System safe for pork production in Eastern India – Pig Parasites	
VETERINARY COLLEGE, HASSAN				
1	Karnataka Livestock Development Agency	24.01.2017	Filed performance recording and herd registration of Hallikar cattle breed project with budget outlay of 55 lakhs for 3 years	
DAIRY SCIENCE COLLEGE, BENGALURU				
1	Karnataka Veterinary, Animal and Fisheries Sciences University (KVAFSU), Bidar through its constituent	23.01.2017	Installation of 30 MTPD Milk Powder Plant at DHAMUL, Dharwad. Establishing Modern Milk Powder Plant by way of	Work is in progress.

Institute Dairy Science College (DSC), Hebbal, Bengaluru; and Dharwad, Haveri, Gadag and Uttar Kannada District Co-Operative Milk Producers' Societies Union Ltd. (DHAMUL) Dharwad		economical designing and extending engineering consultancy services by DSC, Bengaluru @ 1 per cent of total project cost of Rs.26,50,00,000/=

1	RVC, Meerut, Lucknow	12.02.2017	Induction of Mudhol Hound Dogs into Indian Army

4. Patents: - Nil -

5. Technology Developed:

VETERINARY COLLEGE, BENGALURU

Utilization of maize cob and husk as roughage component in complete feed block for feeding small ruminants under intensive production system.

The novel technique of preserving the biological specimens by Plastination method is being developed utilizing Environmental Pollutants for the first time in the country.

Conferred Centre for Innovative Science Education (CISE) award by Vision Group of Science and Technology, under Department of Science and Technology, Government of Karnataka, to the tune of 30 lakhs for a period of three years. The project approved is "Flash based innovative technique as an aid in teaching Veterinary Anatomy". The first installment of Rs.10.00 lakhs was released for operation of the project.

Hip Implants for total Hip replacement for dogs.

VETERINARY COLLEGE, HASSAN

Preparation of value added concentrate feed blocks for economical chevon production.

Preparation of total mixed ration using maize cob byproduct for dairy cattle.

Leguminous fodder tree seed treatments and tree fodder seedling production has been standardized. The same may be included in the package of practice for further practice by the farmers.

DAIRY SCIENCE COLLEGE, BENGALURU

Phenotyping of lactic acid bacteria are optimized by the Department of Dairy Microbiology.

6) (a) Awards/Recognitions

#	Name of the Scientist	Award	Year	Agency
VETERINARY COLLEGE, BENGALURU				
1	T.M. Prabhu	Fellow of Animal Nutrition Association	2016	Animal Nutrition Association of India
2	S.B. Prasanna	Recognized as Key Driver for Animal Welfare	2016	World Animal Protection, Bangkok, Thailand
3	Y.B. Rajeshwari	NAKULA	2016	KVA, Bengaluru
4	Y.B. Rajeshwari	Certificate of Appreciation	2016	IAWV-KC, DAHandVS and KVC
5	Mahadevappa, D. Gouri	Certificate of Appreciation	2016	ACAW, Annual Key Driver Workshop, World Animal Protection, Kuala Lumpur, Malaysia
6	Pavan Belakeri, K. Satyanarayan and V. Jagadeeswary	Best Paper Award	2016	12 th Kannada Science Congress
7	Pavan Belakeri, K. Satyanarayan, Jagadeeswary, S. Yathiraj, K.C. Veeranna and Y.B. Rajeshwari	Best Paper Award	2016	KVA- 2016 Technical Symposium
8	V. Jagadeeswary	Certificate of Excellence	2016-2017	International Journal of Livestock Research – Member of Scientific Advisory Board
9	K. Satyanarayan	Certificate of Merit	2017	KVAFSU
10	Pavan Belakeri, K. Satyanarayan, V. Jagadeeswary, S. Yathiraj, K.C. Veeranna and Y.B. Rajeshwari	Best Paper Award	2017	8 th National Extension Education Congress
11	Dhoolappa, R.V. Prasad and K.V. Jamuna	Session- Oral Presentation, Dr. G. Rajeshwar Rao Memorial Award and Medal	-	-

12	Ganga Naik , R.V. Prasad and K.V. Jamuna	Session- Dr. Md. Hafeezuddin Silver Jubilee Medal and Award for Best Paper in Gross Anatomy	-	-
13	D. Rathnamma	Reviewer Excellence Award	16 th November, 2016	Agricultural Research Communication Centre (ARCC) Journals -Indian Journal of Animal Research and Asian Journal of Dairy and Food Research.
14	A. K. Santosh Ph.D. Scholar	Best Poster Presentation Award	9 th to 10 th July, 2016	18 th National Conference of Association for Prevention and Control of Rabies in India (APCRI) held at Bengaluru
15	R. Sharada Ph.D. Scholar	Best Oral Presentation Award	9 th to 10 th July, 2016	18 th National Conference of Association for Prevention and Control of Rabies in India (APCRI) held at Bengaluru
16	N. Kavya	Prof. M.K. Shingatgeri Memorial Young Scientist Award	2016	VI th Conference of Society of Toxicologic Pathology-India
17	N. Vijayakumar	Best Poster Award	2016	VI th Conference of Society of Toxicologic Pathology-India
18	Jagadeesh, S. Sanganal, Prem Kumar and C. Ravikumar	Best Poster Award	2016	ISVPT-2016, "Animal Health and Production: Challenges and Opportunities in Veterinary Pharmacology and Toxicology", 23 rd -25 th November, 2016, Navsari
19	L.V. Lokesh, Jagadeesh, S. Sanganal, S. Yogesh Gowda and Shekar	Best Poster Award	2016	STOX-2016, "International Conference on New insights and Multidisciplinary Approaches in Toxicological Studies", 03 rd -05 th August, 2016, Amity University, New Delhi.
20	C. Ravikumar, Jagadeesh, S. Sanganal, H.D. Narayanaswamy, U. Sunilchandra and C.R. Santhosh	Best Oral Presentation Award	2017	ICASVM 2017, 19 th International Conference on Animal Science and Veterinary Medicine. Paris, France, February 23 rd -25 th , 2017.

21	Jagadeesh, S. Sanganal	Reviewer Excellence Award	2016	ARCC Journals, ICAR, New Delhi
VETERINARY COLLEGE, BIDAR				
1	S.M. Usturge	Life Time Achievement Award	2016	12 th Kannada Science Congress, KVAFSU, Bidar
2	Laxman Naik, B.G. Ravindra, Vinay Tikare, Shrikant Kulkarni, Siddalingaswamy Hiremath, Vivek. R. Kasaralikar and N.A. Patil	Best Poster Presentation	2017	Indian Society for Veterinary Medicine
3	Vinay, P. Tikare	Certificate of Excellence in Reviewing	2016	International Journal of Livestock Research
4	Vinay, P. Tikare	Advisory Board Member for IJLR Journal	2016	International Journal of Livestock Research
5	D.T. Naik	Best Poster Presentation Award	2016	IAVP
6	J. Adeppa	Young Scientist	2016	2 nd year VIRA awards, Annual Research Meet at Chennai
7	J. Adeppa	Certificate of Appreciation	15 th -17 th Feb., 2017	Participated in JP Dubey Young Scientist Award in IAAVP Conference at Shivamogga
8	D. Dilipkumar	Young Scientist Award	2016-17	Swadeshi Vignyana Andolana, Kannada Vignyana Sammelana Karnataka
9	G.K. Megha, B. Bhagavantappa, B.V. Shivaparakash, D. Dilipkumar and D. Jahangir	First Prize for Best Clinical Case Presentation Award by UG student	2016-17	TANUVAS, Madras Veterinary College, Chennai
10	B.G. Ravindra, Yallappa Ingle, Shivamurth Vakare, Anantrao Desai, Trupti and N.A. Patil	Best Poster Presentation – First Place	2017	Indian Society for Veterinary Medicine
11	B.G. Ravindra, Harish Kulkarni, Shivamurthy Vakare and P.K. Patil	Best Oral Presentation – Third place	2017	Indian Society for Veterinary Medicine
12	B. Ramachanadra	Certificate of Excellence	2016	International Livestock Research Journal

13	Prakashkumar Rathod	Editorial Board Member, IJVSBT	2017	Indian Journal of Veterinary Science and Biotechnology
VETERINARY COLLEGE, SHIVAMOGGA				
1	K.J. Ananda	Received Young Research Forum Award	2016	International Conference on Medical Parasitology and Zoology at Houston, Texas, USA 17 to 19 October 2016.
2	K.J. Ananda	Certificate of Recognition for Review Article Presentation	2016	International Conference on Medical Parasitology and Zoology at Houston, Texas, USA 17 to 19 October 2016.
3	K.J. Ananda	Smt. Nishamani Parija Memorial Oration Award	2017	Indian Association for the Advancement of Veterinary Parasitology during 26 th NCVP and International Symposium
4	K.J. Ananda	Best Poster Award for “Studies on <i>Dirofilaria repens</i> infection in dogs of Mangaluru regions of Karnataka”	2017	During 26 th NCVP and International Symposium under the aegis of Indian Association for the Advancement of Veterinary Parasitology, at Veterinary College, Shivamogga
5	K.J. Ananda	Best Poster Award for “Diagnosis and Management of tick bites in humans due to <i>Haemophysalis spinigera</i> in Kyasanur Forest disease endemic regions of Shivamogga”	2017	During 26 th NCVP and International Symposium under the aegis of Indian Association for the Advancement of Veterinary Parasitology at Veterinary College, Shivamogga
6	K.J. Ananda	Best Poster Award for “Babesiosis in cross breed Jersey cattle and its confirmatory diagnosis by polymerase chain reaction”	2017	During 26 th NCVP and International Symposium under the aegis of Indian Association for the Advancement of Veterinary Parasitology at Veterinary College, Shivamogga
7	Dhoolappa Melinamani	BIRAC-SRISTI-2016 Grant Award	4 th May, 2016	Biotechnology Industry Research Assistance Council (BIRAC)-SRISTI (Society for Research and Initiatives for Sustainable Technologies and Institutions), Dept of Biotechnology, GOI

8	Dhoolappa Melinamani	BZZWINGS-2016 (2 nd Prize)	24.09.2016	NSRCEL ,IIM Bengaluru
9	Dhoolappa Melinamani	Dr. G. Rajeshwar Rao Memorial Award and Medal	21 st -23 rd Dec., 2016	XXXI IAVA National Symposium, Hyderabad
10	Dhoolappa Melinamani	CAMTech X: Jugaad-a-thon-2017 (3 rd Prize)	11 th -12 th , March, 2017	Consortia for Affordable Medical Technologies, (CAMTech), Massachusetts Genaral Hospital In association with Manipal University, Manipal
VETERINARY COLLEGE, HASSAN				
1	M.S. Vasanth	Life Time Achievement ward	2016	12 th Kannada Science Congress, KVAFSU, Bidar
2	M.S. Vasanth	S.S. Mishra Award for Best Paper published in Journal of Small Animal Practice	2017	Indian Society for Advancement of Canine Practice at Pantnagar, Uttarkhand
3	H.S. Madhusudan, H. Dhanalakshmi, K. Hemanth Gowda, P.S. Banakar and C.D. Dharnesh	Best Poster-2 nd Prize	2017	ISSGPU, ICAR-CSWRI, Avikanagar
4	B.C. Girish	II Prize in oral presentation	February, 2017	National conference Trends in cancer research under one health concept, Organised by Dept of VSR, College of Veterinary Science, Tirupati
5	R. Jayashree	Best Paper	22 nd -23 rd May, 2016	Karnataka Veterinary Association at Bengaluru
6	R. Jayashree	Best Oral Presentation	17 th -19 th January, 2017	Indian Society of Animal Genetics and Breeding at IVRI, Izatnagar
7	S. Ganga Naik	Best Paper Award	2016	Indian Association of Veterinary Anatomists (IAVA)
8	M. Nithya Priyadarshini, K. Kavitha, M. Veena, H. Dhanalakshmi, V. Awathanarayananappa and D.R. Manjunath	Third Best Clinical Case Presentation	2016	TANUVAS, Chennai, Tamilnadu
9	S.P. Manjunath, H. Dhanalakshmi, C.T. Chandregowda and Placid E. D'Souza	Third Prize for Oral Presentation	2017	IAAVP, National congress of Veterinary Parasitology

10	C. Ravikumar	Best Oral presentation Award	2017	ICASVM-2017 Paris, France
11	N.S.S. Unit	National Young Leader Programme Award	2015-16	Ministry of Youth Affairs and Sports, Government of India

COLLEGE OF FISHERIES, MANGALURU

1	Gangadhara Gowda	Diploma and Silver Medal for an outstanding contribution in the field of teaching and research in Fisheries	2016	International Biographical Centre, Cambridge, England
2	Gangadhara Gowda	Listed in 2000 Outstanding Intellectuals of the 21 st Century,	2016	International Biographical Centre, Great Britain
3	M.N. Venugopal	KVAFSU Merit Certificate	2016	KVAFSU
4	E.G. Jayaraj	KVAFSU Merit Certificate for bring extramural funding	2016	KVAFSU

CANINE RESEARCH AND INFORMATION CENTER, TIMMAPUR, BAGALKOT

1	Mahesh, S. Dodamani	Breed Saviour Award 2015	2015-16	Kamalnayan Jamnalal Bajaj Foundation
2	Mahesh, S. Dodamani	Achiever Award 2016	2016-17	Society for Advancement of Human and Nature (SADHNA), Dr YS Parmar University of Horticulture and Forestry, Nauni, Solan, Himachal Pradesh
3	Ramanna, V. Gasti Farmer of Mudhol	Breed Saviour Award 2016	2016-17	Kamalnayan Jamnalal Bajaj Foundation

(b) Research Incentives

#	Name and Designation of the P.I	Title of the Project	Funding Agency and Status	Date of Sanction	Duration	Cost of Project (Rs. in Lakhs)
<i>I) Project(s) worth of Rs. 100.00 lakhs and above (Rs. 15000 + Certificate of Merit to PI)</i>						
-	-	-	-	-	-	-
<i>II) Project(s) worth of Rs. 50.00 lakhs and up to Rs. 100.00 lakhs (Rs. 10000 + Certificate of Merit to PI)</i>

<i>IV) Project(s) worth of Rs. 5.00 lakhs and up to Rs. 25.00 lakhs (Certificate of Merit to PI)</i>						
1	K. Satyanarayan, Professor and Head Dept. of VAHE, VCH, Bengaluru	Develop and Evaluate Use of Mobile Applications for Livestock Farming: A New Generation 'Technology Transfer Sustainable Livestock Production	ICAR	2016	-	9.20

7) Important decisions taken during 11th Research Council Meeting held on 28.06.2016 at KVAFSU, Bidar

1. Hon'ble Vice-Chancellor and Chairmen of the Research Council emphasized the need based and farmer oriented research need to be undertaken in the University. Periodical review of all the projects should be done by the Heads of the Divisions/ADR/DR for its expected outcome. He expressed that the University Scientists should know the availability of crop residues in a particular year to overcome the fodder scarcity especially during the draught period in the state.
2. For this a committee at University level may be constituted involving Heads of Animal and Poultry Divisions as Chairman and other Heads of Divisions as Members.
3. He Complemented the Nutritionists of the University for coming out of the innovation of making complete ration feed blocks and use of spineless cactus as nutritious diet for small ruminants.
4. He suggested conserving the indigenous breeds viz. Malnad Gidda Cattle, Hassan breeds of sheep, and Nandidurg breeds of sheep beside the recognized indigenous breeds of our state.
5. He also suggested for making the OSD KVAFSU, Bidar and ADR Bengaluru responsible for liasoning with the Department of Animal Husbandry regarding Research projects approved by the government agencies.

III. EXTENSION

The University is striving hard to improve the socio-economic conditions of the farming community through its extension education activities. In order to achieve this, the university is organizing training programmes, demonstrations, farmer-scientist interaction sessions, field visits, farm melas etc, through its constituent colleges and research stations spread across the state.

1. Conferences/Trainings/Workshops/Seminars organized

i) International Level

a) Conference:

#	Date	Place	Title	Organized by
VETERINARY COLLEG, SHIVAMOGGA (VCS)				
1	15.02.2017 to 17.02.2017	Veterinary College, Shivamogga	Current Concepts in Diagnosis and Control of parasitic diseases to combat climate change	Dept. of Veterinary Parasitology, Veterinary College, Shivamogga
VETERINARY COLLEG, HASSAN (HVC)				
1	24.02.2017 to 25.02.2017	Hassan Veterinary College	19 th Asian Regional Meet of Commonwealth Veterinary Association and International Conference on “Control of Zoonotic Diseases – A One Health Initiative”	Dr. Sharada, R., - Organizing Secretary

b) Workshops:- Nil-

c) Seminars: – Nil-

d) Trainings:

#	Date	Place	Title	Organized by
INSTITUTE OF ANIMAL HEALTH & VETERINARY BIOLOGICALS, BENGALURU (IAH&VB)				
1	02.05.2016 to 13.05.2016	USDA- APHIS training at SRDDL, Bengaluru	Basic Veterinary Epidemiology	United State Department of Agriculture (USDA)-APHIS SRDDL, IAH&VB

ii) National Level

a) Conference:- Nil -

b) Workshops

#	Date	Place	Title	Organized by
VETERINARY COLLEGE, BENGALURU (VCH)				
1	05.07.2016 to 08.07.2016	VMC- Veterinary College, Hebbal	Rabies Diagnosis and Quality Management Proficiency Tests	Dept. of Microbiology , Veterinary College, Bengaluru
2	21.02.2017 to 23.02.2017	VMC- Veterinary College, Hebbal	Rabies Diagnosis and Quality Management Proficiency Tests	Dept. of Microbiology Veterinary College, Bengaluru
3	26.08.2016	Veterinary College, Hebbal	Cadaver donation for Research studies	Veterinary College, Bengaluru and PETA Dr. L. Ranganath, Prof. & Head served as Coordinator
VETERINARY COLLEGE, BIDAR (VCB)				
1	04.07.2016 to 05.07.2016	College of Veterinary Science, Hyderabad	Regional workshop on Mentoring Young Extension Professionals for conduct of Scientific Research	IVEF, Puducherry; SPVNR-TSUVAFS, Hyderabad & KVAFSU, Bidar
VETERINARY COLLEGE, SHIVAMOGGA (VCS)				
1	23.07.2016	Veterinary College, Shivamogga	the workshop entitled “Ethics and Welfare issues in animal experiments”	Dept of Pharmacology & Toxicology and IAEC, VCS worked as Joint Organizing Secretary
VETERINARY COLLEGE, HASSAN (HVC)				
1	24.09.2016	Veterinary College, Hassan	Nutritional interventions to optimize productivity in livestock	Veterinary College, Hassan and NABARD, Bengaluru
2	21.12.2016	Veterinary College, Hassan	Management of livestock during fodder scarcity	Veterinary College, Hassan and NABARD, Bengaluru

3	25.01.2017	Veterinary College, Hassan	Welfare, ethics and experimentation in laboratory animals	Dept of Veterinary Pharmacology & Toxicology, Veterinary College, Hassan
4	30.12.2016	Veterinary College, Hassan	Conservation and management of indigenous cattle breeds	Dept of Animal Genetics & Breeding, Veterinary College, Hassan
5	02.03.2017	Veterinary College, Hassan	Fodder management during drought	Veterinary College, Hassan. Dr. Chandrashekhar, K.M., was the organizing Secretary – under SCP-TSP Grant

COLLEGE OF FISHERIES, MANGALURU (FCM)

1	26.08.2016	College of Fisheries, Mangaluru	Surveillance Programme for Aquatic Animal Diseases	College of Fisheries, Mangaluru
---	------------	---------------------------------	--	---------------------------------

INSTITUTE OF ANIMAL HEALTH & VETERINARY BIOLOGICALS, BENGALURU (IAH&VB)

1	19.09.2016	Institute of animal Health & Veterinary Biologicals, Bengaluru (IAH&VB)	SRDDLL, IAH&VB, Workshop, Brucellosis, IAH&VB	All Scientists of SRDDLL
---	------------	---	---	--------------------------

INSTITUTE OF WILDLIFE VETERINARY RESEARCH, KODAGU (IWVR)

1	28.12.2016	IWVR Doddaluvara	Crop damage by Wild Animals and its Control measures	IWVR, Doddaluvara
2	21.02.2017	IWVR Doddaluvara	Chemical immobilization of Wild Animals	IWVR, Doddaluvara
3	22.02.2017	IWVR Doddaluvara	Crop damage by Wild Animals and its Control measures	IWVR, Doddaluvara

c) Seminars:

#	Date	Place	Title	Organized by
VETERINARY COLLEGE, BENGALURU (VCH)				
1	17.06.2016 to 18.06.2016	Veterinary College, Bengaluru	Annual Review meeting of ICAR- Outreach Programme on Zoonotic Diseases (OPZD)	Dept. of Veterinary Public Health, Veterinary College, Bengaluru
2	06.07.2016	Veterinary College, Bengaluru	Programme on “World Zoonoses Day – 2016”	Dept. of Veterinary Public Health, VCH in collaboration with Associate Director Extension, Regional campus, Veterinary College Bengaluru
3	24.03.2017	Veterinary College, Bengaluru	Programme on “World Tuberculosis Day – 2017”	Department of Veterinary Public Health and Epidemiology, VCH in collaboration with National Tuberculosis Institute, Bengaluru
INSTITUTE OF WILDLIFE VETERINARY RESEARCH, KODAGU (IWVR)				
1	05.10.2016	College of Forestry, Ponnampet, Virajpet Taluk	“Biology, behaviour and management of Snakes” by Dr.Karthik, Urban Wildlife Hospital, Uttarahalli, PFA, Bangaluru	IWVR-Doddaluvara
2	06.10.2016	PG Centre, Mangaluru University, Chikkaluvara Kodagu Dist	“Importance of Wildlife” by Dr.K.Ganesh Udupa, Director, IWVR, Doddaluvara	IWVR-Doddaluvara

d) Trainings:

#	Date	Place	Title	Organized by
VETERINARY COLLEGE, BENGALURU (VCH)				
1	09.08.2016	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers – 36	EEC & Dept. of VAHEE
2	18.08.2016	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers - 38	EEC & Dept. of VAHEE
3	30.08.2016	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers - 40	EEC & Dept. of VAHEE
4	20.09.2016	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers – 47	EEC & Dept. of VAHEE
5	01.12.2016	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers - 47	EEC & Dept. of VAHEE
6	16.03.2017	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers - 42	EEC & Dept. of VAHEE
7	24.03.2017	RKVY Seminar Hall	One day training programme on Sheep and Goat Farming Farmers - 55	EEC & Dept. of VAHEE
8	29.12.2016	Yeliyuru village	One day Interaction programme on “Scientific livestock farming” Farmers - 35	EEC & Veterinary College, Bengaluru
9	07.11.2016 to 27.11.2016	CAFT, Veterinary College, Bengaluru	Clinical parasitological techniques and molecular methods in the detection of parasitic diseases	Centre of Advanced Faculty Training in Veterinary Parasitology funded by ICAR
10	13.03.2017	Veterinary College, Bengaluru	‘Hygienic production of foods of animal origin and food safety’ for the benefit of SHG’s farmers, animal attendants	Dept. of Veterinary Public Health and Epidemiology, Veterinary College, Bengaluru
11	05.01.2017 to 07.01.2017 and every fortnight	Veterinary College, Bengaluru	Hands on Training on “Analytical Equipment”	Department of Pharmacology and Toxicology, Veterinary College, Hebbal, Bengaluru
12	09.03.2017 to 11.03.2017	Veterinary College, Bengaluru	Administrative Training for Teaching and Non-teaching staff	Department of Pharmacology and Toxicology, Veterinary College, Hebbal, Bengaluru

13	19.08.2016	Veterinary College, Bengaluru	Training on management of Equines in High altitude and frontier regions	Veterinary College, Bengaluru and Army Service Corp.
14	16.02.2017	Veterinary College, Bengaluru	Training on management of Equines in High altitude and frontier regions	Veterinary College, Bengaluru and Army Service Corp.
VETERINARY COLLEGE, BIDAR (VCB)				
1	19.01.2017 to 28.01.2017	Veterinary College, Bidar	Skill development for rural unemployed youth on animal husbandry and animal health care	Directorate of Extension KVAFSU, Bidar & SAMETI (North), Dharwad
2	12.07.2016	Veterinary College, Bidar	Estrus Synchronization and controlled breeding in infertile and repeat breeding cows and buffaloes	Dept. of VGO, VCB and Dept. of AHVS, Bidar (Aurad Taluk- 30 participant)
3	13.07.2016	Veterinary College, Bidar	Estrus Synchronization and controlled breeding in infertile and repeat breeding cows and buffaloes	Dept. of VGO, VCB and Dept. of AHVS, Bidar (Basavkalyan Taluk- 30 participant)
4	19.07.2016	Veterinary College, Bidar	Estrus Synchronization and controlled breeding in infertile and repeat breeding cows and buffaloes	Dept. of VGO, VCB and Dept. of AHVS, Bidar (Bhalki Taluk- 30 participant)
5	20.07.2016	Veterinary College, Bidar	Estrus Synchronization and controlled breeding in infertile and repeat breeding cows and buffaloes	Dept. of VGO, VCB and Dept. of AHVS, Bidar (Bidar Taluk- 30 participant)
6	26.07.2016	Veterinary College, Bidar	Estrus Synchronization and controlled breeding in infertile and repeat breeding cows and buffaloes	Dept. of VGO, VCB and Dept. of AHVS, Bidar (Humnabad Taluk- 30 participant)
7	16.05. 2016	Veterinary College, Bidar	Scientific Dairy Farming	EEC, Bidar & BRDS, Bidar
8	2.06. 2016	Veterinary College, Bidar	Scientific Dairy Farming	EEC, Bidar & BRDS, Bidar
9	27.12.2016	Veterinary College, Bidar	Farmer Scientists Interaction and Training Programme	EEC, Bidar
10	04.01.2017	Mustari	Scientific Goat Farming	EEC, Bidar
11	16.02.2017	Veterinary College, Bidar	Scientific Dairy Farming	EEC, Bidar

12	27.02.2017 to 28.02.2017	Veterinary College, Bidar	Scientific Dairy Farming	EEC, Bidar and Reliance Foundation, Bidar
13	20.03.2017 to 21.03.2017	Veterinary College, Bidar	Scientific Goat Farming	EEC, Bidar and Reliance Foundation, Bidar
14	25.03.2017	Hajnal (Bhalki)	Summer management of Dairy Animals	EEC, Bidar
15	27.03.2017	Alwai (Bhalki)	Summer management of Dairy Animals	EEC, Bidar
16	14.12.2016 to 17.12.2016	Veterinary College, Bidar	“Administrative Training Program” under the SCSP-TSP grants of 2016-17	Chairman, SCSP-TSP Grants of 2016-17

VETERINARY COLLEGE, SHIVAMOGGA (VCS)

1	06.03.2017 to 12.03.2017	Halejoga, Honnali Tq	NSS activity, Veterinary College, Shivamogga	NSS Unit, Veterinary College, Shivamogga
2	16.09.2016	Veterinary College, Shivamogga	Sheep and Goat rearing for Rural Empowerment	EEC, Shivamogga
3	03.10.2016	Veterinary College, Shivamogga	Exploration of problems in Sheep and Goat rearing	EEC, Shivamogga
4	25.11.2016	Veterinary College, Shivamogga	Preparation of milk products and different methods for detection of adulteration in milk and milk products	EEC, Shivamogga
5	07.12.2016	Veterinary College, Shivamogga	Sheep and goat farming	EEC, Shivamogga
6	09.02.2017	Veterinary College, Shivamogga	Scientific sheep and goat farming	EEC, Shivamogga
7	06.10.2016 to 07.10.2016	Veterinary College, Shivamogga	Sustainable dairy farming	Dept. of ILFC and Dept. of LPM, Veterinary College Shivamogga
8	23.07.2016	Veterinary College, Shivamogga	Ethics and Welfare Issues in Animal Experiments	Department of Veterinary Pharmacology & Toxicology In association with Institutional animal ethics committee (IAEC)

9	16.11.2016	Veterinary College, Shivamogga	Techniques in Experimental Pharmacology	Department of Veterinary Pharmacology & Toxicology In Association With AD instruments, South Asia, Bengaluru (INDIA)
VETERINARY COLLEGE, HASSAN (HVC)				
1	23.08.2016 to 25.08.2016	Veterinary College, Hassan	Improved Poultry Farming	Dept. of EEC, Veterinary College, Hassan
2	06.12.2016 to 08.12.2016	Veterinary College, Hassan	Scientific Goat Farming	Dept. of EEC, Veterinary College, Hassan
3	14.12.16 to 16.12.2016	Veterinary College, Hassan	Improved Dairy Farming	Dept. of EEC, Veterinary College, Hassan
4	04.01.2017 to 06.01.2017	Veterinary College, Hassan	Improved Pig Farming	Dept. of EEC, Veterinary College, Hassan
5	01.02.2017 to 03.02.2017	Veterinary College, Hassan	Improved Sheep Farming	Dept. of EEC, Veterinary College, Hassan
6	14.02.2017 to 16.02.2017	Veterinary College, Hassan	Scientific Rabbit Farming	Dept. of EEC, Veterinary College, Hassan
7	15.02.2017	Veterinary College, Hassan	Canine Rearing for Livelihood	Dept. of EEC, Veterinary College, Hassan
8	13.04.2016	Honnegowd anahalli, Gundlupet taluk	Fodder nursery Field day	KWDP-II Sujala-III Project, Chamarajanagar
9	31.05.2016	Kerehalli, Chamarajanagar Taluk	Enrichment of dry fodder	KWDP-II Sujala-III Project, Chamarajanagar
10	23.08.2016 to 25.08.2016	Veterinary College, Hassan	Ration Balancing Programme – Batch-VII	Dept. of VAHE Veterinary College, Hassan
11	06.12.2016 to 08.12.2016	Maleyuru, Chamarajanagar Taluk	Correction of low Fat & SNF in dairy animals	KWDP-II Sujala-III Project, Chamarajanagar
12	14.12.2016 to 16.12.2016	Veterinary College, Hassan	Ration Balancing Programme – Batch-VIII	Dept. of VAHE Veterinary College, Hassan

13	04.01.2017 to 06.01.2017	Kerehalli, Chamarajanagar Taluk	Awareness on Subclinical mastitis	KWDP-II Sujala-III Project, Chamarajanagar
14	01.02.2017 to 03.02.2017	Veterinary College, Hassan	Ration Balancing Programme – Batch-IX	Dept. of VAHE Veterinary College, Hassan
15	14.02.2017 to 16.02.2017	Veterinary College, Hassan	Ration Balancing Programme – Batch-X (Refresher training)	Dept. of VAHE Veterinary College, Hassan
16	15.02.2017	Maleyuru, Chamarajanagar Taluk	Selection of ram and breeding of sheep	KWDP-II Sujala-III Project, Chamarajanagar
17	13.04.2016	Veterinary College, Hassan	Ration Balancing Programme – Batch-XII	Dept. of VAHE, Veterinary College, Hassan
18	31.05.2016	Shivapura village, Gundlupet	Selection of ram and breeding of sheep	KWDP-II Sujala-III Project, Chamarajanagar
19	23.08.2016 to 25.08.2016	Veterinary College, Hassan	Improved poultry production	ILFC & CPDO&TI
20	06.12.2016 to 08.12.2016	Veterinary College, Hassan	Improved poultry production	ILFC & CPDO & TI
21	14.12.2016 to 16.12.2016	Veterinary College, Hassan	Field performance recording in Amrit Mahal Cattle	Dept. of AGB, Veterinary College, Hassan

DAIRY SCIENCE COLLEGE, HEBBAL, BENGALURU (DSCH)

1	01.06.2016	Hebbal, Bengaluru	Lecture cum demonstration on processing of milk	World Milk Day – Dairy Science College, Bengaluru
2	05.06.2016	Hebbal, Bengaluru	Plantation programme	World Environment Day - Dairy Science College, Bengaluru
3	19.06.2016 to 21.06.2016	Hebbal, Bengaluru	Yoga for the staff of the College	International Yoga Day - Dairy Science College, Bengaluru
4	29.07.2016	Harohally, Kanakapura	Talk on opportunities in Agriculture and Dairying	Government College, Harohally
5	03.08.2016	Bengaluru	Industrial consultancy	Dairy Science College, Bengaluru
6	21.12.2016	Bengaluru	Visit to SEDP by Shishu Vihar students	Dairy Science College, Bengaluru
7	07.01.2017	Bengaluru	Visit by Food Technology college student, Nasik	Dairy Science College, Bengaluru
8	18.01.2017	Hebbal, Bengaluru	Lecture on role of milk ingredients in bakery products	Bakery training unit, Hebbal, Bengaluru

9	25.01.2017	Hebbal, Bengaluru	Visit to SEDP by Jha, Director, Model Dairy Plant, NDRI, Karnal	Dairy Science College, Hebbal, Bengaluru
10	07.02.2017	Bengaluru	Industrial consultancy to Nagappa, Dairy Entrepreneur, Belguam	Dairy Science College, Hebbal, Bengaluru
11	07.02.2017	Bengaluru	Industrial consultancy to M/s Raghavendra Rao , Dairy Entrepreneur, Ananthapur, AP	Dairy Science College, Hebbal, Bengaluru

DAIRY SCIENCE COLLEGE, HEBBAL, KALBRUGI (DSCK)

1	10.01.2017 to 12.01.2017	DSCK (DT)	Value Added Paneer Products for Self Help Group (SHG) women	Dr. Sharanagouda B, Dr. Priyatam Reddy, Mr. Shankarlingayya, V. Sthavarmath, Mr. Shivakumar, Mrs Sumitra, M. and Mrs. Asha, S. Patil
2	06.02.2017 to 08.02.2017	DSCK (DM)	Management of Micro-Organisms	Dr. H. Manjunatha, Mr. Mahesh Patil and Ms. Basava Bharati
3	21.02.2017 to 23.02.2017	DSCK (DM)	Clean Milk Production	Dr. H. Manjunatha, Mr. Mahesh Patil and Ms. Basava Bharati
4	09.03.2017 to 11.03.2017	DSCK (DC)	Detection of food adulteration and its implications on health.	Mr. Rajanna and Ms. Priyanka
5	23.03.2017 to 25.03.2017	DSCK (DC)	The role of milk quality management on the backdrop of food safety Act.	Mr. Rajanna and Ms. Priyanka
6	13.02.2017 to 15.02.2017	DSCK (DT)	Making of Value added milk products training	Dr. Sharanagouda, B., Dr. Priyatam Reddy, Mr. Shankarlingayya, V. Sthavarmath, Mr. Shivakumar, Mrs Sumitra, M. and Mrs. Asha, S. Patil

COLLEGE OF FISHERIES, MANGALURU (FCM)

1	17.02.2017	Kumta Uttara Kannada District	Open sea fish farming in cages	Dept. of Aquaculture
2	20.01.2017	Kabini Fish seed farm, H.D.Kote	Disease diagnosis in Freshwater fishes and Health Management in Aquaculture	Dept. of Aquaculture

3	14.02.2017	Bhudhanooru Fish Seed Rearing and Training Centre, Mandya	Disease diagnosis in Freshwater fishes and Health Management in Aquaculture	Dept. of Aquaculture
4	15.04.2016 to 26.04.2016	College of Fisheries, Mangaluru	Basics of Bioinformatics for Biotechnology and Biosciences students of Mangaluru University	Dept. Fisheries Microbiology
5	28.12.2016 to 04.01.2017	College of Fisheries, Mangaluru	Training on Molecular Diagnosis of shrimp diseases	Dept. of Fisheries Microbiology
6	22.12.2016	Kadwada Karwar, UK dist	Awareness on National Surveillance Programme for Aquatic Animal Diseases	Dept. of Fisheries Microbiology
7	20.02.2017	Kundapura, Udupi District	Awareness on National Surveillance Programme for Aquatic Animal Diseases	Dept. of Fisheries Microbiology
8	25.07.2016 to 27.07.2016	Karwar	Training on creating awareness on responsible fisheries to coastal fishermen of Uttar Kannada dist	Dept. of FET (Under ATMA program of Agricultural Dept.)
9	19.02.2017 to 22.02.2017	Ernakulam, Kochi, Kerala	Use of modern fishing and Navigational equipment for the benefit of fishermen at CIFT and CIFNET, Kochi	Dept. of FET under ATMA program of Agricultural Dept
INSTITUTE OF ANIMAL HEALTH & VETERINARY BIOLOGICALS, BENGALURU				
1	20.12.2016	SRDDL, IAH&VB	Training on collection of brain samples for diagnosis of BSE	All Scientist's of SRDDLL
2	22.12.2016 to 23.12.2016	SRDDL, IAH&VB	Application of time micro PCR technology in STD screening	All Scientist's of SRDDLL
INSTITUTE OF WILDLIFE VETERINARY RESEARCH, KODAGU (IWVR)				
1	08.12.2016	IWVR, Doddaluvara	“Wild Animal Tranquilization” to the officers of DAH&VS of Bengaluru Rural, Kolar, Tumkur, Raichur and Kalaburgi districts	IWVR-Doddaluvara
2	09.12.2016	IWVR, Doddaluvara	Tranquilization of Wild animals” to the officers of DAH&VS of Koppal, Chikkaballapur, Yadgir, Bidar and Haveri districts	IWVR-Doddaluvara

LIVESTOCK RESEARCH AND INFORMATION CENTER (SHEEP), NAGAMANGALA

1	21.06.2016	LRIC, Nagmangala	One day training programme on “sheep and goat rearing” organized for the beneficiary selected under Pashubhagya Yojana of the Dept. of AH&VS	DAH&VS, K.R. Pete
2	07.10.2016	LRIC, Nagmangala	Sheep rearing and management	LRIC(S), Nagamangala
3	24.11.2016	LRIC, Nagmangala	Refresher training programme to the para-vets of the Dept. of AH&VS on various animal husbandry activities	LRIC(S), Nagamangala
4	23.12.2016	LRIC, Nagmangala	Refresher training programme to the para-vets of the Dept. of AH&VS on various animal husbandry activities	LRIC(S), Nagamangala
5	03.01.2017	LRIC, Nagmangala	Information on Sheep shed construction	LRIC(S), Nagamangala
6	19.01.2017	LRIC, Nagmangala	Importance of oestrus synchronization and artificial insemination in sheep	LRIC(S), Nagamangala
7	31.01.2017	LRIC, Nagmangala	Scientific methods of sheep and goat management	LRIC(S), Nagamangala
8	03.02.2017	LRIC, Nagmangala	Scientific methods of sheep and goat management	LRIC(S), Nagamangala
9	03.02.2017	LRIC, Nagmangala	One day training programme on sheep rearing	LRIC(S), Nagamangala
10	22.02.2017	LRIC, Nagmangala	One day training programme to VLI on importance of conservation of Mandya Sheep	AH&VS, Nagamangala
11	23.02.2017	LRIC, Nagmangala	One day training programme on oestrus synchronization and Artificial insemination in sheep	DAH&VS, K.R. Pete
12	04.03.2017	LRIC, Nagmangala	One day training programme on Sheep rearing and management	LRIC(S), Nagamangala
13	16.03.2017	LRIC, Nagmangala	One day training programme on oestrus synchronization and Artificial insemination in sheep	LRIC(S), Nagamangala
14	31.03.2017	LRIC, Nagmangala	Scientific methods of sheep and goat management	LRIC(S), Nagamangala

FISHERIES RESEARCH AND INFORMATION CENTER, ANKOLA

1	26.12.2016	FRIC(M), Ankola	Responsible Fisheries and Hygiene maintenance in Fish market for fishermen and fisherwomen as part of Jai Kisan Jai Vigyan Week: 28 Nos.	Dr. Chandrakant Lingadhal
2	17.02.2017	Hotel Vaibhav Palace, Kumta	Open sea cage fish farming to the fish farmers of Ankola and Kumtataluks under AINP – Mariculture Project:41 Nos.	Dr. Jayaraj, E.G. and Dr. Chandrakant Lingadhal

FISHERIES RESEARCH AND INFORMATION CENTER, HESARAGHATTA

1	12.07.2016	Veterinary College, Bengaluru	Fish culture in natural tanks & ponds	Dept. of Fisheries & KVAFSU, Bidar
2	27.09.2016	FRIC, Hesaraghatta	Fish culture in ponds and tanks	Dr. Manjappa, N. and Dr. Ravindragouda Patil
3	21.11.2016	FRIC, Hesaraghatta	Integrated fish culture	Dr. Manjappa, N.

FISHERIES RESEARCH AND INFORMATION CENTER, HEBBAL

1	09.01.2017	Chamarajnagar	Banning of fishing in monsoon and ill effect of dynamites	Dept. of Fisheries, Chamarajanagara and FRIC, Hebbal
2	13.05.2016	Chamarajnagar	Composite fish rearing	Sujala-III & FRIC, Hebbal
3	31.05.2016	Chamarajnagar	Training on fish rearing	Sujala-III & FRIC, Hebbal
4	13.07.2016	Chamarajnagar	Fish Farmers Day and Awareness about fish rearing	Sujala-III, FRIC, Hebbal and Dept. of Fisheries, Chamarajanagara

KRISHI VIGYAN KENDRA, DAKSHINA KANNADA (KVK-DK)

A	On campus trainings			
1	09.05.2016 to 14.05.2016	KVK-DK	KRISHI RANGA summer camp for Kids	KVK-DK, Mangaluru, SCUHA, Sankaetha, Mangaluru and PFGF, Mumbai
2	20.07.2016	KVK-DK	Aquaculture an alternative livelihood	KVK-DK
3	20.07.2016	KVK-DK	Fish Farmers Day- Scientific Fish Culture	KVK-DK

4	06.10.2016	KVK-DK	Integrated farming system – Ornamental fish culture, Poultry farming	KVK-DK
5	05.12.2016	KVK-DK	World Soil day and Pre Rabi Campaign- Importance of soil and soil testing, nutrient deficiency symptoms and management	KVK-DK
6	05.12.2016	KVK-DK	Rabi Campaign 2016 cultivation aspects of pulses and seed treatment	KVK-DK
7	15.12.2016	KVK-DK	Custom hiring services in Agriculture an institutional economic study in eastern dry Zone of Karnataka	KVK-DK
8	21.12.2016	KVK-DK	Importance of agriculture and allied enterprises in nutritional security for the farmers, For women SHG group of Sanoor, Karkakal	KVK-DK
9	23.12.2016	COF, Mangaluru	<i>Raithara adaya mattu kalyanna vridhi prayogika karya yojana</i>	KVK-DK
10	23.12.2016	COF, Mangaluru	Kitchen Gardening	KVK-DK
11	28.12.2016	KVK-DK	Improved cultivation Practices in Greengram under NFSM cluster Front Line Demonstration	KVK-DK
12	28.12.216	KVK-DK	Focused group discussion on cultivation practices in green gram	KVK-DK
13	31.12.2016	KVK-DK	Pest of coconut and Integrated fish farming	KVK-DK
14	24.01.2017 to 25.01.2017	KVK-DK	Value addition to fish	KVK-DK
B	Off campus trainings			
1	24.05.2016	Naravi, Bantwal Tq.	FLD on Zinc Management in Paddy	KVK-DK
2	13.06.2016	Neerude	Integrated crop management in Paddy	KVK-DK
3	27.06.2016	Manchi, Bantwal Taluk	FLD on Integrated crop management in Pepper	KVK-DK
4	13.07.2016	Sajeepa, Bantwal Tq.	FLD on ICM in Coconut	KVK-DK

5	16.07.2016	Pilikula, Mangaluru	Plant Protection and Farmers Right Act-2001	KVK-DK
6	28.07.2016	Balpa, Sullia Taluk	FLD on ICM in Areca nut	KVK-DK
7	28.07.2016	Subramanya, Sullia	Fish culture and Swarnadhabra poultry farming	KVK-DK
8	28.07.2016	Subramanya, Sullia	Scientific poultry farming	KVK-DK
9	30.07.2016	Bettampadi, Puttur	Agricultural awareness programme for the students	KVK-DK
10	18.08.2016	Nirumarga, Mangaluru	ICM in Black Pepper	KVK-DK
11	29.08.2016	Uppinangadi, Puttur	OFT on Management of Quick wilt in pepper	KVK-DK
12	04.01.2017	Hosabettu, Surathkal	“Pest and Diseases of Coconut and flower crops	KVK-DK
13	16.01.2017	Kalladka, Bantwal	Integrated Fish Farming	KVK-DK
14	24.01.2017	Kabaka, Bantwal Tq.	“Importanance of soil testing and soil sampling in Agriculture”	KVK-DK
15	31.01.2017	Harekala	Improved Cultivation Practices in chilli and capacity building programme for the farmers	KVK-DK
16	01.02.2017	Thikkottu	BHC in Coconut	KVK-DK
17	03.02.2017	Neerodi	ICM in Jasmine	KVK-DK
18	06.02.2017	Vitla	Inflorescence die back and Inflorescence caterpillar in Areca nut	KVK-DK
19	16.02.2017	Naravi	Improved cultivation Practices in Green gram under NFSM Cluster Front Line Demonstration	KVK-DK
20	16.02.2017	Arekala / Pavur	Feed Instruments and medicines required for chicks rearing (FFS)	KVK-DK
21	18.02.2017	Arekala / Pavur	Brooding of chicks (FFS)	KVK-DK
22	23.02.2017	Tenkamijar	Focused group discussion on cultivation practices in green gram	KVK-DK
23	28.02.2017	Narimogaru, Puttur	Integrated Fish Farming System	KVK-DK
24	18.03.2017	Mulki	White flies in Coconut	KVK-DK
25	25.03.2017	Kuppepadav, Gurupura	Vermicompost production and its importance	KVK-DK

C	Sponsored training programme			
1	24.10.2016	KVK-DK, Mangaluru	Diploma in Agricultural Extension Services for input Dealers	DAESI
2	26.10.2016 to 28.10.2016	KVK-DK, Mangaluru	Ornamental fish production and marketing	NFDB, Hyderabad
3	28.10.2016	KVK-DK, Mangaluru	Over view of agricultural production system in India	DAESI
4	28.10.2016	KVK-DK, Mangaluru	Major flagship programmes of central/state government related to agricultural development	DAESI
5	05.11.2016	KVK-DK, Mangaluru	Importance of pest and disease control in agriculture	DAESI
6	05.11.2016	KVK-DK, Mangaluru	Identification of damages caused by pest and pathogens	DAESI
7	12.11.2016	KVK-DK, Mangaluru	Importance of soil testing methods of soil sampling, Interpretation and farm advisory based on soil test results	DAESI
8	12.11.2016	KVK-DK, Mangaluru	Micro and macro nutrient deficiencies and their systems	DAESI
9	26.11.2016	KVK-DK, Mangaluru	Types of pest and its classification and integrated pest management	DAESI
10	26.11.2016	KVK-DK, Mangaluru	Insect and disease systems Disease of major crops	DAESI
11	03.12.2016	KVK-DK, Mangaluru	Improvement in farmers income	DEASI
12	03.12.2016	KVK-DK, Mangaluru	Cultivation practices of coconut	DEASI
13	17.12.2016	KVK-DK, Mangaluru	Cultivation practices of Areca nut	DEASI
14	17.12.2016	KVK-DK, Mangaluru	Diseases of Coconut and its management	DEASI
15	23.12.2016	KVK-DK, Mangaluru	Improvement in farmers Income, value addition in horticultural crops and income generation	DEASI
16	23.12.2016	KVK-DK, Mangaluru	Kitchen Gardening – Importance of vegetable in human diet, Importance of health and personality development of farmers	DEASI

17	31.12.2016	KVK-DK, Mangaluru	Pests of major crops of the district	DEASI
18	31.12.2016	KVK-DK, Mangaluru	Aquaculture	DEASI
19	07.01.2017	KVK-DK, Mangaluru	Disease of Coconut and Practical class on pest of crops, Soil Nutrient analysis	DAESI
20	07.01.2017	KVK-DK, Mangaluru	Identification of the diseases and pests	DAESI
21	13.01.2017	KVK-DK, Mangaluru	Importance of bio-fertilizer	DAESI
22	13.01.2017	KVK-DK, Mangaluru	Azolla cultivation	DAESI
23	18.01.2017 to 25.01.2017	KVK-DK, Mangaluru	Value addition to fish	NFDB-Hyderabad
24	21.01.2017	KVK-DK, Mangaluru	Introduction of farm animal and animal husbandry, maintenance of farm animals	DAESI
25	21.01.2017	KVK-DK, Mangaluru	Disease of farm animals and its controls measures	DAESI
26	04.02.2017	KVK-DK, Mangaluru	Integrated disease management	DAESI
27	04.02.2017	KVK-DK, Mangaluru	Communication skills negotiation, and motivation counseling and application of these concepts for convincing the farmers for better adoption technologies	DAESI
28	11.02.2017	KVK-DK, Mangaluru	Suitable cropping system for the existing agro ecological situation	DAESI
29	11.02.2017	KVK-DK, Mangaluru	Problematic soils and their management	DAESI
30	18.02.2017	KVK-DK, Mangaluru	Crop production of Horticulture crops (Cashew) Pest and diseases of Cashew	DAESI
31	18.02.2017	KVK-DK, Mangaluru	Classification of pesticides	DAESI
32	06.03.2017 to 08.03.2017	KVK-DK, Mangaluru	Ornamental Fish Production and Management	KVK-DK
33	11.03.2017	KVK-DK, Mangaluru	Paddy Cultivation, SRI Method of Paddy cultivation, Nursery techniques for growing horticulture crops	DAESI

34	11.03.2017	KVK-DK, Mangaluru	Demonstration on Paddy seed selection, yield estimation in pulses	DAESI
35	18.03.2017	KVK-DK, Mangaluru	Installation and management of micro irrigation system, budget requirement for the installation of micro irrigation system	DAESI
36	18.03.2017	KVK-DK, Mangaluru	Chemical classification of pesticides, mode of action of pesticides	DAESI
37	25.03.2017	KVK-DK, Mangaluru	Rural credit, Maintenance of balance sheet. Fertilizers, sampling of fertilizers, Water retaining	DAESI

FISHERIES RESEARCH AND INFORMATION CENTER, ANKOLA

1. Dr. Chandrakant Lingadhal explained Centers activities and shrimp culture practices to Diploma students of Diploma Agriculture College, Kumta on 30.05.2016 (23 students visited the Centre).
2. Dr. Chandrakant Lingadhal explained Centers activities and shrimp culture practices to B.Sc.(Agri) II year students(48 Nos.) & Diploma students (18Nos.) of UAS, Dharwad on 1.04.2016 (66 students visited the Centre).
3. Dr. Chandrakant Lingadhal explained Centers activities and shrimp culture practices and Paddy cum fish culture to Mr. Padurang B Naik, Commissioner of Agriculture, Bengaluru on 18.08.2016
4. Dr. Chandrakant Lingadhal explained Centres activities and shrimp culture practices to B.Sc.(Agri) II year studentsofUAS,Dharwad on 26.10.2016 (65 students visited the Centre).
5. Dr. Govind M Salaskar explained the Brackish water fish/shrimp culture to visiting Higher Primary School students of Bunder, Ankola on 31.12.2016
6. Dr. Chandrakant Lingadhal explained Centres activities and shrimp culture practices to NCC students of PMPU College, Ankola on 24.01.2017 (96 students visited the Centre).
7. Dr. Chandrakant Lingadhal handling the course entitled “Meenu Sakanike” for Diploma Agri students at College of Diploma in Agriculture, Kumta during 2016-17.

Information and guidance provided to B.Com and SSLC students for project work

#	Name of the student and School	Date of Visit	Explanation & Information provided
1	Kushama V Naik Akshata B Bant Arya H Narvekar Sandya Ager Nagaratna Gouda Govt. first Garde College,Pujogeri,Ankola	3.08.2016 8.09.2016	Fisheries Information for Project work: Polyculture
2	Mr.Raghvendra VNaik PM High School,Ankola	18.10.2016	Brackish water shrimp farming.
3	Miss Sahana N Naik PM High School,Ankola	19.10.2016	Environmental friendly brackish water fish polyculture

CANINE RESEARCH AND INFORMATION CENTRE, TIMMAPUR, MUDHOL

Timmapur village was adopted in current year to encourage the farmers to rear the Mudhol hounds.

Under SCP-TSP scheme 6 beneficiaries were provided with Pups (6 Male + 6 Female) along with Food and Other supplements for one year.

Among the 6 females all have reached puberty and successfully mated and 40 conceived.

One of female has given birth to 6 Female + 1 Male with projected income of 42 thousand. Hence, enhancing the livelihood of the farmer.

Mudhol Hound to India Army, RVC Meerut (UP):

Six dogs (3-Male and 3-Female) were handed over by Karnataka Veterinary, Animal and Fisheries Sciences University, Bidar to Remount Veterinary Centre and College, Meerut for feasibility trial for induction into India Military by Dr. Yathiraj, Dean, Veterinary College, Bengaluru.

Already the pre assessment of dogs has been carried out at ground level by Lt. Karnal Surinder Saini at Canine Research and Information Centre, Mudhol, Bagalkot during the third week of January.

Dogs here receive training on specialized jobs like explosive detection, mine detection, tracking, guarding etc.

12. Distinguished Visitors to the Institutes

#	Name, Designation & Institute	Date	Purpose
VETERINARY COLLEGE, BENGALURU			
1	Altech team visit to Altech Nutrition Research Alliance laboratory	13.03.2017	To review progress of the project.
2	Devi Rao, R. Area Livestock and Natural Resources Advisor, University of California Cooperative Extension, Santa Cruz Counties	19.12.2016	For a study on Dairy Production Systems in India
3	Dr. Subhasis Bandyopadhyay, Station In charge, Eastern Regional Station, IVRI, Kolkata		
4	Dr. Jeyathilakan Professor & Head Department of Parasitology Veterinary College & Research Institute Orathanadu, Thanjavur (District), Tamil Nadu.		
5	Dr. N. Earanna Professor, Dept. of Agricultural Microbiology Agriculture College, GKVK Campus University of Agricultural Sciences Bengaluru		Resource Scientists and experts for the XX NATIONAL TRAINING PROGRAMME on "Clinical parasitological techniques & molecular methods in the detection of parasitic diseases"
6	Dr. C. Chinnamade Gowda Junior Acarologist AINP on Agril. Acarology Dept. of Agricultural Entomology University of Agricultural Sciences, G.K.V.K., Bengaluru -	7 th to 27 th November, 2016	
7	Dr. V. Chengalva Rayulu Professor and Head Department of Veterinary Parasitology College of Veterinary Science, Tirupati-517502, A. P., SVVU		
8	Dr. T. Venkatesan Principal Scientist National Bureau of Agricultural Insect Resources, Hebbal, Bengaluru		
9	Dr. P. P. Sengupta Principal Scientist National Institute of Veterinary Epidemiology & Disease Informatics (NIVEDI), IVRI Campus, Ramagondanahalli, P.B. No. 6450,Yelahanka, Bengaluru		
10	Dr. G.S. Sreenivasamurthy Associate Professor & Head Department of Parasitology College of Veterinary Science, SVVU, Rajendranagar. Hyderabad-500030		

11	Dr. R. Venu Associate Professor Department of Veterinary Parasitology College of Veterinary Science, SVVU Tirupati-517502,A.P		
12	Dr. Anil Kumar, Scientists, Sri. Chitra Tirunal Medical Research Insitutute, Trivendaram, Kerala.	27.02.2017	Technical discussion on International conference 2017
13	Dr.Balasubramaniyan, Prof. & Head, Dept. of Vety. Pathology, Vety. College, Namkal.	26.02.2017	Technical discussion on International conference 2017 External Examiner for M.V.Sc. students
14	Dr. Balachandran, Dean Madras Veterinary College, Chennai	27.02.2017	Technical discussion on International conference 2017 External Examiner for Ph.D. students
15	Dr. Anand Kumar, Prof. & Head, Vety. College, Paddatur, Andhra Pradesh.	03.03.2017	External Examiner for Ph.D. thesis.
16	Sri. Bairathi Suresh MLC	03.02.2017	To visit the Department
17	Dr. C. Renuka Prasad, Hon'ble Vice Chancellor, KVAFSU, Bidar and Dr. M. Devaraj, President, Karnataka Veterinary Council and Member of Board of management, KVAFSU, Bidar	30.04.2016	World Veterinary Day and Inauguration of Antirabies and Animal Birth Control Programme in Veterinary College Hospital
18	Officer on Special duty to the Hon'ble Chief Minister visited the Department	23.03.2017	For the surgical treatment of CM's dog.

VETERINARY COLLEGE, BIDAR

1	Prof. Pallavi Kesari, Professor and Head, Dept. of Community Medicine, Bidar Institute of Medical Science, Bidar	30.04.2016	Guest Lecture delivered on the occasion of World Veterinary Day
2	Dr. Srinivas Kaveri, French Institute of Health and Medical Research, Paris	08.06.2017 15.06.2016	Dr. R.D. Nanjiah Lecture delivered Development of Campus Development activities of College
3	Dr. Chandrashekhar Pasare, University of Texas		
4	Mr. Ashok Kheni, MLA (Bidar South) Bidar		
5	Dr. Govindaiah, Ex Dean, VCS		
6	Dr. C.R. Chandrashekhar, Eminent Medical Scientist and Expert from National Institute of Mental and Neurosciences, Bengaluru	16.06.2016	Dr. R. D. Nanjiah Lecture delivered
7	Dr. Gajendragad, NIVEDI, Bengaluru	04.08.2016	Guest Lecture delivered

8	Managing Director, Executive Engineer, AEE, AE of GESCOM	13.10.2016	Selection of linemen post in KVAFSU, Bidar sports ground
9	Mr. A. Manju, Hon'ble Minister of Animal Husbandry, Bengaluru	27.10.2016	Meeting with University officials and other GOK departments
VETERINARY COLLEGE, SHIVAMOGGA			
1	Canara Bank Training center, Holulur	01.04.2016 to 31.03.2017	Farmers/training participants visited and saw the different units of ILFC
VETERINARY COLLEGE, HASSAN			
1	Prof. Anthony. R. Fooks, Head, Wildlife zoonoses & Vector Borne Diseases, APHA, Surrey, UK.	24 th -25 th Feb, 2017	International Conference and for investigating possibilities of establishing a Rabies Diagnostic Laboratory at Veterinary College, Hassan
2	Dr. Ashley Banyard, Scientist, APHA, Surrey, UK		
3	Dr. David Selden, Scientist, APHA, Surrey, UK		
4	Ryan Wallace, Scientist, CDC, Atlanta, USA		
COLLEGE OF FISHERIES, MANGALURU			
1	Dr. Dam Roy Director CARI, Andaman	09.04.2016	Visit to college and to deliver a guest lecture on 'Fish and Fisheries – My Experience'
2	Dr. Anna Godhe Professor, Marine Ecology Department Marine Sciences University of Gothenburg Box 461, SE 405 30 Göteborg, Sweden	05.12.2016	To discuss on the collaborative work
3	Dr. Lucy M. Turner Scientist, Department Marine Sciences University of Gothenburg Box 461, SE 405 30 Göteborg, Sweden	05.12.2016	To discuss on the collaborative work
4	Dr. Sanath K. M. Senior Scientist, Central Institute of Fisheries Education, Mumbai	13.02.2016	To conduct comprehensive viva-voce for Masters students
5	Dr. K. J. Palaksha PhD, Post-doc (South Korea) Professor, Biomedical Research Co-ordinator SDM College of Medical Sciences & Hospital Manjushree Nagar, Sattur-580009. Dharwad, Karnataka, INDIA.	06.03.2016	Visit to college and to deliver talk on Stem cell research

6	Dr. R.T. Patil, Former Director of ICAR – Central Institute of Post Harvest Technology	14.12.2016	To deliver a talk on Recent Innovations in Food Processing with emphasis on fish
7	Dr. B. Mohana Kumar Associate Professor Nitte University Centre for Stem Cell Research & Regenerative Medicine (NUCSReM) K S Hegde Medical Academy (KSHEMA), Nitte University, Deralakatte, Mangaluru- 575 018	27.12.2016	To deliver talk on Stem cell research and also to discuss on the formation of Institutional Biosafety Committee
8	Dr. N. Ramaiah Chief Scientist, Biological Oceanography Division, Naitonal Institute of Oceanography, Dona Paula Goa	21.03.2017	Visit to college and to deliver a talk on Ocean De-oxygenation and Blue Economy
9	Kumari Nagalakshmi Bai Chairman, State Women Commission, GOK, Bengaluru	30.03.2017	Chief Guest for the International Women's Day Celebration In the College

DAIRY SCIENCE COLLEGE, HEBBAL, BENGALURU (DSCH)

1	Dr. Jha Director, Model Dairy Plant NDRI, Karnal	25.01.2017	Visit
2	Dr.Shankar P.A. Former DI (PG), KVAFSU	12.11.2016	To orient the PG students of the department regarding research activities

INSTITUTE OF ANIMAL HEALTH AND VETERINARY BIOLOGICALS, BENGALURU

1	Dr. Redigheh kazeminia, Mr.Nasrin Mahmaudan, from Iranian Veterinary Organization	22.06.2016	-
2	Mr. Alishiri, Managing Director, and Mina Khodadudi, Technical Manager Nojan Mehr.co, Iran	22.06.2016	-
3	Dr. N.N.Sasi, Director, Animal Husbandry, Kerala	08.07.2016	-

LIVESTOCK RESEARCH AND INFORMATION CENTER (SHEEP), NAGAMANGALA (LRIC)

1	Dr. S.M.K. Naqvi, Director, CSWRI, Avikanagar.	02.11.2016	To review the project activities of Mega Sheep Seed Project on Mandya Sheep in both field and farm flock.
2	Dr. S.V.Singh, Principal Scientist, CIRG, Makhdoom.	04.02.2017	To view the health status of sheep and advice on the control measures for Jhone's disease.

3	Dr. Srinivas, Joint Director, Dept. Of Animal Husbandry and veterinary services, B'llore.	04.03.2017	To view the activities of LRIC(S), Nagamangala.
---	---	------------	---

KRISHI VIGYAN KENDRA, DAKSHINA KANNADA

1	Shri Nalin Kumar Katil, M.P., D.K. Mangaluru	13.04.2016	Participation in Pradhana Mantri Pasalu Vima Yojana
2	Smt. Shrividya, Chief Executive Officer, DK, Zilla Panchayath, Mangaluru		
3	Sri Ritesh Salian, Board of Management, KVAFSU, Bidar		
4	Dr. H. Kempegowda, Joint Director of Agriculture, DK, Mangaluru		
5	Shri. H.R. Yogish, Deputy Director, Horticulture Dept. D.K. Mangaluru		
6	Dr. K.V. Devaraj, Former Vice-Chancellor, UAS, Bengaluru	24.08.2016	KVK Visit
7	Dr T. Harish, Dy. Director, Spices Board, Haveri, Karnataka	04.10.2016	KVK Visit
8	Dr. Melwin D' Costa., St. Aloysius College, Mangaluru	07.10.2016	KVK Visit
9	Dr.K. Veerana, Professor of Agronomy, UAHS, Shivamogga	17.10.2016	KVK Visit
10	Ms. Gargi Jain, IAS-Probationary	19.10.2016	KVK Visit
11	Mr Sampath Sambrajya, President, Krishika Samaja, D.K.	21.10.2016	KVK Visit
12	Mr Rajavarma Bailangady, President, Krishika Vichara Vinimaya Kendra, Moodabidre		
13	Mr Subhash Chouta, Vice-President, Krishika Vichara Vinimaya Kendra, Moodabidre		

FISHERIES RESEARCH AND INFORMATION CENTER, ANKOLA

1	Dr. K.V. Basavakumar Professor of Fisheries DOR,UAS,Dharward	1.04.2016	B.Sc.(Ag) II year students& Diploma students field visit (Total no. of students:66)
2	Mr. M.L. Doddamani Deputy Director of Fisheries Dept. of Fisheries, Karwar	20.05.2016	Field Visit to Shrimp farm
3	Mr. Thimmappa, M.H. Asst. Director of Fisheries (G-II)Dept. of Fisheries, Ankola	12.07.2016 14.07.2016	For organizing training programme& Discussion
4	Mr. Venkatrama Hegde Asst. Director of Fisheries (G-I),Dept. of Fisheries, Karwar	20.05.2016 12.07.2016	Training purpose& Inspection of Shrimp farm
5	Mr. Honnappa G Gouda Joint Director of Agriculture, Karwar	17.08.2016	Field visit
6	Mr. Padurang, B. Naik, Commissioner of Agriculture, Bengaluru	18.08.2016	Field to Paddy cum fish culture plot

7	Dr. K.V. Basavakumar Dr. N.A. Yeledhalli Dr. R.H. Hanumanaikar Professors, UAS, Dharwad	12.09.2016	Discussion with regard to Matsyamela-2016
8	Dr. K.V. Basavakumar Professor of Fisheries DOR, UAS, Dharward	26.10.2016	B.Sc.(Ag) II year studentsfield visit (Total no. of students:65)
9	Dr. G.N. Hariharan Director –Biotechnology M.S. Swaminathan Foundation, Chennai	5.01.2017	Field survey visit
10	Mr. G.R. Tandel NCC Troop Commander PMPU College, Ankola	24.01.2017	NCC students Field Visit to Centre(96 Nos.)

FISHERIES RESEARCH AND INFORMATION CENTER, BHUTNAL, VIJAYAPURA

1	Dr. Gunnar, District Health Officer (malaria) Vijayapura	03.06.2015	Malaria Control
2	Dr. S.Y. Walli, Programme Coordinator, KVK, Vijayapura	12.07.2016	As Recourse person
3	Dr. B. Manjunath, JD Agri, Vijayapura	12.07.2016	Chief guest for training Programme
4	Dr. SR. Ambakar Vijayapura	27.07.2016	Guest for training Programme
5	Professor. A.A. Nasir, Professor N.D. Bavor, Professor. S.G. Maldar and Professor. Smt. A.M.Chodari HOD, Zoology, Anjuman, Arts sciences and commerce, Vijayapura	17.02.2017	visitedalong with their Zoology studentsfor study tour

FISHERIES RESEARCH AND INFORMATION CENTER, HESARAGHATTA

1	Dr. R. Hampaiah Chairman Biodiversity Board, Govt. of AP, Hyderabad	20.04.2016	To see the farm activities
2	Dr. R.V. Prasad Vice-Chancellor, KVAFSU, Bidar	27.09.2016	To inaugurate the Training program
3	Dr. S.M. Shivaprakash Director of Extension, KVAFSU, Bidar	27.09.2016	President for Training program
4	Students, Silicon International Public School, Bengaluru	28.10.2016	To visit the Farm

CANINE RESEARCH AND INFORMATION CENTER, TIMMAPUR, MUDHOL (CRIC)

1	Dr. Suresh, S. Honnappagol Commissioner Department of AH and VS Govt. of India, New Delhi	27.07.2016	Visited many times and very happy about the development of CRIC Timmapur
2	Dr. A.B. Patil Registrar UHS, Bagalkot	25.11.2016	Visited and very happy about the development of CRIC Timmapur

13. Important decisions taken during 11th Extension Education Council Meeting held on 28.06.2016

1. Sri. C.V. Lokeshgowda, Progressive Farmer, Bengaluru opined that;

Blue Tongue Vaccine be made available to farmers whenever the disease outbreak. IAH&VB, Bengaluru made available Blue Tongue Disease Vaccination as per requirement.

Dissemination of information to the farmers through brochure / pamphlets.

For sheep and goat rearing training may be identified through the Societies of the village, for the benefit of needy farmers.

University while distributing small ruminants to the farmers, a minimum of 4 females and 1 male should be distributed for better productivity.

The success stories of sheep and goat farmers may be published.

2. Dr. S.K. Meti, Director of Extension, UAS, Raichur opined that;

Field demonstration on integrated farming system be taken up at the progressive farmers' field in collaboration with UAS-Raichur / Dharwad / Bengaluru, UHS-Bagalkot, UAHS-Shivamogga, DAH&VS, Dept. of Horticulture, Dept. of Agriculture, Dept. of Sericulture.

Extension activities of the university may be increased for the economic upliftment of farming community.

3. Sri. Mahadev Nagure, Progressive Farmer, Bidar opined that the integrated farming demonstration will help in bringing the youth from cities to villages. Animal husbandry activities boost up livelihood security.
